## NINTENDO STUMBLES WITH VIRTUAL BOY INTRO!

At Nintendo of Japan's annual trade extravaganza, the Shoshinkai Show, Nintendo demonstrated their new 32-Bit, 3-D portable video game system called the Virtual Boy. It sounded intriguing. But after getting to play it for a while, I have a really hard time believing that U.S. players will welcome this new system with open arms.

The details are spelled out in our Shoshinkai special section elsewhere in this issue, but the screens aren't color, the games are mediocre, it will cost about \$200 and it hardly is portable.

Not going to some kind of a color screen is the first major problem with the system. For \$200 you get a two-color screen—red and black. Why? Probably cost. This is 3-D and you need two screens. As we saw with the old TurboExpress from NEC, good quality, high-resolution LCD screens are VERY expensive. So Nintendo is going to keep costs down by giving us red LCDs on a black background. One would have thought that they learned their lesson from their no-color Game Boy. Strike one.

The games that were shown were nothing to get excited about. The fighting game—Teleroboxer, had the best 3-D imaging. Essentially it was Super Punch-Out with aliens. Their pinball game had a backward sloping playfield, kind of like their just-released Super Pinball for the Super NES. And, the best for last! It is no secret that Nintendo always launched their new game systems with a Mario game. For this system they didn't even have the courtesy to create something new. We get the ORIGINAL Mario game! Remember that one? Mario and Luigi jump up and punch the girders which flip the enemy over (remember the crabs?), and then they kick off the 3-D potential of the screen for points. Yep, we now get it in almost 3-D. On Nintendo's behalf, the games were unfinished and less than half done so they could improve. Still, not a great selection of carts to show off the 3-D potential of the system. Strike two.

Portable? Did anybody say portable? Perhaps. It will give you seven hours of play time on six AA batteries, but where do you put it? You need your hands free to hold the controller and with the tripod mount you need a table to set it up on. Kind of tough to play it in the car on a trip. I heard rumors going around that there will be a chest-mounted tri-pod, but with the system completely covering your eyes, you just can't see anything but the game. I can picture the headlines in the tabloids—"Boy walks in front of car while playing game!" Nice design Nintendo.

Strike three.  
Last but not least, the price—\$200. You would expect to get a lot more for that kind of money. Granted there has to be two of everything, as you literally need an independent system for each eye. But Nintendo knew this going in, and why they let it develop this far is anybody's guess. Things may change by the time the winter CES rolls around. But based on what was available at the Shoshinkai Show, this system needs work ... a lot of work.

## LETTER OF THE MONTH!

### BUG SPRAY?

It's like this—I bought this game called Dark Wizard and as soon as I got home I tore into the wrapper, opened the case and reverently put the CD into its place ... Okay, here we go ... press START! wow! Would you look at that picture! Hey! I get to be one of four characters—Awesome! The storyline is way too cool! The battle now begins ... Three weeks of add ct on to this game have gone by and I've gotten pretty far. Then guess what happens? My husband and my son want me to go fishing with them! Fishing? What, and stop playing Dark Wizard? You've got to be kidding! But I've gotten so far and—what? I never do anything with you guys anymore? Well I stop crying son. Yes, love you, but oh, alright. Where's the bug spray? Psst. Psst. Psst. I'll meet you, out in the car after I put Dark Wizard back in the case. A couple of hours passed, we didn't catch any fish and to top it off, we were eaten alive by the mosquitoes! Time to head home and play Dark Wizard some more. I put the CD in, and am waiting to continue this truly wicked game ... press START ... press START ... press START! I open the CD player and take out the disk to look at it. Oh nooo!! Dear God, not now! Honey, look at my game—there are pits all over my disk! What? Yeah, I sprayed bug

Hey Laurie, does this picture ring a bell?

Where's the bug spray? Ha, ha, ha!!

repellent on me in the house, why? Oh boy, the bug spray must have gotten on the disk. It's my fault isn't it? I'm so depressed! What do I do now? How do function? The moral of the story is: never go fishing with your family and never, EVER spray bug repellent in the house!!

Laure A. Dominas  
Eva, TN

(Ed. I guess we've all learned a valuable lesson boys and girls. Never stop playing your games to go fishing and remember to keep anything with petroleum based solvents or anything else like that away from your CD titles. Don't worry Laurie, you're not alone. Plenty of us have had games accidentally wiped out. You must carry on, little trooper!)

## WIN A PAIR OF ACCLAIM JOYSTICKS!

The best letter submitted each month will win his/her choice of either the Super NES or Genesis version of Acclaim's hot, new Dual Turbo Wireless Remote System.

### QUESTIONS, QUESTIONS...

I would, as many of your other readers be greatly pleased if you could put forth the time to answer a few questions. Are you going to do a special magazine giving the specs on all of the new systems (e.g. 32X, PlayStation, etc...)? And, just to

This year's Video Game Buyer's Guide is the biggest and best yet!

prove to people how far the technology has come, you could publish the specs for the old systems like the Atar 2600. Second, will Nintendo be the only game company to work with Silicon Graphics? What popular movies have used Silicon Graphics?

Chris Thacker  
Kirkville, MO

(Ed. Our 1995 Video Game Buyer's Guide has all the information you want [except for the specs on the older systems] and is in stores everywhere. At present, SG is not doing any more video games. As far as movies, Jurassic Park used effects produced by a SG computer.)

## SEGA CD FIGHTING GAMES

I have a Sega CD. Now, I'm not here to put it down. I enjoy the games that I have for it: the simulations, the full-motion inter-actives, etc. My question is when is Sega going to put out more fighting titles? I know the Sega CD has Mortal Kombat, a new game called Brutal and an upcoming Eternal Champions on CD, but how about some more? To cut to the chase, will the Sega CD ever get any more fighting games? I'm beginning to think that I should have bought a 3DO because they have more fighting games for it!

Ulysses Ramos, USAF  
APO, AE

*(Ed. Well Ulysses, your prayers have been answered. Not only is Fatal Fury Special coming to the Sega CD, but so is Samurai Shodown! If that doesn't quench your thirst for fighting games, nothing will!)*

## NEW LIFE FOR AN OLD SYSTEM

Hey EGM! I've been reading your magazine since issue number one and I've finally decided to write. The TurboDuo support is extinct and I for one think that this is tragic. What a great system this was. I won't get into how NEC and TTI didn't know a thing about marketing this great hardware, but I do have a question. What I'm wondering is, would it be possible to purchase a development system for the TurboGrafx hardware from TTI or NEC? A friend of mine is a programmer and I've been learning computer art and programming. We are also big fans of both the newer and older systems. We would like to see these companies sell their development systems to the general public after they decide to no longer support the hardware. This way, the not-yet-known programmers and artists who would like to program games for this system could [have a chance at them]. I know that there are a lot of people that have held on to their old TurboGrafx and would probably enjoy support for their systems. If TTI would let us program the kind of games we like, burn our own eproms and sell them to the public, I believe that we can find some new support. I know this is popular in Europe with the old C64 and Amiga computers. Isn't this the way the programmers at Subterranea got started? If companies would open up the hardware architecture to the public after the system hardware has been retired, I feel we would have a lot more up-and-coming

software companies, just like in Japan and Europe.

Greg Deutschlander  
Eau Claire, WI

*(Ed. It's good to see that people aren't ready to write off the Duo just yet. Your ideas about supporting the system and giving "the little guy" a chance to resurrect a market are great. However, you'll have a very tough battle indeed, Greg. We contacted a number of people such as Don Shirley from Working Designs (a company which developed games for the TG-16). They all had the same response. We were told that you would first need a lot of technical support from Japan to help you with the development system. A thorough knowledge of Japanese would be necessary to translate the documentation of this system. You would also need a six-figure (roughly \$100,000-250,000) budget to produce and market your product. If you wanted to do a chip-based game, expect to shell out even more money. Don't forget about licensing fees! To make matters even worse, you're looking at a 9-12 month lead time! All in all, everyone we talked to seemed to think there would be very little or no chance of pulling off a new Duo game. The Japanese, at this point, are more likely to be interested in 32-Bit software for their upcoming NEC FX system. Maybe you could try that. As for the Duo, it looks like it's officially dead.)*

## I WANT IT!

There is an awesome game for the Neo-Geo that never got to be on any 16-bit system. I would love to see this game ported over to the Super NES or Genesis system. The name of this game

If you dig NAM-1975, you'll love Natsume's Wild Guns for the Super NES.

is NAM-1975. In my opinion, it is still one of the great action-shooters to this date! Any chance of seeing this game on the Super NES or the Genesis? I think that a lot of gamers would enjoy it!

Joe Boerner  
Couer D'Alene, ID

*(Ed. That was a cool game, Joe! There are no plans to port it over to the Super NES or Genesis, though. There are other games like it that you might enjoy, like Natsume's Wild Guns.)*

## SUGGESTIONS

Let me say that I love your magazine. I've been a reader for over three years, and I'm definitely hooked for life. I am writing to you to share a couple of ideas that I hope you'll consider for your mag. First, show your readers the making of a video game. Show us how a game is put together and how it starts as just a rough idea. Second, tell the readers how the people who make these games get into this kind of work. Once again, these are just ideas that I hope you will consider for this great magazine. Thank you for your time and keep up the good work!

Dominick Byron  
Prescott, AZ

*(Ed. Thanks for the ideas, Dominick! Any and all reader feedback [within reason] is always considered! Keep reading EGM in 1995! Who knows, maybe some of your suggestions might show up!)*

## SUPER NES FULL-MOTION VIDEO

I was wondering if the Super NES was capable of full-motion video? Now I realize that it would be nowhere near the quality of CD-ROM, but what about the halftime report in NBA Jam? It's a little fuzzy, but it still looks okay.

Donnie Snyder  
North Port, WA

*(Ed. Good observation, Donnie! Yes indeed, the good old Super NES is in fact capable of small amounts of full-motion video. Much of the limitation comes from the size of the game cartridge. Full-motion video takes a lot of memory. That is why CD-ROM systems can show more FMV for longer periods of time. A CD can hold a vastly larger amount of data than a Super NES cartridge can, so it is more well-suited for any kind of FMV usage.)*

NBA Jam uses fairly clear full-motion video during the halftime report.

# LETTER OF THE MONTH!

If you think you have what it takes to contribute to society, go write to *Newsweek*. If, however, you have a thought or opinion that fellow gamers would particularly find crazy, we'd love to immortalize you with a special edition *EGM* T-shirt proclaiming your fondness of and psychosis to video games!

Dear *EGM*,

Uh, I like to collect your issues and stuff because you give all the losers the latest info, codes and tips. I like collecting your magazines because you give me the coolest codes for games.

I collected your magazines because my mom wanted me to read so I could get good grades. When I read your magazines it helped me a lot. I raised my average from an "F" to a "D+". My mom was proud of me. But when I stopped reading your magazines, my grades went down.

So thank you for raising my grade to a "D".

P.S.: Can you raise my "D" to an "A"?  
Bernard Reyes, Sacramento, CA

You see? Reading *EGM* is almost as good as a degree from Harvard! Keep up the good work *EGM*, maybe you'll realize your lifelong dream of being an aeronautical engineer or maybe even an *EGM* editor! Your *EGM* T-shirt is on its way!

## CONSUMER ELECTRONICS SHOW

I've been reading your magazine for quite some time now, and what always seems to catch my attention is the coverage on those so-called electronics shows. First of all, I'd like to know if there is any way that I could attend on of these shows. Are any of them open to the public? What I'm really looking forward to is the Winter Consumer Electronics Show, but the problem is that I don't know where it's being held. If you can be of any assistance, it would be much appreciated.

Nordy Isaac  
Los Angeles, CA

*(Ed. Most of these "trade shows" are just that—trade shows. You must be involved with the industry in some way, shape or form to be let in. The Winter Consumer Electronics Show is usually held in Las Vegas. It is, however, not open to the public. Year before last, the Summer Consumer Electronic Show in Chicago was open to the public. It was an absolute MADHOUSE! There has been much debate as of late whether or not to open these shows to the general public, but as of this writing, they are not.)*

## WHAT EVER HAPPENED TO...?

What ever happened to the arcade game Bloodstorm by Sralta? I was looking forward to it coming to my local arcade. A few months later, it still wasn't there. Why was distribution so low on this game? Any chance of it coming to a home system?

Matt Norton  
Raleigh, NC

*(Ed. Bloodstorm enjoyed some success in the arcades, but it had very tough competition [MK II]. It should be in some of the larger arcades so hunt around a bit! It's worth playing so give it a shot! No plans as of yet for a home release.)*

Bloodstorm, probably the goriest video game ever, enjoyed only limited success.

## CHRONO TRIGGER

First off, I would like to thank the people at Squaresoft for creating what is hands-down the best RPG ever! Final Fantasy III delivers BIG TIME! Are there any new pix on Chrono Trigger? I'd love to see 'em! Any release date yet?

John Brobst Jr.  
Columbus, OH

Here's a shot from the Japanese version of the upcoming mega-RPG Chrono Trigger.

(Ed. You wouldn't believe all of the letters we have received praising the work that Squaresoft has done over the past year! They've undoubtedly created a niche for themselves in the RPG Hall of Fame! As for Chrono Trigger, look to the January issue of EGM for a Fact File on this killer RPG! A release date as of this time is sketchy. Expect to see it released March 11 in Japan. It should be released in America within about a year. Guess what? In case you haven't heard, Yuji Horii from Enix Japan [storywriter for Dragon Quest VI] and Akira Toriyama [the artist responsible for Dragon Warrior and Dragon Ball Z] have teamed up with Square and pooled their resources for Chrono Trigger. Whoa! This is going to be a biggie! Just to tide you over, here's a couple of pix.)

Chrono Trigger probably won't hit the American shores for about a year.

## THE LONG AND SHORT OF IT

It's been a while since I've felt the need to write a letter to the editor, but recent complaints I've been reading in this column have inspired me. Bear in mind, though, I will offer no solutions, only commentary. First, let me qualify my credentials before I get to the point. Having recently reached the age of 30, I can proudly say that I was there when the home video game revolution started. I can still remember being the proud owner of the first home video game, a dedicated console that played 10 different versions of Pong. There was no option for a computer-controlled opponent. What options there were, were accessed by manually flipping toggle switches. There was no color, only black, white and grey. Believe it or not, we thought that this dinosaur was the greatest thing since the invention of the wheel! Since then I've been through an Atari 2600, 5200, 7800. Colecovision, the Cras of '84, 8-Bit NES, Sega Master System, Game Boy, Game Gear and now a Sega Genesis. I've also managed to raise a 4 1/2 year-old son who can soundly kick my butt at every Sonic game made! My point is, I've never lost interest in video games over the years, even though I've collected my fair share of lumps and bruises. I keep hearing people complain about manufacturers who drop support for a given system after they develop the next step in technological progress. I've learned to live by three hard and simple rules: 1) No matter what leading-edge system you buy, within one year, someone will come along with something better. 2) Within two to three years, support for your system will begin to wane as that something better becomes the number-one seller. 3) Within three-plus years, your system WILL BE OBSOLETE. These are pretty hard facts to face, but for nearly two decades these simple rules have held true.

Christopher R. Wells  
Fort Wayne, IN

(Ed: You remember Colecovision? Boy Chris, you're really getting along in years! [just jokin']. Seriously, though, you raise some very valid points. One thing that you said needs to be clarified. If you've spent \$500, \$1,000 or more on games, and a new system comes out, it can be a pretty bitter pill to swallow. On the other hand, if a new game system costs \$400 and people complain about the price, I have a piece of advice—DON'T BUY IT! The

people who are complaining should remember the lessons that Chris has learned over the years.)

## WHERE'S THE BEEF?

While reading reviews of the games in your magazine, I have noticed a disturbing trend. It seems to me that in many of the new games, the Genesis versions are bigger and better. Shaq-Fu for the Genesis has more fighters than the Super NES version. Super Street Fighter II for

The Super NES SSF2 has 32-Megs. The Genesis has 40, but what's the difference?

the Genesis has 8 more Megs than the Super NES version. What's going on here? Does Nintendo expect us to buy their games just because they have the Nintendo stamp on them?

Michael Murphy  
Eau Claire, WI

(Ed: First of all, you should ask the companies that made the games why they don't have the extra Megs, levels or fighters. Sega and/or Nintendo didn't make the games that you're talking about. Most of the decisions to add characters, levels and other stuff is up to the manufacturer of the game. Second of all, as far as Super SF2 goes, those extra Megs don't necessarily mean that the Genesis version is **better** than the Super NES version. Some people may argue that the Super NES version is actually better than the Genesis version. But we won't open that can of worms!)

## INTERFACE LETTERS TO THE EDITOR

### NUDITY IN GAMES?

Games in the future will definitely, most positively, have nudity in them. Other countries have nudity in their advertising, as well as some of their video games. Do you think our country will ever go that far? Please respond.

No Name  
Las Vegas, NV

*(Ed. It is very doubtful that you will ever see full frontal nudity in a video game in America. When you start talking about other countries, I take it for granted that you're talking about Japan. There are major differences between what we in America deem socially acceptable, and what the people of Japan see as acceptable. These differences are mostly cultural in nature. When some of the games from Japan come to America, certain things must be omitted. An example of which is any kind of nudity. Due to strong opposition by parent's groups, consumer groups and others, it is unlikely that you will see nudity in video game platforms such as the Super NES or Genesis any time soon.)*

### WORLD HEROES 2 JET

I am a HUGE fan of World Heroes 2 Jet for the Neo-Geo. Do you guys know of any plans to port it over to a 16-Bit platform? This game totally rocks, and I think that it would probably be a big seller!

Larry Alton  
Aurora, IL

*(Ed. Sorry Larry, at this time there is no word about World Heroes 2 Jet going 16-Bit. We have received tons of letters on this game, and obviously it would do well on either the Genesis or Super NES. It has quite a following in the arcades! Maybe this year the folks at Takara might ... hmmm.)*

### DON'T GET BURNED

I'm writing in regards to the Sega CD. Let me tell you, now I think Sega ripped me off. Last Christmas, I planned on buying the Sega CD thinking that it was going to be the ultimate game system. So like a goof, I bought it. Now I admit that there are a few decent games for it, but most of the games are 48-hour productions! This year, I'm going to buy a 3DO and sell my Sega CD. My question is, will the 3DO be a fly-by-night system, or is it as good as it seems?

World Heroes 2 Jet has become a favorite at arcades. Will it come to the home systems?

Uriah Reppert  
Madison, WI

*(Ed. The 3DO is an excellent system. With games like Samurai Shodown, Star Control 2 and Shockwave, the 3DO is definitely making a name for itself. Many people think that the Sega CD is also an excellent system. Both have their strong points and their weak points. Selling your Sega CD was the right thing to do if you weren't happy with it. Hopefully, you'll be happier with whatever else you buy.)*

### 3DO MPEG

I have owned a 3DO since last Christmas, and it is awesome in every way. With a ton of hot, new titles, and the release of the new Goldstar system, I think that 1995 looks to be a good year. However, what has happened to the MPEG add-on? I am aware that the CD-i has their MPEG unit on the shelves, with plenty of disk movies to go with it. Is it still going to be produced for the 3DO?

Vince Zannelli  
Moreno Valley, CA

*(Ed. Well Vince, good things come to those who wait! Rumor has it that the 3DO MPEG unit should be out in February or March. Now you'll be able to watch all of your movie favorites right from your 3DO! Although the quality of the video is not that of the larger, more costly laser-disc movie players, the video quality of the 3DO with the MPEG add-on is not too shabby!)*

### DESIGN YOUR OWN SHOOTER

Having received and read your November issue, I must say that I am most impressed with the "International Outlook" section. This just may be because the grass is always greener on the other side of the fence, but most of the games highlighted in this section seem superior to many I have seen here. In my opinion, the best of these games appears to be Dezaemon, the shooter where you can design your own games. I would like to know how soon we will be seeing it on the Super NES. I would certainly love to

buy this revolutionary game as soon as possible.

Jason Rosa  
Northfield, CT

*(Ed. As of right now, Jason, there are no plans to bring Dezaemon to America. This could quite possibly change in the*

With Dezaemon, you're only limited by the boundaries of your own imagination!

*upcoming months if a company decides to buy the title. Dezaemon is truly a unique game, especially if you always wanted to design your own game!)*

### CROSS-LICENSING

I own a Super NES, Sega CD and a 3DO. It's old news that Samurai Shodown and Super Street Fighter II Turbo are being ported over to the 3DO. Log's suggests that these translations will be exact in every detail. But why would SNK, who owns a competing system, allow for an exact translation for Samurai Shodown to be made, knowing that people will now have a choice. Buy their system for \$400 with Samurai for an additional \$200, or buy a 3DO for \$400 and an exact port of Shodown for \$60? This is a confusing and highly debatable issue.

Rufus Williams  
Brooklyn, NY

*(Ed. First of all, keep in mind that Samurai Shodown is not exactly a new game. It has been around for quite some time, and SNK could probably make more money by licensing it out. Second, soon most Neo-Geo titles will cost only \$60-70, with the advent of the Neo-Geo CD-ROM.)*

Samurai Shodown will be re-created exactly for its much-anticipated 3DO release.

## KING OF FIGHTERS? NOT!

I purchased The King of Fighters '94 as soon as it came out. Okay 194 Megs, right? Then why the repeated graphics sound and animation? Is this some kind of new generation Neo-Geo game that is built to be of \$60 quality? Samurai Shodown has 118 Megs, the animation was better and the graphics were not too far off from KOF '94. I came to some sort of idea on why this might be, actually two ideas. One is that the game has some sort of super secret that will unleash the real The King of Fighters '94 game. The other is SNK realized this game would shortly be out on the Neo-Geo CD-ROM, selling for \$60 or less, so SNK made it very cheaply. All I know is that I paid \$200 for a game that could pass as a Super NES game. The endings kinda stink, too. There are typos in the after-match trash talk, and the final Boss, Rugal, is the cheapest guy I've ever fought. The blood is missing as well as Mai's chest. I heard a rumor about a blood code but I'm so upset anyway I don't even care. Now I know that there are 24 fighters, and they take up a lot of Megs—plah, bah, blah. Come on! Team J.S.A. should not even be there, they suck. They have no use at all, in fact, they're kind of a disgrace to America. They're big, fat morons with nothing interesting about them. They are a waste of Megs. I also looked on the back of the box and they show a couple of scenes from the game. They show the Mexico stage and everybody in the background is so wonderfully colorful. When you play the game, however, everybody in the background is a boring orange color. This is really cheap! I didn't want to write to SNK and complain about their game because they would probably never write me back. So I'm laying the guilt on you!

Dan Casarella  
Bedford, NY

(Ed: So what are you saying—you didn't like the game, or what? Seriously Dan, different strokes for different folks.)

## LETTER SELECTION

How is your letter section done? Are letters selected on a first come, first served basis? What letters are more likely to be published? How many letters do you receive in a month?

Mark Havlisch  
Mission Viejo, CA

(Ed: The letters that get printed are chosen by our editors as being timely, raising up-to-date questions on issues concerning the video game industry and certain titles. We get anywhere from one to three hundred letters a day! Obviously, with numbers like that, we can't open every piece of mail. The letters that are most likely to be published are those that reflect concerns or issues facing gamers at the time they are received. In other words, the more current and relevant the letter, the more likely it is to go into the magazine. We have gotten some really weird stuff over the years. Everything from cans of Spam to old socks have at one time or another turned up in our mail! We've even gotten letters that have been quite disturbing in nature. [Like the one from a guy who thought that Sonic the Hedgehog was a Communist!] Most of the time it's great to hear from our readers. You wouldn't believe some of the ideas we've gotten from all of you in the past! Keep writing those letters everybody! Remember, penmanship doesn't count!)

## ZAP!

Think you've heard all the weird stories? Here's another one! I just purchased the 32X and I own the original Sega Genesis and Sega CD. I hooked up the 32X and all of a sudden, a brown-out occurred in my house! When the electricity returned, I unhooked the 32X and inside the circuit board on my Genesis, two of the chips inside had exploded! This is not only wrecked my Genesis, but also my Sega CD and my new 32X! That \$150 peripheral cost me \$450 worth of damages!

Andy Michelson  
Glen Ellyn, IL

(Ed: We've heard weirder! Read on!)

Last night I went to turn on my Super NES to play my new game, Super Metroid. When I turned on the television there must have been a power surge because my TV blew up and my copy of Super Metroid melted all over my Super NES! Not only that, but there were burn marks in the rug where the cables for my Super NES had been! Is this supposed to happen? I heard Super Metroid was a good game—how does it end? Mine is melted.

Peter J. Harrison  
Atlanta, GA

(Ed: No, Peter, your Super NES is not supposed to blow up when you play Super Metroid. Our advice is have your house's electrical system inspected by a reputable electrician! Out of curiosity was there an electrical storm outside while you were playing? If so, your house may've been struck by lightning!)

## SEQUELS AND MORE...

I was looking through the section of EGM with all of the new and used games for sale and I noticed a couple of strange things. I noticed an ad for a company called Tommo Inc. which sold new Japanese games. There was a row of Japanese games including some that you guys reviewed (Beauty and the Beast, Legend of

As far as we can tell, there will be no rating for Super Street Fighter II Turbo for 3DO.

the Mystical Ninja 2). Then something caught my eye. I saw the cover art for the game Secret of Mana with some Japanese writing on it. Below the writing I saw a "2." Does this mean that there is going to be a sequel for one of my favorite games? I also saw an ad for the 3DO version of Super Street Fighter II Turbo except it didn't have the traditional typeface and it had an MA-13 rating on it! I'm confused!

Evan Nicoll-Johnson  
Modesto, CA

(Ed: As far as we know, Super Street Fighter II Turbo for the 3DO does not have an MA-13 rating. This is based on the fact that we have the box for it in the office and it has no rating on it. It would surprise us if they were to slap a rating like that on this game. As for a sequel to Secret of Mana, Square of Japan is working on releasing it sometime in '95. Hopefully it will make it to America, as the first was very popular.)

Fans of Secret of Mana may be rewarded with a sequel in 1995. Keep your fingers crossed!

## GAME OF THE MONTH

Neo-Geo SNK

### Samurai Shodown II

Fighting	Release: Now
Levels: N/A	202 Megs

### ED SEMRAD

The first Shodown impressed me with its graphics and game play. The sequel improves on every aspect adding features that surpass all the other fighting games. The visuals and moves are spectacular. The game has incredible combos, new types of trapping and enough technique to put a camel. There are a lot of galore too! Samurai Shodown II is simply the best fighting game out there. This is the fighting game to buy.

### AL MANUEL

Not only have my expectations for Samurai Shodown II been met, but they have also been surpassed. SNK has taken their best game to a whole new level. SS2 is loaded with new features (new lighter, heavier, and rules), stunning backgrounds for every character, a variety of all the game play options! With the new moves, there are tons of new ways to attack. SS2 is a diamond in the rough for fighting games.

### DANYON CARPENTER

Samurai Shodown II has so many improvements over SS1 that this version is my v. 1. The four new characters are cool and each one has been designed up with all sorts of new moves and techniques. It's definitely a brand new game! This game is still perfect and the most possible life is at an all time high. Do yourself a favor and plunk a few quarters into this one. You will be hooked.

### SUSHI-X

I enjoyed the playability of the first one and this new version has several new attributes that enhance the consistent game play. With all the new moves and characters, this game is just what I need. It's a full revision of the old game with new characters are a definite improvement especially the added character. Anyway you slice it SS2 is a superb fighting game with great innovations and action.

## KILLER INSTINCT

Killer Instinct is one of the hottest new arcade fighting games around. Killer Instinct offers 10 different characters to choose from, including the fiery Cinder and the reptilian Riptor. This game offers three different intensities of both punches and kicks, which can lead to three-, five- and even 10-hit combos. Here are just some of the awesome moves that you can do. From Chief Thunder's Tomahawk Throw to Fulgore's Fierce Uppercut, I'm sure you will be adequately pleased with your move selection. Don't get behind in the times. You wanted more tips for Samurai Shodown II and we've got 'em. Be the envy of all your friends with these awesome new moves. Try out these characters' Doll Moves to transform into a miniature doll version of yourself. Then terrify your opponents by using your characters' Fatality Move. These moves will temporarily break your opponent's sword in two and can only be performed when your Rage Gauge is maxed out. Strike quickly before it returns to normal. Be the first to use these against others in the arcades.

*Note. These moves are with each character facing right. The moves are opposite for the character facing left.*

## MAJOR MIKE'S GAME ROUNDUP

### Rise of the Robots Acclaim/Super NES

Rise of the Robots suffers from poor control and few special moves. The graphics are very good, but the lack of variety hampers the overall effect. Cool-looking fighters and a good idea, but it just doesn't work.

Super NES	Capcom
X-Men	
Action	Release: Now
Levels: N/A	16 Meg

For once, a game has done justice to one of my favorite comics. First things first: the game play is absolutely outstanding. Sure, there are a few filler moves, but they are cool. The Final Fight mode requires skill and timing. The graphics are good, but not great, and the music is so-so. However, X-Men is fun to play, and that's what really counts. X-Men is a decent side-scroller.

This is definitely the funnest video game version of X-Men that I've played. The characters are large and well defined. The addition of Street Fighter-style controller movements and one of the special attacks is a great idea. The levels are good, but there's no shortage of things to get up. The difficulty is a bit on the side, so you probably won't beat this one for a while. It's not a basic walk-and-punch, which is good.

This is one of the more decent games to bear the name, X-Men. You get to play the five most popular X-Men, each with their respective powers. They're all cool, but I think they could have used more moves and special abilities to add a little variety. The graphics are okay, but you can tell there was room for improvement. The music and sound are also good. This would make a nice purchase for X-Men fans.

An excellent X-Men adventure and easily the best so far! This is not just another Final Fight game. Each character has a lot of moves involving various techniques like fireball or dragon punch motions. The characters and backgrounds are very colorful, and the control is as good as gold. There are lots of secrets and rewards to keep you hunting in this action-packed cart. Whether or not you're a fan of the X-Men, it is a great game.

Super NES	JVC
Indiana Jones	
Adventure	Release: Now
Levels: N/A	16 Meg

Indiana Jones uses the same engine as JVC's Star Wars game. The audio is fairly weak, but the fanfare and tunes are somewhat appropriate. This one is fun. I would suggest all the way to the last slide part of the game. Back from the side-scrolling levels, you can find Mode 7 graphics and flying sequences. This one is challenging. If you have the perseverance, you can make it through.

Indiana Jones came as quite a surprise. At first glance, the graphics will draw you in with incredible detail, especially in the Indiana Jones displays. But play it and a few problems crop up. The sheer amount of instant hits you see just how aerodynamic your controller is as you hit across the room. Other than that, playing in all three movies in the game is pretty cool.

As a fan of the movie series, I was very disappointed with Indiana Jones. It's one thing for a game to be challenging, but it's a whole other thing if a game is riddled with (optional) mandatory hits! The sound game play didn't help matters either. On the upside, the graphics are okay, especially in the more digitized scenes. The Mode 7 effects of the mine cart and plane scenes are very cool.

There is a lot of technique in the game, and it is purposefully challenging. The downside is that you have to memorize and remember patterns to get past some parts. Overall, it's fun to play and is made to give you your money's worth. The graphics are good, but it's the game's play that really makes it interesting to play. It will take a bit of getting used to, as well as a bit of patience, but Indy never went running off either.

Super NES	Ocean
Jurassic Park 2	
Act./Sht.	Release: Now
Levels: N/A	16 Meg

Jurassic Park 2 reminds me of a combination of Alien 3 and Contra. The action is nonstop and the audio and graphics are superbly good, especially the intro. The score gets a bit repetitive, but the missions are all pretty cool. The Two-player Mode is really nice. At first, it seems like there are a lot of variants, but, once you know the play mechanics, you'll go far. Overall, I highly recommend this one.

It's good, but certainly not what I wanted. JP2 has been relegated to the role of a basic run-and-shoot game, which this may appeal to some. It certainly won't bode well with fans of the original adventure-type game like myself. Another major gripe is the fact after you kill an enemy and leave the screen, you're back again when you return. On the good side, the music is great and the number of weapons is a plus.

Hey! Pretty cool opening cinema. It's too bad I didn't care much for the rest of the game. Jurassic Park 2 needs a little boost in excitement. Although this game hardly offers any, the colors are dull and drab, and the music may lull you to sleep. Although there are many missions in complete, they all lack variety and seem to be the same thing. The play control is okay, but needs a little work. Just slightly above average.

This is a decent side-scrolling game, but after falling for the adventure version, I don't have the same passion for an action game, it doesn't have tons of weapons and things to destroy. However, it doesn't really excel over other games in this category. The graphics are about average. The missions and interface are pretty cool. Fans of the movie will dig it, but overall, it's only above average.

### Wolverine

Action	Release: Now
Levels: N/A	16 Meg

Wolverine was a big disappointment. The graphics were on y average, and the sheer number of instant hit bosses was one frustrating at best. Being killed by the little girl without a chance of avoiding her was a little worse. Wolverine controls very poorly and the animation was very simple... just didn't enjoy this game at all. Even if you are an X-Men fanatic, pass this cartridge up. It is not worth playing.

Wolverine comes off decent in this latest adventure. First off, in this game is pretty damn tough, especially with the amount of instant hits. There's a plenty challenge here. The game was very intricate, required you go through various power-ups a few times. Wolverine has a lot of moves at his disposal, and the only real problem is that the control gets very quirky, especially when trying to move around on stairways.

First and foremost, what happened to the control? Wolverine is in serious need of a good dose of play control. The apparent lack of I can control my own skill, patience and the strength of your controller. I found that mine wasn't so durable. It was the graphics are fine, but the music is the music track. The poor play control just totally overwhelms the positive aspects of the game. A poor game for a great superhero.

For those of you looking for a challenge, here it is. This is one tough game that would give the real Wolverine a run for his time. The enemies fight with superior AI and the levels are very big and complex. Graphically it looks really good, and Wolverine has some good moves. However, the control can be a real problem at times. I would recommend this to Wolverine fans but others might get frustrated with it.

Genesis Sunsoft

### Aero The Acro-Bat 2

Action	Release: Now
Levels: N/A	16 Meg

Aero 2 is a good action game for the Genesis. It looks good and plays well. It may lack the variety that Zero the Hero and Squirrel has, but it's still very decent. The game has been tweaked somewhat from the original game. The plot is easy to listen to and fairly average. If you've been looking for an action title on the Genesis, you might want to try checking out Aero 2. I enjoyed this one.

The Aero series has a ways been good, and this latest endeavor kept up that tradition. The game has lots of colorful backgrounds of secret areas and hidden normaly stumble into the rest of all. The levels are extremely long with tons of small areas to explore. The Extor boss's game is nifty but can get downright brutal as you progress. The control is great, the music is decent and the game is just plain fun to play!

Like the first game, I also like the second installment in the series. Aero The Acro-Bat 2 is one of the coolest video game characters to come along in a while and his new techniques make him an already great game. The graphics are excellent and the sound is decent. Probably the best part is just going through the huge levels and just looking for hidden areas. This is a solid game to continue the saga.

never really got into the first one, and might go back and check it out a bit more. I liked Aero a bit more the second time around. The double technique started to work on me and the levels were fun to play. There are many secret areas with extra parts to explore. The graphics are good and the control is very responsive. Packed with fun game play and cute adversaries, this is a definite must-try.

32X Sega

### Star Wars Arcade

Simulation	Release: Now
Levels: N/A	N/A Meg

When I first played this game, I was wowed by how smoothly the polygons scaled in and out. The game is simple to control vertically and horizontally, but when trying to go left or right, the difficulty is way up there. Don't even think of playing this one alone. The audio is good except for Ackbar's yells, which doesn't sound like the character at all. It's a good game, but I'd like to see what else is on the 32X first.

As a Star Wars fan, I was depressed to see now this one turned out. On one hand, the movement of the ship is smooth and pretty cool, but the extremely limited view where you can fly, you can't perform 360 degree loops to avoid enemy fire. After the game is just plain mediocre. I'll give the game credit for being the first one out for the 32X, but as it stands Star Wars Arcade doesn't live up to my high expectations.

Star Wars for the 32X is nearly identical to the arcade original—a big plus! There's a special 32X version that adds a mode—another big plus. So what am I giving this a six? Because more could have been done with the game. I really would have liked to see 360 degree loops and barrel rolls. I still really like the word where you can fly anywhere. Nonetheless, it's not a bad space fight game.

Being a big fan of the movies and action games, I was expecting a little bit more. The scrolling is really good, but the missions just got too repetitive. Adding the Two Player Simultaneous Mode is a great addition, but there wasn't enough to do—just shoot TIE Fighters over and over. The graphics are good, but could have used a bit more texture mapping. Star Wars fans may get into it, but I don't enjoy flight sims.

Sega CD	Virgin
<b>Heart of the Alien</b>	
Adventure	Release: Now
Levels: N/A	CD-ROM

If you thought *Out of This World* ended in a strange way, here's the rest of the story. *Heart of the Alien* continues the *Out of This World* and is a sequel to the *Alien*, now set in a different world quite as well as the original. The cinematics are the best ever, but the game itself really needs help. If you've played that, it looks really good (although the color limitations really hurt it) and sounds nice too.

I've been waiting for this one and I'm happy to say it's fantastic! The cinematics, animation and music are perfect. It's cool to see that the roles are reversed and now you're the way as the alien. The controls are a little sluggish in some areas, but in this case it doesn't matter. The game play one bit better. The *Alien* isn't overly complicated, but it won't be beaten very quickly. A Sega CD must buy.

*Heart of the Alien* continues the classic, sci-fi fantasy adventure with all-new realms to explore. I know that's a cliché, but I make the game. But the ones in this game are really cool! Even though the graphics are mostly composed of polygons, you overlook it because the game is put together well. From the story, to the music to the game play and to the various puzzle-like scenes. Chak this up for one to buy.

It's pretty much the same as the computer version, but that's not a bad thing. The graphics are indicative of the Sega, and they aren't the best. Where the game excels is in the game play and the puzzle-like quality of getting past the enemies. There is also a lot of story, involving jumping and fighting. The overall appeal is it is able to solve the situations and watch the story unfold. A great sequel to *OOTW*.

3DO	Panasonic
<b>Super Street Fighter II Turbo</b>	
Fighting	Release: Now
Levels: N/A	CD-ROM

*Super Street Fighter II Turbo* is surprisingly very good on the 3DO. The controls are near perfect with the arcade version. Very easily pulled off. The graphics are just like the arcade. The music is top-notch. The boss time is bearable. The *SSF2* concept is a new fact that it is on the 3DO system alone makes it stand out. If you've been wanting a decent fighting game on the 3DO, here it is. Nice job.

The long-awaited *SSF2 Turbo* finally comes to the home market—on the 3DO no less. Well, all the characters, special moves, sounds, stages and Akuma are here, making this the best home version of *SSF2* I've ever. The control was a little worse, but I'm glad to say that the game controls just like the every special move is quite easy to perform. And yes, you can even play as Akuma!

Well, whaddya know—a REAL game for the 3DO! If there's ever a game worth buying a system for, *Super Street Fighter II Turbo* definitely is. The stand-out aspect of the game is that it played surprisingly well, even with the regular 3DO controller. I had no problem picking up all the special moves. Heck, I could even jump forward! *SSF2* is a near-perfect translation that's a must-buy for 3DO owners!

Don't be skeptical. This is definitely a great rendition of the latest *SF* game. The current 3DO controller makes it hard to play, but if you use the Sega Saturn adapter, it plays great. The graphics and sounds are excellent reproductions of the arcade and it even goes as far as to include Akuma! If you haven't been gotten your fill of *SF* or you need the newest version, this is easily just as good as any console rendition.

Jaguar	Atari
<b>Doom</b>	
Shooter	Release: Now
Levels: 24	4 Meg

*Doom* for the Jaguar has its ups and downs. While it may look very good, many elements that computer games enjoy were removed. The game has been done away with along with a few of the Bosses. Who can understand the music, why the enemies? Several levels are gone and the controls are a little loose. If you love *Doom* and have no other way to play it, I guess you'll like it, but think it's lacking.

Although *Doom* is a good visual representation on of the incredible PC game, there are some notable losses that makes the fun factor. Most notably, some of the levels have been added. Also, the music is missing, although it was never anything exciting anyway. The controls are decent, but it does take some time to get used to the slippery control. Otherwise, it's a decent game and one of the better ones to come out for the Jaguar.

*Doom* for the Jaguar is an okay game. Visually, it has the best graphics for any system outside the PC realm. However, the new levels added to the game, some were sacrificed for the new ones. That adds to the good points. On the down side, the background music was taken out. Also, there are no on-screen enemies when you play a two-player game. It's still a good game for the Jaguar.

The computer version is an excellent game and this one retains many of the same aspects. All the weapons and items are faithfully reproduced. There are several drawbacks, though. First off, the sounds just aren't there, and there is no Save Game Feature to let you play through and test situations. Overall, it is a good reproduction, but after playing the computer version so much, I don't compare.

## MAJOR MIKE'S GAME ROUNDUP

### Dragon

Atari/Jaguar

More or less your run-of-the-mill action fighter game that follows the movie. There are plenty of moves to learn, and the graphics are so-so. The only problem is with the movie released a while ago, it feels like too little too late.

4 4 4 4 6  
 BB MM AL DM NM

### Babys 2

Accolade/Game Boy

The talking bobcat takes his show to the Game Boy platform and does pretty well. It's the usual jump-on-the-enemies-and-get-through-the-levels routine. Even if you never played him before, this is a good introduction.

6 6 5 5 7  
 BB MM AL DM NM

### Tarzan

Samuel/Came Boy

Tarzan has gigantic levels, but the game itself is a little on the difficult side. The many icons and challenging Bosses make the trip worthwhile, but this is pretty much standard stuff with elements every action fan will recognize.

5 6 5 5 6  
 BB MM AL DM NM

### Prehistoric Man

Titus/Game Boy

This game is like Joe & Mac: walk around with a club and hit enemies over the head while collecting a plethora of items. The whole game becomes monotonous as it gets tired somewhat quickly.

7 6 5 5 6  
 BB MM AL DM NM

### X-Men II

Saga/Game Gear

There are some unique options this time around, including the ability to pick from more X-Men as the game progresses. The graphics are very good, and the moves are easy enough to execute. A good sequel.

## Space Invaders

Shooter Release: Now

Levels: N/A N/A Meg

This is what the Game Boy was made for! Space Invaders is a great game for bringing back memories. If you have a Super Game Boy, you can play the arcade days on full screen! While the game doesn't change all that much, the course of the game levels players can see what we were going back in the days of yesteryear. No matter what system you play it on, Space Invaders is fun.

For those who are into nostalgic video games, you can't beat Space Invaders. It looks, sounds and plays just like the old arcade stand-up, but there are many new options that allow you to make the game more modern. But why now? This game really should have been released when the Game Boy was first out. Now it seems dated even with the upgrades. If you've always wanted Space Invaders, it's here.

You've got to be kidding me! I can't believe this even came out! But then again, it's one of the few arcade games the Game Boy can actually run. If you're a Nostalgia aside, about the only other thing that's appealing about Space Invaders is that it's on the Super Game Boy. At least, you get to play it. Other than that, there really is nothing left. There's no challenge, and it's just a pain game.

Well, let's face it. This game is just too old to compete with the current standards. Sure it's nostalgic, but as a game itself, it doesn't have the jump excitly to entertain you. The production is, of course, iffy, but there isn't enough to make the game. This cart does have some value to the older player who actually got into it, but for most it won't have enough to stand up in the fast paced video game market.

Game Boy Sunsoft

## The Marvin Missions

Action Release: Now

Levels: N/A 2 Meg

Duck Dodgers is an okay Game Boy title. The control is surprisingly good, but the enemies are hard to see, and the game is difficult to do. With the Super Game Boy, these problems aren't resolved. The sound is also less than ideal. If you have the time and patience, you can get pretty far. I found too many areas where I would have no choice but to get hit. Overall, I think Duck Dodgers is only average. Try it before you buy.

The Marvin Missions just doesn't offer any excitement here. The game doesn't pose much of a challenge. There are many pitfalls you can get into. The Bosses are extremely easy to kill, and the easy-to-follow patterns make them a snap to defeat. In color, the game does look better, but color is not its saving grace. Maybe it's a good one for the kids but even then I don't think so.

Uh... NO! Daffy Duck didn't cut it for me for the Super NES, and I'm afraid I feel the same for the Game Boy. The game play has now been reduced to just shoot and jump over the base, temporarily forgetting your jetpack. Some jumps were too difficult to do. The graphics are not and boring, and the Super Game Boy didn't improve the colors much. The background music got to be pretty annoying. 11 pass.

The 16-Bit Daffy game was fun because of the color and wacky Daffy antics. These unfortunately are absent in the Game Boy version. The Bosses and levels are repetitive to the point that you do all some things over to the game. Overall, it still has some interesting and doesn't possess enough diversity to keep you playing. As a portable it is decent, but it wouldn't be your primary choice on a long trip.

Game Gear Sega

## Ecco 2: The Tides of Time

Action Release: Now

Levels: N/A 4 Meg

Ecco appears to be a decent game for the Game Gear. The graphics, an mat on and most certainly the sounds are very impressive. However, the quest left me hanging as to exactly what I was supposed to do. The control of Ecco in Tides of Time doesn't make the overall quality of the game seem significantly. Judging this game is a bit difficult. I didn't really care for it, but Ecco fans might.

This portable Ecco game holds somewhat true to the original 16-Bit game. All of the characters you've come to know from the first game are in here, and there are a few additional features to keep the sequel fresh. The colors are intense, and the animations are smooth. However, I thought the game play would have been a bit more upbeat. An overall decent pay for people who loved the first Ecco game!

Although this is a portable game, Ecco 2 still holds its own as a 16-Bit translation. Obviously, this can't be a perfect translation because of the Game Gear's limitations. Since no changes in some of the levels are made to give the player a fresh look. Pretty cool, though, as the original 16-Bit. The animations are impressive, but the control wasn't bad, even though it took some time to get used to.

This does a good job of retaining the appeal of the 16-Bit version by using a lot of colorful backgrounds. The Game Gear version may use a few new techniques, but overall it's the same game, smooth look that attracts a crowd. Fans of the first game will like it for all the same reasons, but may not think there is a lot to it. However, I liked the original and didn't want them to change a good thing. As a portable it's fun to carry with you.

So put on your power-ups, get rid of the Superevols and welcome to the one place you'll see Sega and Nintendo in the same sentence! We're dishing up the over-the-counter gossip here. . . The Q-Mann has the right prescription to start you out, beginning with confirmation that NBA Jam Tournament Edition has been fully coded and submitted to Nintendo and Sega for approval. Acclaim is readying their big marketing machine to slam dunk the game onto store shelves with ads planned to line the airwaves and stretch under every rock around. . . Out of the Nintendo camp, the Q is hearing that the Big N is resting on its Donkey Kong glory for too long, with plans already under way to upgrade Diddy Kong from sidekick to gaming superstar with another ACM Silicon Graphics gaming miracle that might even push the 40-Meg barrier. Put it on your list now kiddies, as the Q-Mann hears that Diddy will strike hard next November in a store near you...

...While we're on the subject of DK, Sigeru Miyamoto, the man behind Donkey Kong Country and the Mario Brothers games, is coming to the United States to work on Pilotwings 2 with Paradime Simulations. They used to be a defense contractor, making aircraft simulators, and they're now packing some high-tech flight simulation tools that Nintendo and Sigeru intend on utilizing for the newest Pilotwings (did the Q hear someone mention aerial dogfights?). . . In other rumors dawning from the Land of the Rising Sun, Virtua Bomb, er, I mean Virtua Boy, that new techno-cheap, two-colored unit that doubles as a headrest left the Quatermann looking for his Intelivision. The unit will ring in at around \$200 next April with three titles, including the original Mario Brothers title, Space Pinball and Telero-Boxer, a boxing game. No major licensees have signed on to make games for the portable and they don't have any plans to. Yours truly hears the word on the street in Tokyo is that the Virtua Boy will blow up real good when it comes to market...

...In other news from the Godzillas of gaming, it turns out that Capcom's main man Joe Morici or Sega's main man Tom Kalinske may be trading in their Blasters for Mouse ears. The industry is buzzing over talk that one of these wonder white shirts will be taking over the reigns of the vacant president's chair at Disney. . . Time to tune into the continuing Sega Saturn saga. This month's chapter has Sega spinning so fast they're almost invisible, with rumors flying that the company intends on trying to make the 32X compatible with the Saturn. We'll know for certain when the Saturn is released in April. The Q got the inside scoop from a source close to the development that the U.S. release will be decided upon based on the number of titles available for release. . . Staying in Sonic's court, Sonic Chaotic, the working title for Sega's 32X Sonic game, has been in the works for over a year and now has a tentative release date of June of this year! The soft brings Sonic, Knuckles, Tails and Red Sonic together in a title that the Q hears Sega is trying to make strong on play. Sonic Chaotic will be programmed on Silicon Graphics workstations and be the premiere title to use a new technology that the big 'S' is hoping will knock out Diddy Kong next year. . . Also new for the 32X, Sega programmers have told the Q that a new version of Tomcat Alley is under development that will take gamers to new heights and will utilize all of the 250,000-polygons-per-second rendering powers of the 32X in tandem with the Genesis and Sega CD...

...As I told you in an earlier edition of Q News, the Neptune, Sega's name for their 32X stand-alone configuration, will hit next Christmas for \$149.99 and will be packaged with Sonic Chaotic and/or Tomcat Alley. . . Sega's new 16-Bit portable, to be called Venus, is coming into sharper focus. The unit will play Game Gear and 16-Bit Genesis cartridges and will cost \$179.99; it's basically a Mega Jet with a screen of Turbo Express quality and resolution. The system specs are in hand and if it can withstand the steep price and cluttered shelves, then the Q predicts well-deserved success for this long-overdue dream machine. . . Mortal Kombat III will have a new look with 12 new characters and four old ones! Each character will come equipped with 10 moves rather than the four of their predecessors. Hitting arcades in March, only Sonio, Kano and Liu Kang are now known by the Q to be returning. We are also hearing that Liu Kang's cousin may have to appear in Liu Kang's place, because legal problems may keep Liu Kang out of the game. Johnny Cage will not be in Mortal Kombat III, his character has been taken out of the sequel completely. . . The countdown continues until the next generation of EGM hits in just 30 days. Till we show down again on the greatest gaming gossip in the business, I remain the professional guru of gaming gossip—not a used cartridge salesman—with the news that some hate, many love, but only I get to do...

## NINTENDO AND PARADIGM TEAM UP TO MAKE ULTRA 64 FLIGHT SIMULATION

Nintendo of America recently announced that they have reached an exclusive development contract with Dallas-based Paradigm Simulation, Inc., to create a three-dimensional game using Paradigm's real-time software technology for the Nintendo Ultra 64, the 64-Bit home gaming system being developed in conjunction with Silicon Graphics.

Under the agreement, Paradigm will work directly with a creative team headed up by Shigeru Miyamoto, creator of Nintendo's smash hits, Donkey Kong Country and the Super Mario Brothers series.

Through their combined efforts, the team plans to release the yet-untitled game in late 1995.

"We're honored to be working with Mr. Miyamoto's team, true geniuses in the world of home entertainment," said Don Toupl, president of Paradigm Simulation, Inc. "Paradigm Simulation will provide Mr. Miyamoto and his Nintendo development team with the best technical knowledge in the 3-D virtual reality industry. Together we'll develop a game that will bring technology, that was previously only available on high-end work stations, right into the

Fresh off of the Donkey Kong Country project, Shigeru Miyamoto, the creator of both DKC and the Mario Brothers series, is coming to the USA to pilot an Ultra 64 game with Paradigm Simulation, Inc., of Dallas.

homes of consumers."

Founded in 1990, Paradigm Simulation, Inc., is a world leader in visual and audio simulation plus virtual reality software for use on Silicon Graphics computers.

Vega, Vision Works and AudioWorks (Paradigm Simulation's flagship products) are recognized as the premier software for development of real-time simulation and virtual reality applications. Paradigm Simulation also offers custom development of databases and applications, as well as training and consulting in the real-time simulation, virtual reality and entertainment fields.

"Paradigm Simulation has a long-standing relationship with Silicon Graphics and brings many years of experience in visual and audio simulation to this relationship with Nintendo," said Howard Lincoln, chairman of Nintendo of America. "They are recognized worldwide as a leader in 3-D virtual reality software and consequently will be developing a game to maximize the capabilities of the Nintendo Ultra 64 system. They will work well as a team."

## NINTENDO ACQUIRES WORLDWIDE RIGHTS TO VIRTUAL DISPLAY TECHNOLOGY TO BE USED IN NEW VIRTUAL BOY 3-D SYSTEM FOR THE HOME

In other Nintendo news, the company has acquired a minority interest in Reflection Technology, Inc., of Waltham, MA, a private company.

The agreement is a milestone for Nintendo, because it is the first time that the video game leader has taken equity in a U.S.-based company.

Nintendo has also obtained worldwide licensing rights within the video game market for Reflection's patented virtual display technology. The technol-

ogy will be used in Nintendo's 32-Bit RISC-based virtual reality system that will be introduced in Japan and to the world in April of 1995.

Reflection was founded in 1987 by a team of scientists from MIT with the aim to produce a breakthrough in LED (light emitting diode) technology. The resulting designs carry multiple worldwide patents and have been extensively tested and can be manufactured for the mass market. Reflection's virtual displays are

miniature in scale, but appear full-size when held near the eye. By combining two of these LED displays together in one processing unit, the stereoscopic Virtual Boy produces 3-D graphics previously only available in advanced simulations systems that cost thousands of dollars.

"We are very excited to be working with the worldwide video game industry leader," commented Al Becker of Reflection Technology, Inc.

# "ACME ANIMATION FACTORY" TURNS CARTOON WORLD ON ITS EAR!

by **Howmuchdoes A. Hemmingway**

Is it the most massive mix-up in Looney Tunes history? Or have a million masters of animation suddenly surfaced? The answer can be found in new **Looney Tunes Acme Animation Factory**. It lets anyone create their own Looney Tunes cartoon adventures!

Sources at Sunsoft, makers of the **Acme Animation Factory** game for Super NES, confirm that new Looney Tunes cartoon animators are suddenly springing up from coast to coast. This development has fueled speculation that **Acme Animation Factory** is more than an ordinary video game. It appears to be something so new and different, it's unlike anything ever seen.

In an exclusive, undercover investigation, this reporter has learned that **Acme Animation Factory** gives you the tools to design, paint and animate like a professional

So you can create Looney Tunes cartoon adventures on your Super NES — and save them to watch at any time. You'll choose from a full menu of scenes and characters, or even draw your own. Plus, you can color your creation any way you want, then add titles and create music! It even gives you the choice of using a controller or the Nintendo mouse.

Looney Tunes spokesperson, Bugs Bunny refused to comment at this time. However, Taz did

## EARTHWORM JIM COMMERCIAL BECOMING A REAL MOUTHFUL

It seems as though the worm-eating grandmother who stars in the Earthworm Jim video game commercial has caused a few people to put their forks down and walk away from the dinner table in disgust.

After the numerous complaints the networks who aired the commercial received, it has been pulled in some markets, including stations in Portland, OR, Spokane, WA and Sacramento, CA.

The commercial features a grandmother telling a "bedtime story" to her grandchildren featuring Earthworm Jim.

As the story goes on, the grandmother gets more and more excited, resulting in her stuffing her mouth with live earthworms.

The commercial is intended to accentuate the off-the-wall humor that is present in the Earthworm Jim game.

The commercial is neither

However, the worms were plastic. David Perry, president of Shiny Entertainment, doesn't really under

stand what the big deal with the worms is all about.

"With all of the sex, violence and other rubbish on television, Earthworm Jim doesn't have any excessive violence or nudity," said Perry, Earthworm Jim creator.

excessively violent nor is of an adult nature. The game portrays an earthworm who suddenly finds himself a superhero—a real ananelid with an attitude. Many viewers complained that the

worm-eating grandma commercial was just too gross.

# GOING BANANAS OVER DONKEY KONG AS IT'S LAUNCHED WORLDWIDE

Donkey Kong Country fever has begun to take over the retail jungle and Nintendo's guttural screams of joy can be heard pulsating across North America.

More than 2 million units of the game were shipped out to their retail locations across North America and are selling fast.

Over 2,200,015 minutes of the "Making of Donkey Kong Country" videotapes were sent out, and Nintendo spent a bundle to launch their 32-Bit monster.

Nintendo and Post cereals have teamed up. It seems that Donkey Kong's favorite food, bananas and breakfast cereal, make a nice combination.

Nintendo of America and Kellogg's USA have teamed up to create a mega-brand advertising a promotional campaign featuring Donkey Kong Country.

The Nintendo and Kellogg's alliance will showcase DKC and will feature character art displayed on the front and back of 150 million Kellogg's cereal packages running until April 1995.

The Kong giveaway will include more than 10,000 prize worth \$600,000. The promotion will be featured on Kellogg's Frosted Flakes, Frosted Mini-Wheats, Apple Jacks, Corn Pops, Corn Flakes, Raisin Bran, Cocoa Krispies Treats and Cinnamon.

The Kellogg's DKC promotion will feature prizes like 250 27-inch Zenith color televisions, 1,000 Super NES control sets and 1,000 Donkey Kong Country game packs.

"Nintendo is excited to be working with Kellogg's again," said Mark

## DKC LAUNCHED GLOBALLY

Donkey Kong Country was launched in Canada at the same time it was in the United States.

The DKC launch-party in Canada was held in Toronto at Wayne Gretzky's, the NHL superstars new bar. Folks from Silicon Graphics and Alias were on hand to help launch the big ape.

Westcott, Nintendo's marketing promotion manager. "This mega event unites the world's leading video game company with the world's leading cereal company."

## XBAND CATAPULT MODEM PUT TO THE ULTIMATE TEST

This was only a test of one of the coolest gaming peripherals to come along in a while.

This device will allow you to hook up via modem and play gamers around the country to see who really is the big dog when it comes to NBA Jam or Mortal Kombat

I hooked up and tested the system recently and discovered that the user interface is easy to use and the features of the system are very cool

All you do is take the modem out of the package, place the modem in the cartridge port of your Genesis or CDX and

connect a phone line into the port on the side of the modem and plug one of the six games that the system is

currently running into the top of the modem

You can play NBA Jam, Mortal Kombat, Mortal

Kombat II, John Madden '94, John Madden '95 and NHL '94. Soon you will also be able to play NHL Hockey '95. The folks at Catapult are working on getting World Series Baseball up and running on the network as well.

The Genesis version of the Catapult modem will also work on 32X games in the near future.

Once you choose your

game and make sure the switch is down on the side of the modem, choose your player icon and you are ready to log on and play.

Go to the Challenge Mode in the Options Screen and you're ready to challenge someone who has the same game plugged in as you do. I played NBA Jam against Mad Dog and Metallico. I

had a great time and using the system was easy. There was a little slowdown,

but not too much and we played against each other in real time. My controller movements were instantaneous with my player's movements on the screen. Gamers who enjoy good competition at a reasonable price will go for the Xband modem. You must buy the modem, then for \$7.95 you get 32 units. Each game you play will cost you one unit, and extra units cost 15 cents each. It's very reasonably priced

## VIRTUAL REALITY GLASSES TO INTERFACE WITH SEGA CHANNEL

RPI Advanced technology group announced that their HMS-EYE unit will also resource 3-D stereo programming slated to be produced by the telecommunications giants including the Sega Channel.

The glasses will be delivered to retail at a price significantly lower than any competing unit that has the same features.

Sources are suggesting that the glasses will run between \$250 and \$300.

The RPI device will not only take advantage of the 10 million TCI customers, but they will

also be going after the Viacom, FOX, NBC and other network users. The virtual reality glasses will also interface with the Sega Channel. Gamers will get a true 3-D experience when wearing the four-ounce glasses to play their favorite video games on the channel.

RPI has different types of head mounted displays. They have done many market surveys and have found that the glasses approach is more acceptable to consumers than a helmet VR unit.

## DATA EAST AND CAPCOM SETTLE THEIR DISPUTES

The court battle is over—Capcom and Data East have left the courtroom.

Capcom signed a stipulation dismissing with prejudice its Street Fighter II copyright, trademark and trade infringement action against Data East's Fighter's History video game. This dismissal came after Data East had twice obtained partial summary judgements against Capcom and after Capcom's motion for reconsideration was denied. Each of the parties agreed to pay their own legal costs.

Data East believes that the outcome is significant, not only for Data East but for the entire video game industry. Tetsuo Fukuda, the CEO of Data East said, "If Capcom's claims had been granted, it might have obtained a monopoly over an entire genre of video games, and over a popular art which is in the public domain and is the lifeblood of gaming."

Data East created the one-on-one fighting game genre in the 1980s with Karate Champ and they will continue to make fighting games that utilize new technologies.

# MASTERS OF THE MAZE—AN INTERACTIVE GAME PLAYED ON TELEVISION

For the first time, gamers can actually be inside a video game!

A new television show called *Masters of the Maze* incorporates video game technology with a TV game show format.

The game challenges participants and gives them an experience unlike anything they've ever experienced before.

In the first round of *Masters of the Maze*, three teams of gamers are faced with a display screen and asked to identify a pixilated image as quickly as they can.

Whoever identifies the image first is asked a related educational question. One member of the top two teams is

lowest total running time. The Hologram Maze Keeper gives informa-

caught up in the maze of 'glop' and gunk in television programming for kids.

Image Design has answered the call as they embark on this interactive television project. It now airs on The Family Channel.

"The show is designed to allow viewers at home to get inside the video game," says Richard Kline, *Masters of the Maze* co-executive producer.

"That is what it is designed to do, and we think that is exactly what it does. The kids seem to love it, and they definitely love the maze. Parents seem to like it too. They watch and enjoy getting involved in the

tion, insight and other clues to the runner, who must face the Mirror Man and meet his challenges to move to the next phase of the game.

At the Chamber of Knowledge, the runner must answer a question posed by each of the three guardians. Once through the chamber, the runner arrives at prize mountain and the final Total Running Time is monitored against the other teams and prizes are awarded.

Image Design and Marketing, creators of the Nintendo Power Glove for the 8-Bit Nintendo Entertainment System and special effects experts for movies like *RoboCop 2*, wanted to create an interactive television experience for kids and they developed the *Masters of the Maze* concept, a new innovation in television for kids.

Nowadays it doesn't take much to get

play during the first part of the game. We've been asked, 'Can this really truly be interactive for the kids at home?' The answer is a resounding yes!

The program is hosted by JD Roth who is the former host of *Fun House*. *Masters of the Maze* airs regularly weekdays at 5:30 p.m., Saturday at 10:30 a.m. and Sunday at 11 a.m. on The Family

Channel.

The show appeals to video game enthusiasts who enjoy role-playing and strategy gamers who enjoy the challenge of solving intricate puzzles.

then fitted with a helmet (and an attached powercam) and a futuristic power suit studded with high-intensity sensors. After putting on the gear, the two are sent to the maze. # GO AIRBORNE WITH MAGIC EDGE AND TAKE THE RIDE OF YOUR LIFE

Settle back into the Hornet-1 cockpit and crank down your flight harness. Verify your instruments, adjust your headset and check your throttle. Don't get too comfortable, because once the canopy closes, you'll find yourself in the middle of an interactive flight simulation experience surrounded by bogeys who want to blow you to bits.

The squadron commander has cleared you for take off, so take a deep breath and put the throttle to the firewall. You can actually feel the thunder of fighter jets passing overhead.

In the first quarter of operations, Magic Edge has had over 30,000 missions flown and over 15,000 pilots have climbed into the interactive cockpit of their 12,000-square-foot facility located in Mountainview, CA.

The facility incorporates a combination of special effects, thrills and cutting-edge cuisine.

The attraction was designed from the ground up by Magic Edge and was funded by video game and arcade giant NAMCO.

The Magic Edge experience begins the moment the guests walk across the diamond plate steel floor to check in and get their flight suits. Guests are briefed on the capabilities of the X-21 Hornet, a 21st-century, super cruise, multirole strike fighter.

Guests then ascend the metal steps to their aircraft and strap themselves into the fully equipped cockpit. Networked together and under the command of their squadron leader, they embark on an interactive sortie complete with barrel rolls, and mid-air battles.

There are plenty of challengers and they dogfight it out against each other while exploring hundreds of miles of beautiful landscapes. After the flight they are debriefed by their squadron leader and then guided through their triumphs and tragedies with an instant video replay. Magic Edge has plans to open up four more sites in Australia this year.

# ARCADE ACTION

## TATTOO ASSASSINS by Data East

Tattoo Assassins is the new entry by Data East into the rather large realm of fighting games. This game has a lot of things to offer, which hopefully will raise it into the elite at your local arcade. The game consists of nine assassins to choose from, all with an incredible number of moves and attacks. If you think that most fighting games are lacking fatalities, then this one sure won't disappoint. In the finished version, there will be at least 30 different fatalities. Besides the same old decapitation, maiming and murdering, you will be able to drop ocean liners on your opponent, put their likeness on the Mona Lisa, make them instantly naked and much, much more. There are also five hidden characters, all extremely interesting, such as: Prism, who can

Derek O'Toole is about to slash Truck Davis in the back.

focus his power and shape his limbs to form sharp objects; Deke Kay, whose body, when empowered with the magical tattoo, turns inside out. (He can throw his organs at you, too.) and Rhina, a female monster humanoid with the power and horn of a rhino, and the body of a very strong human female. The story (as you might have read in our AMOA coverage) goes like this: Muliah Abba calls you to do battle with the Ancient The Conqueror to recover the koldan ink of Ghize. The magical ink, when applied as a tattoo, transforms into real objects such as spiders,

tigers and flowers (flowers?) Koidan himself is one tough cookie, at full height he's easily twice your size. He also has a number of special attacks of his own, and also has minions who will try to take you out before you reach him. Tattoo Assassins should reach arcades by December. Unfortunately, it will have some stiff competition with Midway's Killer Instinct, Namco's Rave War/Tekken and possibly Sega's Virtua Fighter 2. Get in from the cold this season—arcades should be not this Christmas!

Luke Cord is one of the strongest characters in the game.

Truck has some excellent moves, as well as a quick uppercut!

Unfortunately, being caught in the corner is a usual occurrence.

## ACE DRIVER by Namco

This is the new racing game from Namco, and it leaps and bounds better than Ridge Racer 1 & 2, which was regarding as pushing the video envelope. This game will rival even the now-legendary Daytona USA in graphic detail. Not only that, but this game is tons of fun to play! One Ace Driver machine is also capable of linking with three other machines, creating an eight-player, virtual driving experience. There are a number of different tracks to choose from as well, and as with most driving games, you can choose between an automatic transmission or a manual transmission. Ace is a good

Use the Green Island Motorsport to sneak past your opponents.

enough game to be challenging, but it is not impossible. With a manual transmission on you will have a better chance as you will be able to take corners better. However, unlike in Daytona, an automatic doesn't disqualify you from the race. (You may have to brake a little more, though.) One of the best features of the game is a dual, rearview

mirror. Most driving games have one mirror at best, either in the middle or on the right or left side. Ace has one on both the left and right so it's easier to see people coming at you. Another option not found in every driving game is that you can choose your car. There are four in all: Yellow Cyclone Racing, Team Red

Lightning, Scudena Blue Castle and

Green Island Motorsport. Each car has its own attributes such as speed, agility and durability (as in exactly how many times the car can hop a wall at 120 mph) if you're a fan of the famed Ridge Racer series, then you will no doubt like this one. If you want a bit more skill involved in your game play, then this is still your game. It breaks all previous Namco attempts at driving simulations. Really the only possible gripe about the game is that it handles so well and is so fluid that the programmers seemed to think you had too much time—they shortened your time limit!

You can take the Team Red Lightning car past speeds of 233 miles per hour!

Watch out for the other cars, they try to bump your tires constantly.

Just like in every other racing game, it's a blessing to see that banner!

The Yellow Cyclone Racing car can exceed 253 miles per hour.

This game features several different road views, just like Ridge Race does.

## LOCKED 'N' LOADED by Data East

When you reload your weapon, you reload on the screen as well.

In the early '80s, there was a revolutionary idea for a video game. It would be a virtual shooting gallery of sorts. Two-dimensional characters would leap out and die under the power of your "light gun." This spawned many shooting games, from

Whoa! It looks as if you have taken a direct hit. Reload and try again.

Could there possibly be any more targets on the screen at once?

Hogan's Alley and Gangster Town, to the first in the legendary Operation Wolf series. Now it's the '90s, and shooters have excelled beyond anyone's expectations. Data East is now jumping on the bandwagon with Locked 'n' Loaded. This shooting game has all of the things you've come to love and expect from these games, including two-player simultaneous play and hidden icons to upgrade your current weaponry. But they've also added in some new twists. The player interface has some interesting changes. The L&L gun has a loose magazine at the base of the handle, and to reload you must hit the magazine. As you do this for real, it happens on the screen to simulate loading a real weapon. The meter that shows how many bullets you have is no longer the typical six-shooter-style chamber. It has been replaced by a spring-loaded magazine which tosses the fired bullet from the top. Another Locked 'N' Loaded feature is more intelligent enemies. An enemy will jump out, snoot you with incredible accuracy and dive back behind a car before you can shoot him/her. However, you can choose from three

intense game modes to add to the head-to-head game play and also increase the difficulty. One mode is Novice, and the others are Intermediate and Advanced, any of which can be chosen according to the player's skill level and accuracy.

## POINT BLANK by Namco

Point Blank is a very unique game by Namco that doesn't rely on dead bodies and blood as a selling point. This game is much more a shooting gallery than a "good and bad guy"

shooting game, as you shoot an apple William Tell-style of somebody's head, fire at bottles and birds flying out of barrels and more. However, this in no way makes it just a kid's game. There are 50 different levels in the game that are chosen randomly. Playing the game from beginning to end, a player will only see around 16 screens, so the game is different every time you play. The gun is very accurate, and to make it feel more realistic, the gun kicks back and the chamber opens and closes as if the player were shooting out an empty shell casing. The gun actually has new technology in it called the Advanced Algorithm Sensing PCB. This device makes the game six times more accurate than any other game currently on the market. In English, you can place a hostage right in front of the terrorist, have the terrorist move from left to right and shoot him in the arm to prevent a situation. Another use of this technology is in a scene where moving targets are heading over a mountain ridge, and by the time they reach the edge, they are almost half an inch, yet you can still blast them with surprising accuracy. Point Blank first debuted at

Besides the normal target shooting, you can also play number games.

the AMOA show in San Antonio, right alongside several other games in the exact same genre. Virtua Cop by Sega will be a huge competitor right next to L&L by Data East. Point Blank also has to worry about topping the company who has been very well known for their "shooters," American Laser Games. At the AMOA they previewed Fast Draw, which is arguably the best by them so far. But as previously stated, this game will not necessarily be competing against these others. Point Blank stands out for what it is: a shooting game that feels real but isn't violent. Another cool feature in this game are the sounds. When you fire the .45, it sounds very real. Not only that, but you can hear the empty shell casing hitting the ground. Here's a good example of how this game can go from a humorous to serious situation: There is a level in the game that simulates a police firing range with targets and red bull's-eyes lining up and down the level. A little later on, it looks like you may have to do the level again. However, this time instead of the black, human-shaped targets, you are firing at a strung-up cow, and you are awarded different points for shooting different parts of it. There are also a number of bonus levels in this game. One of these is a level where several treasure chests fall to the ground and you must shoot one. This is a random

This is your selection; pick from the above four to start with.

bonus level where you might get either coins or a heart. The coins award points, and the heart gives an extra life. The humor in this game is unparalleled in the history of this type of game. Another example is a stage consisting of a man in a lake with piranha biting his rear end, and you must shoot the fish. However, the entire game is not won on accuracy alone. In one level, there is a Camaro you must disable, and to do so you may have to pump 150 shots into it. Point Blank is being rolled out even as I write this, and by that time Virtua Cop and Fast Draw will most likely be there as well. For a true "cops and robbers" and "shoot the bad guys" fan such as myself, I can't wait to go to my local arcade and get on PB. Be sure to watch upcoming issues of EGM® for expanded coverage.

This is the Camaro. You have to pump 150 shells into it to destroy it.

## NINTENDO UNVEILS NEW SYSTEM AND GAMES AT SHOSHINKAI SHOW!

On Nov. 15 and 16 Nintendo of Japan held their annual trade event called the Shoshinkai Show. At this show Nintendo formally introduces the world to some of the new products that they have been working on.

This time the hot new item was their Virtual Boy. It is a true 3-D, 32-Bit, portable game system that will be coming out in the U.S. in April and will sell for \$200. Technically it is a portable, as it will run on 6 AA batteries (for seven hours), but considering the size and weight of the unit, few people will want to use it as such. The systems at the show were running off an AC power supply, so it should be available at launch as an option. It is running on a 32-Bit RISC processor but

The VB controller has the same wing shape as the PlayStation's one. It also has the third dimensional "toward and away from you" buttons on the back of the controller!

with two screens; this CPU has to do double duty. The screens are called "mirror scanning LEDs" but they are just very

detailed red LEDs on a black background. The sound is worth talking about as it is true stereo, and the demos sounded great! Three games were playable at the show and two more will be ready by launch—all from Nintendo.

Nintendo also had a game with a working title of Fighting Polygon. It utilizes the FX chip and is for the Super NES. When completed it should be 16-Meg. It played well and was only 40 percent done.

Other significant games at the show include: Mega Man 7 for the Super NES (You knew he would be back, right?), Kirby 2 for the Game Boy; Super Bomberman 3 for the Super NES; and SimCity 2000 for the Super NES.

Check out the following pages for a closer look at the show's hottest games. Watch for more in the January issue of EGM!

The VB is too heavy to strap onto your head, so it sits on a minitripod.

### 3-D ZOOM EFFECTS!

Nintendo uses the 3-D effect wherever and whenever possible. Here in the system start-up screen each of the letters in Virtual Boy zoom toward the player.

# THE FIRST VIRTUAL BOY GAMES!

## MARIO BROS. VB

Well, Nintendo does always launch a new system with a Mario game, but come on Nintendo, the original Mario game? Couldn't you have done better? This cart is so old, though, that there probably is a whole new generation of game players who have never seen this version of the game. Hmm. Anyway, Mario and Luigi are back (?) in an adventure that keeps them hopping and jumping from level to level trying to wipe out some mean turtles, crabs and other

nastes. The way you do this is to wait until an enemy is directly above you and then jump up and punch the bottom of the floor above you. This causes

the enemy to flip over and not move. You then jump up to that level and kick the enemy off the level for points. Coins occasionally appear and they should be picked up. Rumor has it several of the VBs can be linked together and if so, you can then play a two-player game. Not an original, but fun anyway.

## PINBALL VB

We've seen similar games before on the NES and Super NES that have the playfield sloping away from you. This is more of the same with great sound effects and reasonably good playfield action. The game was a very early copy and the 3-D effects were minimal at best. We'll have to come back to this one when it is more complete.

## TELEROBXER

Picture Super Punch-Out with aliens that punch out of the screen at you and you have a good idea as to what Telerobxer is all about. It is a fun game for a portable system and like SPO there are numerous opponents who get smarter and harder to beat. As for 3-D effects, other than the alien's fists and arms that smoothly zoom out at you and your fist that zooms in for your punch, there aren't a whole lot of spectacular effects in this game. As for sound effects, there aren't a whole lot, but hey, this is a boxing game, what do you expect? It should be noted though, that this was a work-in-progress game that wasn't 100 percent complete and knowing how hard Nintendo works on a game, they could very well add a lot of additional 3-D special effects to this cart by the time it is released here in America in April.

Debuting at the Shoshinkai Show was the fourth polygon FX chip game. With the exception of *Vortex*, this is also the third FX game from Big N. (But then again, all four have been made by Argonaut Software of U.K.)

You get about 13 fighters including some non-humanoid creatures like a huge praying mantis. Despite the rather blocky looks, the game moves quite smoothly and in a realistic fashion. (Keep in mind that the game is only about 40 percent finished.) When complete, FP will reach 16-Meg, making it the biggest FX game yet!

Jez San, Argonaut's president, claimed that FP will be a true 3-D fighting game complete with lateral movements. Will this be the last word in Super Famicom fighting games?

Argonaut has gone out of their way to make this fighter stand on its own!

### Kirby 2

Game Boy

GAME BOY

Action

March '95

Price: ¥3,900

The roly-poly vacuum cleaner of a hero makes his return to the action arena after being bounced around as a pinball and a golf ball. Like the excellent NES version, Kirby can inhale foes and copy their abilities, such as spinning a sword, hurling boomerangs, rolling like a wheel, and so on. This time he can even enlist the help of animal friends to get him past several sticky situations.

Several rooms exist in the game where you can find hidden powers and other stuff.

## Sim City 2000

Super Famicom

Simulation

June '95

Price: ¥9,900

The PC city simulation that no one thought was possible for a 16-Bit game system has been successfully ported over by Imagineer and HAL Laboratory. The system interface has been significantly altered and fixed at the bottom of the screen for easier interactivity. Apart from that, every other aspect is nearly intact!

The game of endless intrigue is finally coming to the Super Famicom.

Yikes! Many disasters will happen in your city. What you see here is a misfired energy beam that was supposed to give electricity to your city. Oopsie!

Start your city with commercial, industrial and residential zones.

Make sure that you have a working sewer and subway system!

## Burning Heroes

Super Famicom

RPG

Unknown Release

Unknown Price

Enix has announced yet another hot RPG in the fine tradition of Dragon Quest (Warrior). This is a sprawling journey covering three separate parts in which you can choose one of eight heroes and three or four support characters out of 12. As each of the eight heroes face challenges, the story will gradually become clear!

Many mystical sights will astound you while traveling through this game.

Like all RPGs, there are plenty of towns to visit. Also, the battles are carried out in quite a dramatic fashion. There are beautiful but deadly spells to cast as well as other attacks that you will learn through your travels in this game.

Super Famicom

War Sim

February '95

Price: ¥14,800

Another intense strategy game from Koei. Set in World War II, you can choose to play as either the Japanese or American military, complete with incredibly detailed fighting units from the largest battleships and aircraft carriers down to destroyers and more. Unless you're a real sucker for punishment or a brilliant strategist, stick with U.S. forces, especially in the later stages of the war when America enjoyed overwhelming numerical superiority in many ways.

New options have been added to help you out in the many battles to come!

Price: ¥14,800

The super-complex simulation game in which you play for the control of ancient China is back. Because the characters you can choose have incredibly similar names and faces, be sure to check their abilities and other skills before you commit yourself to something that you may regret later on. After that, it's off to heavy-duty strategy, diplomacy and bureaucracy! Keep the manual handy while playing this massive simulation.

Big-time military action will be needed, as will the gentle hand of negotiation.

Price: ¥6,900

One of Japan's most popular gambling games has been taken over by the usual Banpresto gang (Ultraman, Kamen Rider, Gundam and Roa) as a weird fighting game. By hammering balls into certain pockets on the playing field, two fighters at the bottom of the screen will unleash punches, kicks and other attacks upon the opponent. This is one fighting game that relies on luck more than skill!

Truly an oddball concept! Watch the bottom of the screen as your mindless characters duke it out with every ball

that gives them some kind of command or another.

Price: ¥9,800

The smoking hot race game that competed on the highways of Japan has been upgraded. The game is always played with two screens. In Single-player Mode, the top screen shows your machine from a variety of angles that makes for cool viewing, while the lower screen shows your car from behind. In Two-player Mode, the two screens show both machines from the rear. For racing purists, tune over 50 different parts and components. Mastering four-wheel drifts is the shortcut to victory!

A split view is present to show you your car at different angles.

Many different styles of tracks are present in this game—each one is unique in its own way by all kinds of methods. Lots to do here.

## Vs. Mode Options

There is an addition of a special Vs. Mode, where not only can you do the standard one-on-one battle with friends or foes, but there is also a Team Battle Mode that is in the same vein as King of the Fighters for Neo-Geo!

If fans of the Neo-Geo will definitely recognize this title. In Japan, it is Fists of Dragon Tiger, but here, it's our own Art of Fighting 2!

The SFC version remains completely faithful in translation. All the special moves, super death moves and the low energy comeback moves are all here. Also, the hidden character Geese Howard is retained from the Neo game!

In Vs. Mode, there are plenty of new options, like a tag-team style of game play reminiscent of King of the Fighters.

## Enter Geese Howard!

Yes, Fatal Fury's Geese Howard is a secret character you can fight if you're good!

## THE GOOD

The sheer achievement of porting this game onto the SF without losing any game play mechanics.

## THE BAD

The character sizes have been reduced significantly, and many frames of animation have been lost.

## THE ONLY

It's either the battles that Major Mike and Trickman have constantly, or Jack Turner.

## Bonus Rounds

Three bonus stages will help you build up abilities and gain special powers!

## Ryo Sakazaki

The main character can throw fireballs forward and from the air. He is also the master of the Zen-retsuen.

## Robert Garcia

From a proud Italian family comes Robert—Ryo's best friend who has many of the same styles.

## Yuri Sakazaki

The younger sister of Ryo (who was the maiden in distress in the first game) is now a powerful fighter.

## Takuma Sakazaki

Known as Mr. Karate from the first game, Ryo and Yuri's father is incredibly strong, with fast fireballs.

## King

"Good Evening, Sir." The bouncer from AOF has her Venom Strike kick and several other quick kick attacks.

## John Crawley

This military man is very good in the air with special spinning and kick attacks. Watch for the mega smash!

## Mickey Rodgers

Formerly a dopey boxer from AOF, Mickey has shaped-up with fast fists and several projectile attacks!

## Lee Pai-Long

The old man with the ginsu claws is back. Speed is still his advantage, as well as nasty hand weapons!

## Jack Turner

"Dynamite!" This oversized street thug will surprise you with speed unlike any of his size has!

## Kisagari

Though somewhat out of place with the other fighters, this ninja can reflect projectile attacks—and stuff.

## Temjin

A rather bulky man who works at Southtown cargo bay, he can fly across the screen with rapid attacks.

## Mr. Big

Geese's right hand man in controlling Southtown, Big uses two goofy sticks as dangerously formidable weapons!

## THE GOOD

The great animation, the realistic ball movement and the play-by-play announcer kicks. Watch out, FIFA!

## THE BAD

You get a limited view of the playing field. You only get to see about 15 percent of the field at any time.

## THE DOLLY

It's typical soccer, so action takes a while to develop. Scoring is hard because soccer is a defensive game.

**T**his game has balls, and the play animations are absolutely perfect. Perfect Eleven can be played in Normal and a Hard Mode, and you can choose various offensive and defensive formations for your team.

This is one heck of a good soccer simulation. One of the coolest features of the game is play-by-play. The announcer follows the play, and a small screen in the lower middle of the main screen allows you to see where your defenders are at

all times, so you can get the ball up to your forwards in a hurry.

Choose from any one of the world's top teams with actual player rosters. You can play in the International Cup Mode, where you play a season in a single-elimination tournament, or in an exhibition game. Another option allows you to choose the colors of your team's shirts, pants and socks.

This one- or two-player game really kicks on the Super Famicom! FIFA Soccer was the top soccer game to date and should be looking over its shoulder this game scores big.

### You need many different soccer skills!

Don't think you can hack people and get off easy. Penalties are called and penalty kicks will be awarded.

Almost every option in soccer that you will need!

You can choose your team colors and design, so your team will be color coordinated when they take the field. Your team jerseys, shorts and socks need to match, so pick your colors carefully. Use the back of a detergent box for help.

A coin toss at the beginning of the game determines who will kick off the ball to start the game. Then the loser gets to choose which end he wants.

### THE BOSS

You can play as the Bosses in this game!

### THE DAD

As far as I can tell, nothing! This is a great fighter!

### THE DOLLY

Definitely not Mai Shiranui. This chick is HOT! Be still my beating heart!

If you happen to be an owner of a PC Engine and a fan of the ever-popular Fatal Fury game, it's time to rejoice. The Fatal Fury Special is here! For those of you who don't know the story, it's set in the year 2000. It must have been tough living in those snow-covered, ice-filled, and frozen lands of the world's last fighters compete in South Town to earn the title. The story of the game is that the fighters have underlying motives for entering, but they all have a common goal: to win the glory, some just want to kick everyone's butt, and some just want to see the truth behind the tournament. But they all have one thing in common: they are all fighters.

The entire series was now in the hands of the original 12 fighters. The story of the King, Tung Fu Rue and Geese Howard. The story of the game is that the fighters as one of the Bosses! The graphics are very good, and the sound is very good. You can play against a friend or a computer, and the game is very easy to play. The difficulty settings are from Beginner up to Arcade. The game is very good.

## THE CHARACTERS

### TERRY BOGARD

Terry's more than willing to beat anyone into a bloody pulp with his lethal combo of killer moves.

### ANDY BOGARD

Terry's brother and fellow fighter in the tournament, he's out for blood, namely M. Krauser's.

### AXEL HAWK

He hates the Bogards and would like to see them fry on his electrified ring ropes!

### DUCK KING

Well, King has some new dance moves and he's dying to show you.

### GEESSE HOWARD

What can we say about this powerhouse? He's unbelievable and screams power!

### TUNG FU RUE

Don't let his small size fool you. He can whip out some killer fireballs.

## BIG BEAR

This former wrestler is even stronger than before! His strong bear look is a killer. He's mean that he could!

## BILLY KANE

He looks pretty and carries a BIG stick. He doesn't like the Bogards that much, either. Now he's out for blood.

## CHENG SIN ZAN

This greedy and overweight fighter is excellent with fire bells. He's slow, but still very dangerous.

## JOE HIGASHI

Joe joins the Bogards once again to fight Krauser's evil army. His flaming knee attack is as impressive as it is lethal.

## JUBEI YAMADA

Concealed within his small frame lies unbelievable strength. Jubei's hold moves can be quite lethal; be careful!

## KIM KAPHWAN

Kim likes to pummel his opponent into oblivion with a lethal kick combo. Lightning reflexes make him formidable.

## LAWRENCE BLOOD

This bullfighter offers no mercy for his opponents. He uses the bulls in his stage to his advantage—use caution.

## MAI SHIRANUI

Definitely one of the hottest ladies in the video land! Mai's fast and furious with her moves, and just as powerful as the guys.

## WOLFGANG KRAUSER

He's back! Wolfgang fights with a vengeance after losing the tournament. He's big and powerful.

# You'll Spend Weeks Trying To Conquer Sheltem.

(But Exploring His World Takes Much, Much Longer)

Night and Magic III is a Role-Playing Game in which you'll head up a team of six fighters consisting of thieves, wizards, clerics, barbarians and others in varying races including human, gnome, elf, dwarf, half-orc, and others. The huge size of the world with all its towns, dungeons, and powerful spells makes N&M III the ultimate quest for survival and domination.

It's Mythical, Magical and Massive...And it's your last chance to defeat the sinister and mysterious adversary: Sheltem.

But it won't be easy. You'll have to:

- map your surroundings
- talk to hundreds of people to learn clues
- strengthen your team through battle and training
- learn dozens of new, powerful spells to cast
- complete many mini-quests

So start preparing yourself now for those mythological monsters who want to keep you from your mission, and remember...they don't like to lose!

ALIENS HAVE EXPERIMENTED ON YOUR BODY.

THEY'VE DISMANTLED YOUR SHIP.

# ENOUGH IS ENOUGH!

Blast 'em and escape. You've got one desperately slim chance to warn Earth. These aliens are trying to unlock your secret of MetalMorphosis and cross through the interdimensional Hypergate into our galaxy. But they won't succeed... not if you can help it.

- An experiment in genetic engineering and space technology, your body and ship can instantly change shape and size.
- Five mysterious planets to investigate and a galaxy full of aggressive alien life forms to fight.
- Two stages of play in every level — intense hand-to-hand ground combat and wickedly swift space warfare.
- Force fields, sliding floors and conveyor belts complicate every move.

**Play as Akuma**

Do the method described below to play as the fearsome Boss, Akuma. Try the method with the second player, too.

It's true! You can play as Akuma on Super Street Fighter II Turbo for the 3DO just like the arcade! To do this, choose the Super Battle option from the Title Screen. Next, you will see the Player Select Screen with the "Select Game Speed" option in the top left-hand corner. Choose any speed you want with the Fierce Punch button (whatever you configured that to be on the controller). Now, the 1P cursor should be on Ryu. Pause on Ryu for two seconds, then move directly to T.Hawk. Pause on him for two seconds, then move to Guile. Pause for two seconds and then move to Cammy by passing through Dhalsim. Stay on Cammy for two seconds and then move directly to Ken and then JP to Ryu. Pause on Ryu for two seconds again. Then press all three of your punch buttons and the X (Start/Square) button simultaneously. A shadow of Akuma

Choose "Super Battle" from the Title Screen. Press X.

Starting at Ryu, pause for two seconds, and move to T.Hawk.

Press all Punch buttons and X (square button) simultaneously.

will replace Ryu's profile and you will now be able to play as him! Akuma's moves are:  
Dragon Punch: ▶▶▶▶▶  
Fireball: ▼▼▼▼▼  
Rec Fireball: ◀◀◀◀◀  
Air Fireball: Jump + ▶▶▶  
Hurricane Kick: ▼▼▼  
Teleport: ▶▶▶▶▶ - 3 punches or ▶▶▶▶▶ + 3 kicks.

Pick any speed with the Fierce punch button on the controller.

From T.Hawk, follow the pattern for Guile, Cammy and Ryu.

You will face your opponents as the fearsome Akuma!

If you lose with him, you'll have to do the trick all over again.

# IN AEROBIZ SUPERSONIC, EVERYTHING'S BETTER BUT THE FOOD!

It's the beginning of the 21st century and competition in the airline industry is heating up. Lower fares, better service and improved flight schedules fuel the war in the skies.

SET UP BOTH DOMESTIC AND INTERNATIONAL ROUTES

PURCHASE STATE-OF-THE-ART SUPERSONIC AIRCRAFT

REVIEW AIRLINES SERVICES AT DESTINATION CITIES

As a young ambitious CEO, it's up to you to make sure your airline is a survivor and not just another casualty. To succeed, you will have to make some tough decisions including where to fly, what aircraft to purchase and how to attract visitors to the cities you service. Your goal is to differentiate your airline from the rest while still turning a profit.

In Aerobiz Supersonic, fashion a powerful fleet of aircraft from more than 50 possible choices, organize routes to 89 global destination nations and invest your profits in a variety of new services including amusement parks, ski resorts and airport shuttle services.

And don't forget, as CEO you're responsible for things like plane maintenance, advertising and handling those periodic emergencies such as a plane crash or employee strike. Get ready to make some tough decisions! And now that you're CEO, try doing something about the food!

- **Offer air service to over 80 major & minor cities around the globe**
- **Select from 4 eras in aviation history including two futuristic scenarios**
- **Purchase from an extensive list of aircraft, including historical, fictitious & supersonic airplanes**
- **Diversify your airline through business ventures such as golf courses, ski resorts & shuttle services**
- **One to four player fun**

## MOST WANTED TRICK

This month's little number is for the incredible game, *Donkey Kong Country* for the Super NES. Here is what a lot of people would like to see (including us). What if there was a fully rendered version of the original *Donkey Kong* game in *Donkey Kong Country*? Wouldn't you go ape? I We, sure would! There are quite a few tricks and strategies in this game already. Just look at the Special Feature exclusively for *Donkey Kong Country* in this magazine. This cool code is only a number, but if you find out the truth to it before we do, and have some hard evidence to back it up (name, via a method), you are eligible to win a free game for the allowable system of your choice and get your name printed in our awesome magazine!

Is this trick possible? Could it be done on the Title Screen?

If you have any clue on this Most Wanted Trick, send it!

#### Passcodes for Minigames

Go to the Options from the Title Screen and enter the password to play the game for the level you are currently in.

Here is a good way to remember how to work these passcodes. The n.eroglyphics trans ate into eight numbers 8 being in the noon position, 7 being in the next counterclockwise position and so on, until you reach number 1 (1:00 position).

Level	Game	Code
Fish Head	Log Invaders	35147
Splitter	Space Log	17286
Lumber	Log War	11283
Toothpick	Log Man	71255

Access the Options from the Title Screen. Press START.

If done correctly, you will be able to access the minigame!

Think of it as an eight-numbered clock. Enter the password.

Each level has its own minigame. Try them all! Joy!!

#### Level Skip

To activate the Level Skip, you need to press L and R on both controllers in the correct method and then press the right buttons.

This Level Skip code is kind of tricky and takes practice, but it does work. At the Title Screen, take controller two and hold the L button. While holding it, press and hold the R button. While holding these, take controller one and hold the L button, then the R button. With all of these held on both controllers, press the corresponding buttons (to the level you want to choose) on both controllers simultaneously.

At the Title Screen, do the code with both controllers.

Now, you will be able to begin on the level you chose!

Press the button on both pads corresponding with the level.

You can even choose to start on the infamous fifth level!

ously: Level Two-the A buttons, Level Three-B buttons.

Level Four-X buttons, Level Five-Y buttons.

#### Same Character Select

On the Character Selection Screen, have one player pick while the other holds L and R on the second controller.

This cool trick will let you choose the same character for a two-player game! Just enter the Character Select Screen and have player one choose a character. Next, hold the top L and R buttons on controller two as player two picks the same character. You now have the same player with different colors!

Don't worry! Two players can now be the same character!

### Blue Lightning

Jaguar

Shooter

Lynx owners may recall a great little snooter called Blue Lightning and how intense it was. Well, times have changed, and a brand-new version of it is on its way to the Jaguar.

Load up your plane with an arsenal of missiles and take to the skies. You have a lot of missions to accomplish, and none of them will be a cakewalk. You've got tanks, SAMs, enemy aircraft and worse gunning after you. It's going to be tough, but if you have quick reflexes and nerves of steel, you might have a chance.

If you enjoyed the original, this one is a real improvement.

When you've got a lock on the enemy, you'd better let loose a few missiles.

Bomb the enemy supply trucks to put a halt to their military actions.

Data East

Incoming

Saturn & PS-X

Action

Data East has a brand-new game that will be available on the PlayStation and the Saturn when they reach the States. These shots are very preliminary, however, we'll get more on this game at the Winter CES.

You play as a Tyron Cybernetics information technician, whose job it is to install an automated defense system on a base that protects the company's assets on the Duat colony. Suddenly the base comes under attack from a hostile force.

The base is equipped with droids, weapons and other defense systems that you can use by manipulating terminals strewn throughout the base. The enemies are attacking the base from all sides, and you will have to man gun turrets and other weapons in order to survive. If you cannot stop them, you will be slaughtered.

Incoming uses lots of polygons and texture mapping to generate a realistic world. The action can get intense as you are one man trying to stop an army.

Be sure to look for more on these "next generation" games in the near future.

Use your turrets to blast the enemy ships into space dust.

Incoming is loaded with ultra-hot visuals of space-age ships.

The enemy ships are fast, and they will try to break through your defenses.

The ships can be scaled and rotated easily with the system hardware.

The animation is smooth and shows off what 32-Bit can do.

Plenty of cinema displays keep you updated as to what is happening.

These scenes show off the enemy onslaught that strikes the Tyron Cybernetics plant. They're loaded with action and are totally unlike anything you've ever seen before. You won't believe your eyes!

Be sure to remember this game. You are bound to see more of it as the Saturn and the PlayStation come closer to their release in America. Are you ready to say goodbye to 16-Bit? You might now!

# THE HOTTEST SPORTS GAMES—NOW ON GAME GEAR!

Just because you're on the move doesn't mean you've got to stop

playing your favorite Genesis™ sports games. Time Warner Interactive's latest Game Gear titles make sure the action follows you wherever you go: RBI™ Baseball '94 lets you play baseball with the pros. Tee up and swing into a round of pressure-cooking golf with PGA TOUR® Golf II. Or get into some serious bashing and crashing with Road Rash™ II!

PGA TOUR® Golf II improves on the original hit with enhanced graphics, more realistic ball action and six courses. Take on the 3 Pros who come with the game or tee off against your buddies for prize money and prestige!

With artwork and animation adapted from the Genesis™ version, RBI '94 has over 800 real players from the 28 big league teams, complete with '93 stats. Use the actual 1994 baseball schedule to complete the full 162-game season play offs and World Championships!

Join the Speed and Bleed circuit with Road Rash II, the ultimate motorcycle racing game. Scream around five tracks that become increasingly more difficult. Face opponents who get nastier as the race goes on. Challenge a buddy head-to-head with the Gear to Gear™ link then add a pack of Rashers to make it really vicious. Upgrade to 15 different bikes to improve your ride. The only rule on this road is survival of the meanest!

## TimeCop

Super NES

Action

Washington, DC—1994. An obscure doctor has successfully completed the concept of time travel after 10 years of work. A young police officer named Max Walker is chosen to be an officer in the agency charged with policing this possibly dangerous technology. The same night Max tells his wife about the new job, she is mysteriously murdered.

DC—2004. Max Walker is one of the most dangerous officers in the TEC Time Enforcement Agency. As a TEC agent, you have to travel to a number of different time periods (past or y) to stop greedy criminals from cashing in on events that have already happened. With scenes from the movie and fully-digitized graphics, TimeCop looks hot.

Battle scientists and strange robots in a future Washington, DC.

Accelerate into the past at light speed in your time-traveling device.

TimeCop uses digitized characters throughout the game.

Los Angeles punks try to take out the hero with punches and kicks.

Delve deep into the ocean to prevent an evil plot that's under way.

Cinemas will bring you the story between the many levels.

## Family Feud

3DO

Puzzle

The odds have it that you've watched this game show at least once. It pits two families against each other in a frothing quiz-fest. Gametek, known for their game show translations is bringing Family Feud to the 3DO.

Family Feud is loaded with real voice and digitized images to make it seem as if you are really on the set of the show. There are hundreds of questions and some of them are really tough.

The 3DO version of Family Feud is loads of fun to play, especially if you have a bunch of people gathered together playing it.

Each member of the family will have a chance to add an answer.

Try to answer first, so you can take control of the board.

You'll have to make an educated guess in order to win the jackpot at the end.

## Rise of the Robots

Game Gear

Fighting

Last month you might have seen the Super NES version of this same game. Well, now there's a portable version on the Game Gear.

Robots have gone haywire, and you must face them all. If you can, use your metallic fists and feet to smash them into the ground. It will take fast fingers if you are to survive the five troublesome mecha-noids.

If you need a good fighting game for the Game Gear, Rise of the Robots might satisfy your desire for carnage. Rise of the Robots looks pretty good, so check it out.

## RISE OF THE ROBOTS

In the Training Mode, you can select which opponent to fight.

There are even cinemas in this game! That's rare on a portable.

The first robot is slow and fairly weak. Use jump kicks to weaken it.

The second robot has a great reach. Figure out how to zone him.

This robot moves quickly, and slices with razor-sharp blades.

This humanoid mech moves quickly and has lots of nasty moves.

Here he is: the last deadly robot. Can you put down the robot revolution?

## Air Cavalry

Super NES

Action

Gametek's got a brand-new flight sim that's as action packed as the real thing. Fly into the heart of the enemy's defenses. If you've got the right stuff, you can annihilate the opposition. If not, you'll crash and burn.

Air Cavalry uses the Super NES' effects to a great degree. The Mode 7 ability is used a lot to bring choppers, planes and missiles right in front of your face. This game has great graphics and sounds, bringing the experience alive. Adjust your speed, and set your altitude. Lock onto the targets that are trying to nail you, and then blast them to dust.

If high-flyng adventures are your thing, Air Cavalry will give you a thrill. This is one of the more intense flight sims around.

One look at your "friend-or-foe" gauge will show you the enemy.

Enemy helicopters will strafe you with gunfire in terrific battles.

Travel along the enemy border. This is where you engage the opposition.

## Troy Aikman NFL Football

Jaguar

Sports

The real football game for the Jaguar is here! Now armchair athletes have a reason to celebrate. Troy Aikman NFL Football for the Jaguar gives players a realistic game of football that's loaded with lots of moves and large characters.

The graphics in Troy Aikman look very good. One look at the pictures below and it's easy to see that this one's going to be a game that's hard to beat. If you want lots of plays, this one's got them all. For a first football game, it's really impressive.

Scramble down to the endzone for the touchdown, if you can.

Go in for the long bomb. If you can catch it, you'll get lots of yardage.

Your playbook is filled with loads of tactics for you to try out.

## Hover Strike

Jaguar

Action

If you want some major tank combat, Hover Strike is for you. Climb into the cockpit and strap yourself in. You will be going deep within enemy territory, hunting down anyone foolish enough to fight you.

Hover Strike uses a lot of the Jaguar's scaling and rotation effects throughout the game. Hover Strike should blow you away!

Tracers light up the sky as you engage the enemy face to face.

Texture-mapped polygons in Hover Strike's terrain make for a realistic look.

## Val D'Sere Skiing and Snowboarding

Jaguar

Sports

If you've always wanted to go skiing or snowboarding, but were afraid that you'd lose a few limbs in the process, you can finally experience it at home.

Val D'Sere Skiing and Snowboarding will bring the sheer exhilaration of zipping down a mountainside at breakneck speeds into your living room. Slalom down a course, avoiding rocks and trees, or snowboard down an obstacle course that could pulverize you if you go careless.

This is one of the most unique titles coming out for the Jaguar, and it would be worth your time to try it out. No more broken legs!

Watch out for trees that can ruin your day rather quickly if you're not careful.

Fly between markers as you try to finish the course alive.

Sheets of ice make the going quite slippery. Watch your balance.

## Flashback

Jaguar

Adventure

You've lost your memory, and now a bunch of aliens are after you. Why? You must find out.

Flashback wowed everyone when it broke graphic barriers on the Genesis, and now this excellent cart is for the Jaguar. The terrific cinema displays in this version are the smoothest that you'll find anywhere. They look really good. Essentially, it's the same game, but if you don't have any of the other versions, it's something to pick up. Flashback won't disappoint you. It's a great adventure

The cinemas are as smooth as silk, and they are fast too. Awesome!

You awaken in the jungle after being blasted out of the sky.

You've regained your memory, and are now trying to stop the aliens.

## Ultra Vortex

Jaguar

Fighting

If fighting games are your thing, there's a brand-new one on the way. We first showed you pictures of this title a while back, and since then the game has been retooled a bit.

Ultra Vortex is a dark and grimy game where the players fight for their lives amidst ruins and places of evil. Warriors like the fiery Volcana and the brutal Buzzsaw use their mystical powers to conquer each other in bouts where anything goes.

There haven't been any fighting games for the Jaguar since Kasumi Ninja, so this one has been eagerly awaited. If you enjoyed Kasumi, Ultra Vortex might be right up your alley.

Grok the living rock can take a lot of damage, as well as dish it out.

Volcana readies a ball of plasma to use against the nimble Lucious.

If you want blood, Ultra Vortex has it. Prepare to see lots of red stuff flying.

# DONKEY KONG COUNTRY TIPS AND SECRETS

By now I'm sure you've gotten your copy of the hottest game of the year, DKC. If you haven't,

I'm not going to even begin to tell you everything you're missing out on. And if you have gotten your copy, then check out the next five pages—you may just be a little surprised at some of the things you're missing out on too! We've been burning the midnight oil here at the homefront just to get you all of the hottest secrets and tricks there are to know about this awesome game.

The first three areas, Kongo Jungle, Monkey Mines and the Vine Valley are featured in the section along with the bonus levels. When you think you've got those mastered, check back with us in a month, we'll be more than happy to let you in on a few hidden areas for the last three areas. As much as we'd like to believe it, we're not perfect when it comes to secret searching. So if you find any hidden goodies that we haven't, make sure to drop the news to some of the man Terry a line, I'm sure he'd love to hear from you. Until next month, See ya.

## BONUS LEVELS

The bonus levels may seem like nothing at all at first glance. But if you're smart enough, you can find a bonus within a bonus. First of all, there are four bonus levels, one for each of the animals that help you throughout the game, except for Squawks. In order to make it to the bonus rounds you must collect three animal icons. The main goal in the bonus stage is to collect as many small animal icons as you can before the time runs out. For every 100 icons you collect, you will earn a free life. Ready for the real secret? Check out En Guard's bonus stage to the right.

En Guard's bonus level starts in the middle. You are surrounded by small icons. Instead of just grabbing the icons, head to the special rooms!

The 1, 2, and 3 rooms are on the top, left and right. Head to these rooms first and you will be able to double or even triple your icons.

Each bonus level has a special golden icon that will give you twice the points. Find it and you can get tons of lives and extra coins.

# AREA 1-KONGO JUNGLE

## JUNGLE HIGH LINKS

In the beginning of the level, you can scale the side of your house to make it up to the treetops. Follow the arrow, and when you hit the ground, you will get a steel keg. Bounce the keg off the left wall, and ride it until you break into the secret area with bananas and a 1-Up!

The jungle high links is a great place for you to get acquainted with the way everything controls. It's a fairly easy level, but that doesn't mean that there aren't any secret levels. Grab a barrel and jump down the ledge, break the wall and make your way inside where you can try your luck at getting an animal token.

## ROPEY HANGAGE

A lot of the secret

areas can be found pretty easily if you take your time and look everywhere! Here you can see the edge of a barrel. Jump in, and you will be taken for a ride into a bonus level where you can earn a 1-Up.

This one's a little harder. At the first Kritter, if you jump you will fall into a barrel that will shoot you right into a secret level where you must climb the vines and grab as many bananas as you can.

## REPTILE RUMBLE

Any time you see a barrel, check around. It's a good possibility that there's a wall around for you to use it on. In this bonus room, you can sharpen up your tire jumping skills and get your daily allowance of points.

A lot of times, an item is placed close to a hidden area to distract you, such as in this case. When you see the "K" icon, turn around, grab the barrel, and throw it into the room for a 1-Up.

# SPECIAL FEATURE!

## CORAL CHAMBERS

A lot of times the secrets aren't really hidden. Sometimes the enemies are guarding the entrances. In order to grab the animal token, you have to figure out a way to get past chomps first!

When you see the first Croctopus in the level, wait until he goes around the reef and up. Then, sneak through the passageway and head straight down for a bunch of bananas!

## BARREL CANNON

Toward the end of the level, you will run into an area where there are two humps. After the first hump, go back, grab a barrel and launch it into the right side of the hump. Once you're in the bonus level, your goal is to pick the right path when blasting out of the barrel. Will it be a 1-Up or an animal token?

When you go to the first barrel, aim for the lowest part of the wall. You will be taken to a bonus level where you can snag a 1-Up.

## WINKY'S WALKWAY

Winky's Walkway is the first level in the Monkey Mines and by far the easiest. There really aren't any hidden secrets, just figure out how to get Winky and you should be all set. Good Luck!

## AREA 2-MONKEY MINES

There is a bonus area that isn't very hard to see or get, but if you're not riding on Winky, you won't be able to reach the bananas that are worth 10 a piece. Does this guy have some secrets?

## MINE CART CARNAGE

The Mine Cart Carnage is unlike any other level. None of the items are hidden, they're just impossible to get!

Thanks to our Dave M, we found an instant exit: just jump over the first barrel and fall along the edge of the wall!

## Instant exit

Just when you think you've made it out of the level, the Kritters decide to play a little game of chicken with you.

## BOUNCY BONANZA

To play the 1-Up game, you need to sneak right in between the two bees and smash a barrel!

In the middle, there's a barrel that's slightly out of reach. Roll the tire onto the platform from the left for the bonus!

## STOP & GO STATION

In between hitting the switches, grab a barrel and smash it right wall for a bonus room.

There's a hidden barrel in the ceiling near the middle of the level. To get to it, you'll need to roll the tire.

## MILLSTONE MAYHEM

The Millstone area is loaded with tons of items and secrets. First find the tire by bouncing on the ground. Then you have to use it to jump to the hidden barrel.

**SPECIAL  
FEATURE!**

# DK

## AREA 3-VINE VALLEY

### VULTURE CULTURE

If you're looking for a true wooded area, then Vulture Culture is the game for you. Bust the wall and slam the Klap Trap.

First of all to get the barrel trick, you need to take out the vulture on the top of the ledge. Jump off so you can bounce the barrel out of the ground, then launch yourself into a bunch of 1-Ups!

### TREE TOP TOWN

There are a lot of areas in the Tree Top Town where you must shoot from barrel to barrel. At the end of one of the barrel sequences, there is a single banana that looks impossible to get without losing a life. Go for the banana and you've got the bonus!

In the beginning of the level, a vulture will come out flying very fast. Run back to the beginning of the level as fast as you can and bounce off the vulture to get to a secret level where you need to spell K-O-N-G!

### FOREST FRENZY

Most of the Forest Frenzy Level consists of swinging and jumping from vine to vine over large chasms. One wrong move and it's all over for the hero and his little buddy. When you get to the exit, grab a barrel and turn around—the first wall you run into will take you to a secret level where you must climb up and down a vine and grab the bananas. At the end of the level, crash into the wall the wall.

## TEMPLE OF THE GNARLY

In the beginning of the level, if you wait, a mini Gnarly will appear. Bounce off of him to the left, and you will be able to make it up on the ledge. Once on the ledge, jump up to grab the animal token.

Halfway through the level, you will be chased by Gnarly. When you get to the edge there are three vines. Jump to the middle one with the bananas, and go straight down. In this bonus level, jump on all the Klap Traps.

## ORANG-UTAN GANG

The Orang-utan gang is very difficult, and it will probably take you quite some time to figure out all the secrets there. There are a lot of secret areas that can be accessed by using the barrel method. The hardest secret and the most rewarding is the Espresso secret. Grab Espresso and go to the ledge where there is a Klap Trap and a DK barrel. Get a running start and flap your wings as fast as you can to the left until you reach the ledge. Happy flying!

## CLAM CITY

The Clam City level isn't that tough as long as you have En Guard on your side. When you see the first clam in the level, go straight up and take a left. There's an invisible section in the wall that will take you to your pal.

# SPECIAL FEATURE!

## NEW JUNK CITY

# A

The toilet warp is a good way to skip most of Level One so that you can get on with the rest of the game. The letter A on the map is where the warp starts and B is where it takes you. You can then load up on ammo so that you can fight the mid-Boss.

This is where you enter the warp that will take you to the mid-Boss.

When you come out of the warp, there is a lot of ammo to ready yourself for the Boss.

With all of the ammo you picked up, the Boss is not hard at all.

# EARTHWORM JIM

Earthworm Jim is without a doubt one of the best games for any system of all time. The flawless game play combined with the huge world of fabulous graphics and sounds sets a new standard for action games. On the pages that follow, you will see just a few of the levels and codes that comprise this huge game. Get ready to go on the adventure of a lifetime with the most unlikely hero of all time, an earthworm with a machine gun and an attitude!

## Chuck & FiFi

**B** Chuck is the first of the big Bosses who you will find in this game. Knock the boxes on the spring to hit him. You might even want to try out the spring for yourself!

Shoot the horns he tries to drop on you while you wait for the next box.

The only thing that will hurt this Boss is the boxes, so don't try to shoot him.

After you hit him, he will start to vomit. Stay under him to be safe.

# Down the Tubes

## The Queen!

On the last level you will run into the Queen herself and is she ever ugly! Incidentally, she is the twin sister of the beautiful Princess What's Her Name who you are trying to reach. Before you get to the Queen, you have to fight your way through one of the toughest levels in the game. If and when you do reach her, you will have to figure out the secret to killing her. I won't tell you how but I will tell you to pay special attention to the dripping things that are all over her.

## Secret Codes!

This game is packed full of codes and secrets that are sure to keep you guessing for hours. Here are just a few.

### Sheep Trick

There will be spots in the game where you will hear a sheep baa and then you will see a pixie fly around Jim's body. When this happens, it means that you have just triggered a secret and now an icon or a new place has been made available. After you trigger one of these things, be sure to look all around you before you move on.

### Practice Snowman Genesis

At the beginning of the first level pause the game then input the code to go directly to the snowman for some practice!

**R,R,R,B,C,L,R,A**

### Go to Heck Super NES

At the beginning of the first level pause the game then input the code to go directly to Heck, skipping the first level!

# SPECIAL FEATURE!

## NAMCO DISCUSSES THE MAKING OF RIDGE RACER FOR THE SONY PLAYSTATION

EGM had the privilege of going behind the scenes with Namco's top brass to learn all of the details in the making of the arcade hit—Ridge Racer—for the PlayStation.

The hot arcade hit Ridge Racer will be one of the first games to be out for the Sony PlayStation!

**Q:** How long did it take to develop the original arcade version of Ridge Racer?

**KS:** It took about eight months.

**Q:** That's odd!

**KS:** That's for making the software itself. As for the hardware, including the basic research for developing the System 21 and 22 boards, the whole thing took about six or seven years. Once we developed the System 22 board, we decided to develop Ridge Racer. That took eight months.

**Q:** How about the development period of the PlayStation version?

**SY:** About the same length of time. Development got under way in a significant manner in April. So, six months to seven months.

**Q:** Is the PlayStation an easy platform to translate your coin-op games?

**Q:** Not really. Our System 22 arcade board and PlayStation are radically different, so it's not especially

easy to port the game over.

**Q:** So you had to start from scratch?

**SY:** Essentially, yes.

**Q:** Could you use existing data?

**SY:** Well, in a way. Because it is a translation of an existing game, it's not the same as making an entirely original title. But overall, including basic data, we had to redo the programming from scratch.

**KS:** Of course, the number doesn't necessarily stay constant for every frame. But we did push the performance envelope to the max with the arcade version.

**Q:** Okay, then for the PlayStation version, how many polygons are shown per seconds?

**SY:** The thing is because the architecture of our arcade board and PlayStation are different, the way polygons are used in the two versions are somewhat different. So it's not really possible to give precise numbers of polygons because the comparison won't be on the same level. In PlayStation's case, Sony claims that it can display 360,000 polygons per second.

**Q:** Does Ridge Racer approach the performance limits of PlayStation?

**SY:** That's a hard question. It's our first PlayStation soft, so we're not really sure about the performance potential of the system. Once we get more used to working with PlayStation we'll have a better understanding about how many polygons we can display. Plus, depending on the programming techniques, the number of polygons will change. But we do think that we have used much of PlayStation's performance potential.

**Q:** How big, in megabits, are the arcade and PlayStation versions?

**SY:** Well, the PlayStation version, being a CD-ROM, can hold 540 megabytes of data. But we didn't use all of that up. That's right.

**Q:** On the arcade Ridge Racer 2, there is a Two-player Option using two systems. Is it possible for you to develop such a sequel using PlayStation's Two-system Interface Option?

**SY:** That's a matter we have to consider from a technical aspect. Sony has said they will release a connection cable for hooking up two systems. But to do that, you have to also have two TV sets, so we don't really think there would be much use for it. Personally, I don't think people would be willing to haul another TV set over to play a two-player game. Generally speaking, I don't think there are too many Japanese households with two TV sets side-by-side.

**Q:** Well personally, I would love it.

It if you could make that option available for Ace Driver or enable four-player matches on Cyber Sled.

**SY:** We'll take that into consideration (laugh).

**Q:** So you're not considering the possibility of connecting two systems?

**SY:** No, no, it's certainly a consideration, but for our first three PlayStation titles, we haven't made use of that feature.

**Q:** Is the soundtrack of Ridge Racer identical for the arcade and PlayStation versions?

**SY:** Because the systems are not identical, we can't use the sound data as is from the arcade version. But the soundtrack is essentially the same.

**Q:** Is there a sound test?

**SY:** Yes, there's a Music Play Mode so you can just play the soundtrack.

**Q:** I see the PlayStation version has four cars you can choose. Do these have identical performance specs?

**SY:** No. For example, there's one with excellent top speed but with weak grip. In contrast, another one has a lower top speed but with superb handling.

**Q:** Can you alter the performance specifications of these cars using an Edit Mode?

**SY:** That's not possible.

**Q:** So the infuriating yellow Lamborghini is tuned the same way as the arcade version?

**SY:** Yes, it's the same (laugh).

**Q:** With PlayStation's analogue controller, it may be difficult to control the brakes and accelerator precisely since they are on or off. Will your NeGcon controller address this problem?

Some of the key people from Namco: Mr. Shigeru Yokoyama, General Manager (left); Mr. Kouichiro Shigeno (center); and Ms. Taayumi Toyoda (right).

**SY:** Yes, we think our optional controller will give a more analog driving feel that will be much more subtle.

**Q:** Do you have any plans to develop Ridge Racer for other game systems such as Saturn?

**SY:** We haven't made any decisions to do so.

**Q:** We saw the arcade Tekkan (tentative) at the Electronics Show and were impressed by its looks. Can PlayStation match that level of graphics?

**SY:** The version you saw wasn't complete, and it will still be significantly improved. The PlayStation version should be able to achieve the same level of graphic excellence when it is released next spring.

**Q:** Will your joining Sony as a PlayStation licensee alter the composition of your business?

**SY:** Not really, since we don't have our own home system, we will consider all game systems for developing software. So no, we won't be only doing PlayStation software from now on. Of course, we do have to go with systems that make sense as a business. For instance, we just announced Star Blade for 3DO for a December release.

**Q:** We understand that PlayStation Ridge Racer is extremely inexpensive at

under ¥6,000 in comparison to the ¥8,000 to ¥10,000 price tags of 16-Bit cartridges.

Well, CD-ROM is inexpensive to produce physically. Also, as a maker of software, we think the prices of cartridges are too expensive. But the price we set for Ridge Racer is pretty tough for us. That said, the ¥5,800 price we set should have a strong impact on players. We hope to achieve the same sorts of prices with Cyber Sled and Star Blade, but we'll have to see.

**Q:** But even if CD-ROMs are inexpensive, doesn't the larger software entail higher development costs?

**SY:** It certainly does, but since we want the system to become solidly established, we kept the price down. So we took the plunge in hopes of becoming a price leader.

**Q:** How about a message to your fans at EGM?

**SY:** Like the old saying, "A picture is worth a thousand words," we believe that if you see the PlayStation Ridge Racer in motion you should be able to see that it isn't just a pale imitation of the arcade version. We would be delighted if you would buy it, play it and enjoy it!

## NEC LAUNCHES NEW PC-FX GAME SYSTEM!

With all the new video game systems being launched in Japan this holiday season, EGM traveled to Tokyo to get the inside scoop on all of them. This month we visited NEC to learn more about their PC-FX system.

Originally, we thought that this machine was supposed to be a 32-Bit next generation system up from the PC Engine, but PC-FX seems to have moved closer to the PC 9800 series personal computers rather than a game machine.

I believe you got that impression because of our announcement that we will be releasing an optional interface for using the PC Engine Duo as a PC CD-ROM drive, but we decided against releasing them because not many PC games are designed for use with single speed drives any more. So, we weren't focusing on making PC-FX a personal computer-type machine. As you know, PC Engine's games often use animated cinemas. So we wanted to develop a system that could provide top-notch visual performance at high speed. So rather than evolving toward personal computers, this machine is a direct evolutionary descendant of PC Engine.

**Will there be more emphasis on 3-D type games with polygon graphics?**

PC-FX is capable of doing that. The game machines of other companies are equipped with polygon processors that handle all the calculations for rendering 3-D graphics. We haven't adopted such an approach because the concept behind our system is different. If we adopted such a chip, we would have faced certain

Mr. Tetsuya Iguchi, Manager Planning Division at NEC, explains the special features that will be in their PC-FX.

limitations in terms of overall cost. For example, the number of polygons that can be displayed in a second could be limited to so many tens of thousands or whatever. So when there are limitations, like say with Virtua Fighter, the figures aren't very smooth looking with a blocky appearance overall. So graphically, it's not very beautiful. Plus polygons are popular now, but we're not certain if they will remain popular in the future. Our system is designed to enable instantaneous playback of graphic data contained on CD. This graphic data can certainly be composed of polygons. The big difference is that we can put highly-detailed graphics made using a workstation on CD and call it up as a complete picture. With a machine that calls up polygon data for processing inside the system, the number of displayable polygons is limited. In contrast, with our system, we can accept beautiful, preprocessed graphics and play them back immediately. Of course with a system that has a polygon processor, it is possible to rotate graphics and so on to alter vantage points. In our case, we have to have that graphic data available and call it up from CD. So that is our system's drawback. But in

terms of visuals, we can provide high quality graphics. If you would consider for a moment, all games are composed of moving pictures. Even if a game uses polygons, it ultimately is still a two-dimensional image when you see it on TV. That's why we put the most emphasis on high speed animation playback. If a system has a large memory base and high-speed animation playback, then it would be smarter to simply playback created images rather than creating images on the fly. Of course, the system as it stands isn't fast enough physically. For instance, the CD-ROM drive isn't quadruple speed, so it does have drawbacks in creating 3-D worlds. But when the system gets faster, it would be better to simply summon forth great graphics from CD instead of creating polygon graphics.

**Is PC-FX backward-compatible with PC Engine?**

It isn't compatible with PC Engine software.

**What's this machine's market? Are you going to convert PC Engine users to PC-FX?**

The targeted age segment is somewhere higher than for PC Engine. We think some people will move up from PC Engine, some will shift over from the personal computer market, and because of this machine's graphics capability, we think new users, for example fans of anime, will be attracted.

**What kind of games will you be offering?**

We have mah jong, baseball, pachinko, racing games, an RPG, golf games, pro wrestling games, simulations and many others coming. We're especially proud of what our machine can do with golf games. Compared to 3DO for example, we can output far more beautiful graphics. You see with PC-FX, data read from CD-ROM doesn't have to go through the CPU bus for processing. It has a separate independent bus for visual playback so we can show high-quality, full-color graphics at a high rate of 30 frames per second. For a system using a double speed CD-ROM drive, this machine probably has the best graphic playback quality. Another thing: for compressing image data, this machine uses JPEG rather than MPEG so we can obtain better graphic quality. JPEG is for compressing still images rather than MPEG which is for compressing movies. Obviously, JPEG is a "heavy" format, so it takes longer to decompress than MPEG, but it does provide a better picture quality frame

by frame. However, our system is so fast, we can achieve decompression of JPEG still images at the rate of 30 frames a second.

**If you're going after an older audience, is your competitor a 3DO-type machine?**

We believe our machine delivers better performance than 3DO.

**One advantage 3DO has is it has a lot of licenses that can release a lot of software.**

Well, starting with hardware performance, without a doubt our machine provides better animation playback performance. As for software, yes certainly 3DO has more software in overall numbers. For instance, if you look at the Japanese market, there's a considerable gap between big sellers and non-sellers. The software that does sell is limited in number. It's not about the quantity of software; it's about the quality of software.

**Will you be able to play arcade-type games on PC-FX?**

We're certainly considering them. However, we don't think that kind of game will become the majority.

**So this machine will have more PC-type games ported over?**

We think so. For example, there are many great PC games made in America with superb graphics on CD-ROM. We think our system is one that can enable easy translation of such games. There are many PC games in America that store graphic data on hard disk or whatever and summon them for display on the monitor successively. PC-FX is capable of that kind of performance.

**Are you planning on making this system compatible with IBM computers?**

We haven't considered that. However, even though the graphics data won't be entirely compatible because of different compression algorithms, the manner in which graphics are displayed is essentially the same, so it shouldn't be difficult to translate personal computer games. This machine is after all capable of full (that is 16.77 million) display at high speed.

**So you can do games such as Iron Hawk?**

Actually a different division in the company is working on a Windows

**Here's what the PC-FX system looks like, complete with CD on top!**

version for PC-9800, but we haven't done it yet for PC-FX. But it shouldn't be hard to do at all.

**Is this machine designed as a stand-alone computer or just an add-on to a computer?**

We're considering this as a stand-alone system, not only for games, but also music, edutainment and other types of software. We're also considering developing a keyboard for using this machine as a terminal for doing network communications.

**How are pre-orders for the unit?**

We should be receiving orders soon since the unit is coming out on Dec. 9, but we haven't determined the numbers yet. So we haven't arrived at how many units will be made available at the time of launch.

**So what is the incentive for some body with a PC-9800 to buy this unit?**

This machine has much better graphic processing performance than a PC-9800. Plus, it is a game machine that will let you play games that PC-9800 won't be able to do justice. It can let you play games, and with an optional interface, it can be used as a CD-ROM drive for PC-9800 computers.

**Why is this unit so big?**

As a means of differentiating this unit from those of other companies. By making this unit vertical, there is admittedly some wasted space. This machine also has three expansion slots. The expansion unit can be tucked away inside the unit. For example, there's a slot for a

back-up memory card at the front that can fully enclose the card. There's also slots at the rear and bottom. The bottom slot is for adding more main memory and the rear is a functional slot for optional units such as a modem.

**On a video CD interface?**

We're thinking about that, but we're not certain if there really is a market for video CD. With the machines of other companies, optional items in expansion slots will always protrude.

**Is this only for Japan?**

At present we're not thinking about exporting this machine to America. We are considering the possibilities, but a machine costing \$500 we don't think we'll sell if we said this is a game machine only.

**The standard controller for the PC-FX will have a six-button configuration.**

And we don't think we can merely sell it as a "multimedia" machine, such as Commodore CD-TV. 3DO also isn't selling at that price. So if we promoted this unit merely as a game machine, it won't be accepted in America. But it may be viable if we develop it as a system that can offer real benefits by being connected to a personal computer. We think the best use of this machine would be for playing back high-grade graphics in not only games, but also in the world of music and other kinds of software.

**How about the type for placement in a PC-9800 expansion slot?**

For a PC-9800 computer with a double speed CD-ROM drive, we are preparing a double decoder board version that fits into a single expansion slot.

**Are there a lot of PC-9800 units in Japan?**

It's the standard computer in Japan with over 50 percent of the home market. Cumulatively, approximately 10 million units have been sold.

## SPECIAL FEATURE!

I hope you've seen my Fact File on *Snatcher* in *EGM* #64. This CD is so cool that I thought you'd like to see a bit more of the twisted story line. As the resident *Snatcher* player, I've tried to give you an idea of what happens up to Act 2. *Snatcher* is a gigantic game, and even the most down-trodden cyberpunk will have a tough time making it all the way through. My opinion? *Snatcher* is a top-notch adventure. The graphics feature great art, and the audio fits very well. Unlike most CD games, *Snatcher*'s actors seem to fit their roles very well.

The interface may sometimes frustrate the player when an option doesn't appear when you'd like it to. One thing that really sets *Snatcher* apart, aside from its more adult content, is the string of jokes hidden throughout the game. The ramblings between Gillian and Metal Gear are a blast.

*Snatcher*'s story line is convoluted, and the culmination of elements found throughout give you a sense that there really is a Neo Kobe. There are plenty of hidden jokes and what-not to find, too! Try using the vid-phone and the J.U.N.K.E.R. computer to find these.

If I owned a Sega CD, this would be one title I would pick up. There's not enough of this type of game, especially on CD. Now I can understand the plot of my Japanese Super CD. This one is a must!

Acc J.U.N.K.E.R. Jean Jack Gibson has been killed.

You get your equipment in the Engineering section.

## CONTINUED FROM EGM #64

### THE STORY SO FAR...

You've been assigned to J.U.N.K.E.R., a law enforcement-type group that hunts down Snatchers. Snatchers are mechanical beings that kill and replace humans. (Not a very nice thing to do.) During your first investigation, you discovered the remains of Jean Jack Gibson. He was the best J.U.N.K.E.R. around. On

his body you found some evidence that could lead you to the Snatchers. He also had a few contacts for you to check on. Replacing Gibson, you must follow up what leads you can. Now the fate of the city lies on your shoulders. Can you stop the *Snatcher* menace before it's too late?

# SNATCHER

### THE PAPER TRAIL:

On Gibson's remains, you find a key and a note saying to watch a house. In his stomach you find some buffalo meat. Only a few places, if any, serve buffalo meat. This could be the lead that you have been looking for. While you're at it, why don't you go back to J.U.N.K.E.R. HQ, and search his office. You should then talk to Jack's daughter, Katrina, to find out what she knows.

Metal Gear  
We should investigate Jean's personal items. We must learn what he was doing before he was killed.

Check out Gibson's office back at J.U.N.K.E.R. HQ for some clues.

## GM's Nob Ogasawara interviews Mr. Yoshinori "Moai" Sasaki, assistant manager, R & D Dept. VI, Konami Co., LTD. and the "White Shadow" about the work on...

# SNATCHER

**Q:** Let's start with the easy questions. How long was the development period?

**YS:** I can't reveal that, but much shorter than you imagine. The original PC-9801 and MSX personal computer versions that were released about seven years ago took two or three times longer than an average game. I worked as the sound designer on those two versions.

**Q:** Did the original PC versions become hits?

**YS:** No, they didn't. They were popular only among main arcade players.

**Q:** If the original versions were only cult favorites, how did the home PC Engine version come about?

**YS:** Although they didn't sell in big numbers, it was received with phenomenal reviews and made quite an impact among Japanese game players. The people who played the game couldn't forget it and they demanded a conversion to home systems. Unfortunately, the original game was on several 100 tapes. Because of its size, we couldn't fit it on a ROM cart. It just so happened that the PC Engine had a CD-ROM system available, so it was chosen as the system for the first home version of Snatcher.

**Q:** If the originals were on floppies, did they have recorded speech?

**YS:** No. We did put in sound effects to represent the speech though. At the time, it was all we could do.

**Q:** So CD-ROM made it possible for you to use recorded speech?

**YS:** That's right. We were able to put in real speech and background music for the first time. Also, the original PC versions ended at Act 2. We were planning on doing Act 3, but we went far over the allowed development schedule so we had to give up on it. We didn't get the opportunity to put in Act 3 until the PC Engine version. We were being criticized in the company for making a game that was too long, but we were lucky enough to have the PC Engine become a big hit. Although I can't reveal how many were eventually sold, it was a monster hit for a PC Engine game.

**WS:** Yeah. As a matter of fact, it was so popular it still makes *Famitsu* and *Toshin* Magazines "Reader's Best 20" games chart even two years after it was released.

**Q:** How did the Sega CD version come about?

**YS:** I got Konami involved in the development software for the Sega CD. We first released *Lefty* on the Sega CD. After that we considered doing an FMV-type game like *Night Trap*, but we reached the conclusion that it was difficult to take that route. We thought it would be perhaps better to make a more interactive kind of game for overseas. Since *Snatcher* really impressed gamers in Japan, we wanted to impress game fans overseas in the same way.

Another thing, we weren't totally impressed with the PC Engine version, so we wanted to make a fully realized version.

**Q:** How many people were used in recording the voices in the games?

**YS:** Seven.

**Q:** That's all?

**YS:** Surprisingly, isn't it? There's two hours and 29 minutes of recorded speech and 26 different characters' voices in the game. We got some super-talented voice actors and I guarantee that you can't tell that any of them are doing more than one character.

**Q:** We noticed several changes from the PC Engine version such as the clientele of Outer Heaven Club.

**YS:** Obviously, there's the issue of copyright. That was the prime concern especially for Outer Heaven Club, in which the PC Engine version featured Kamen Rider and Giger's alien. The characters we used in Japan cleared copyright hurdles, but we thought there might be a problem in America. So we took White Shadow's advice and decided to use Konami characters instead. I actually worked out to be hilarious (haha). If you want to know who White Shadow really is, buy the game!

**Q:** Have the sex or violent scenes in the PC Engine version been cut from the Sega CD version?

**YS:** We haven't cut scenes, but we have made some alterations. In Act 1, when a certain girl gets killed, her bosom becomes unclothed in the PC Engine version. We decided the scene was too much, so we covered her up.

**WS:** There's another character called Katherine who was aged 14 in the Japanese version, who's shown naked in the shower. We decided that's a bit too young, so we aged her up to 18 and covered up her nudity for Sega CD.

**Q:** So how is the game rated in America?

**YS:** For the States it's recommended for players 13 and up. But in Europe it's for players 18 and up.

**Q:** Really? I thought Europe was much more lax about nudity than America.

**YS:** But in Europe they're more worried about violence. In America, they're not so concerned about violence, but nudity is out.

**Q:** How difficult was it to port over the Japanese PC Engine version to Sega CD?

**YS:** Most of the difficulty we encountered was in translating the text. We've never had to do this much translation of game text before. We were surprised at how difficult it is to do it. I didn't take a long time, but it cost a lot!

**Q:** When you translate text, I imagine a lot of word play and puns ended up being edited out.

**WS:** I rewrote a lot of stuff.

**Q:** Did most of the scenes that had to be altered involve nudity or sex?

**YS:** Yes, one scene we had to cut. In the original, a robot watches a sex film and gets a bit rowdy. The sound effects were a bit much. As for violence, we didn't fix much except for one scene in which a dog dies.

**WS:** The PC Engine version showed a dog with its guts hanging out. It wasn't quite dead, you can see it twitching even its innards. We were afraid of the ASPCA. Although we retained the scene, we stopped the dog's twitching so it's just dead, not dying.

**Q:** This game has an adult feel to it. Will you be doing more adult-oriented games?

**YS:** We never made a conscious effort to develop a game for adults. We wanted to make a good game, and it turned out that this particular good game had a mature feel. We doubt we'll be deliberately developing games for mature audiences. We'll first just develop a game, and then decide to whom we should present it.

**Q:** In porting over the PC Engine version, were there major technical hurdles?

**YS:** On-screen colors. The PC Engine could show 256 colors simultaneously. Sega CD, despite being a CD-ROM machine, could only display 64 colors. The difference is obvious. By applying a software technique, we managed to increase the on-screen display colors to 112. We also changed the color palettes around so we're happy about the display quality.

**Q:** Were there software heroics involved?

**YS:** Yes, it pretty well killed us (laughs).

**Q:** Were any changes made to the story?

**YS:** No. The ending part has been changed somewhat. There aren't multiple endings, but you are graded for how well you solved the mysteries. Plus Act 3 has been a bit more significant. We weren't totally pleased with the PC Engine version since it was too movie-like—just sit and watch. We wanted to avoid that and changed Act 3 so that it would be a lot more interactive as a game. We added a few more forks and choices to Act 3.

**Q:** In closing, would you like to say a few words to American players?

**YS:** This is a game like you've never played before on a home system. We hope it will make you cry and laugh.

## KILLER INSTINCT

**T**his game is exactly what its name implies—a killer! It borrows all of the best elements from the current kinds, including the finishing moves from Mortal Kombat II plus the combo display and fighting style of Street Fighter. That's not to say that the game isn't original. In fact,

it improves on some features in all-new ways. For example, you can now break a combo as well as a fatality move.

Combos are easier to do but aren't easy kills. You can choose both stage and music and much more. With all of these features, this game is going to be a hit just to look at this game and hear it boom is enough to get your heart racing and reflexes tensing.

## FEATURES FACTS:

Among the many unique features of Killer Instinct is the ability to come back from the brink of death. When your opponent has "won" and tries to finish you, just do a comeback move that revives you and lets you keep on going until you get hit again. In addition, there is a character and stage select never seen in any other fighting game. Along with these additions is a familiar feature character select from another famous fighting game.

It's not over till you die! There is still a chance to come back even if you lose.

## RANDOM SELECT

Just like in Mortal Kombat, there is a random character select. It's done the same way: Pull up on the joystick and press the START button to have the computer cycle through the characters. When you reach one you'd like to play as.

## STAGE/MUSIC SELECT

The first screen to select the stage. You can control the stage select by pulling down on the joystick and any button. The other player can then select the music they want. Either player can choose the corresponding soundtrack.

## DANGER=DEATH! OR HUMILIATION?

# DANGER=DEATH! OR HUMILIATION?

Borrowed from another fighting game is the concept of finishing moves. Just called danger in this version, they fill this new arcade hit with gore and humor. There are several ways to finish your opponent. You can perform a death move (fatality), a humorous humiliation (a kinder punishment) or a pit move that uses the stage itself to destroy your opponent. These pics show just a hint of what this game has to offer.

## THE PITS

Just like in MK II, there are some stages where you can knock your opponents to their doom. No secret move is required, just a strong attack to knock them out.

# K.I.—WHERE COMBOS ARE KING!

## BUTTON CHAINING

## QUICK MEDIUM FIERCE

Like most fighting games, combos are the most devastating way to take out your opponent. K.I. takes this to a new extreme with a multitude of Killer Combos. Using a new system of chaining buttons together, certain moves flow into each other. The buttons are joined together as follows: one and four, two and six, three and five. By hitting button two, three, six you will get an extra move. This new system makes for some incredible combos like the 10- and 20-hit Ultra combos. Here are just a few of the tons the game has to offer. Also, the name of each combo is screamed out at you when you pull it off. You'd think that the combos would be too deadly after a while, but there are ways to break them. Each character has his/her own combo break move that stops the chain of devastating combos.

<b>TRIPLE</b> 3 HITS	<b>AWESOME</b> 8 HITS
<b>SUPER</b> 10 HITS	<b>MONSTER</b> 18 HITS
<b>MYSTER</b> 5 HITS	<b>KILLER</b> 12 HITS
<b>BRUTAL</b> 6 HITS	<b>ULTRA</b> 22 HITS

Here is a list of the names and hit counts of the combos:  
3-Triple, 4-Super, 5-Myster, 6-Brutal, 7-Master, 8-Awesome, 9-King, 10-Monster, 12-Killer, 20-Ultra! You get to hear the name as you do it.

## COMBO CORNER

Try this combo:  
B, F, 3,  
2, 2,  
HCB, 3.  
If you  
get all  
the hits,  
it can  
be an

the end.  
If you  
miss,  
it's still  
an easy  
eight  
hits or  
more.

**AWESOME**

To even things out you can break those nasty combos—if you're good enough.

When done as a finishing combo, the Ultra hits are just pumped up. Try B, F, 3 B, F, 1 for his Ultra!

## TEAM EGM SCORES A HAT TRICK TO START 1995

Time to ring in the New Year, and we couldn't start it any better than with a Team EGM hat trick.

That's right. When most other gaming mags are hitting the post, we've turned on a red light not once but three times and put the biscuit in the basket. This month we have exclusive coverage on NBA Jam Tournament Edition, Tecmo Super Bowl '95, Special Edition and a first look at Sega Sports NHL All-Star Hockey and Road Rash III from EA for the Genesis. Sega has kept the fighting in their latest hockey entry, and although it's in the Blades of Steel-style of hockey fighting, it works very well. Just in time for the Super Bowl, this month Tecmo Super Bowl '95 will be released, and this game will be a Super Bowl-size contender. Younger gamers will be able to execute

the plays with ease, while experienced gamers will enjoy some of the unique features of the game.

Everybody is awaiting the awesome sequel to NBA Jam. NBA Jam Tournament Edition will rock the rim in a big way and will helicopter-slam gamers into another dimension of excitement. Of course, with this announcement and the holidays now over, the big Accolade marketing team is getting ready to put a full-court press on the rest of the league. The game is set to be released sometime in March, and the Iceman is chomping at the bit to get his hands on this game—it's his favorite.

Sega Sports is serving up ATP Tour Championship Tennis for the Genesis.

## LACE UP THE SKATES AND HIT THE ICE WITH ALL-STAR HOCKEY

This month we take a look at two on-ice entries in the world of hockey.

Sega Sports has given us a look at NHL All-Star Hockey, and they have included a fighting segment of all things. This game is hockey the way it's supposed to be played, and for all of those do-gooders, fighting is an option that can be turned on or off.

A scouting report is available on each team and the game features an NHL Player's Association and an NHL license.

All of your favorite NHL players have been included, and the All-Star Team Mode is awesome. You can choose the East or West All-Stars and have at it. Each of the players on the teams is rated in different categories.

The second entry in hockey's run for the cup is

Brett Hull '95. The game has all-new player animations. Al Michaels is in the booth calling the play-by-play.

Accolade's Brett Hull '95 stresses the fundamentals of a good hockey game.

The future hall-of-fame announcer is also the voice of Monday Night Football and he can also be heard in HardBall III. He calls the game as he sees it during play. The dialogue makes the game even more exciting.

The play-by-play is crisp and clear, plus he doesn't say the same phrases over and over. The game also allows you to take part in a three-, five- or seven-game playoff format. The game stresses the fundamentals of hockey: skating, passing and shooting. This year, you can use drop passes and Brett Hull's super powerful wrist shot.

## YOU'LL NEED SKIN CREAM WHEN YOU SEE ROAD RASH 3!

You're going 200 mph, and you see a cow in the middle of the road. Splat, n' burger meat. And you're falling behind the leaders. Jump back on your bike to try to regain some valuable time.

Road Rash 3 from Electronic Arts is here, and we have the whole story on the sequel to one of the greatest motorcycle road-warrior games ever made. You won't be disappointed.

The game has all-new tracks, and some new features for you to explore this

time around. EA has even included a few surprises. So be sure to check out this game as part of this month's action-packed Team EGM sports coverage.

I've already given the Iceman a mouthful of pavement a few times,

and we just got the game in.

Switching gears, EA Sports is bringing out Madden '95 for the Game Gear

and the game features everything that made its 16-Bit Genesis console cousin a smash hit. For gamers on the go, the Game Gear version of Madden scores a touchdown with a two-point conversion.

This month, we also come off of the top rope and take a look at WCW Superbrawl for the Super NES by FCI. If you love the

new look of the WCW, then you'll enjoy taking to the ring with some of the WCW's best wrestlers. We get a strangle hold on this game for you.

TEAM EGM EXCLUSIVE!

There you have it, Team EGM's coverage of gaming's Wide World of Sports.

Glad to have you back for another year, and what a year it's going to be with NBA Jam Tournament Edition coming out on all systems, with quite possibly a version for the 3DO. EA Sports is definitely working on a version of NHL Hockey for the 3DO. EA also has a Muhammad Ali Boxing game in the works for all of the 16-Bit and 32-Bit platforms. The game is being programmed on Silicon Graphics work stations and will be polygon rendered with fully texture-mapped characters. This means that the boxers will look real and not like Virtua Fighter clones. Enjoy this month's coverage, and the Iceman and I will be back in 30 days with another look at sports.

## TECMO WINS SUPER BOWL COIN TOSS AGAIN

Howdy sports fans, time to kick off with another gridiron entry. This game is a candidate for this year's super bowl of gaming. Tecmo Super Bowl II has all of the ingredients

that an avid football fan looks for in a game.

With an official NFL and NFL Player's Association license all of your favorite teams are in the game, complete with logos and actual player rosters.

Play against the computer or against a friend. With the NFL action heating up, you can play out the playoffs and the big game using the teams you think are going to go all the way.

The Tecmo animations have also been refined, and are better than ever. When you get through to the opposing quarterback, an animated segment appears showing the defensive player's name, along with a celebration picture.

The same holds true for diving catches close plays and after you score a touchdown, the player's name appears on the screen, and he can be seen celebrating with a teammate. This unique

## THE JAM FEST CONTINUES ON THE TOURNAMENT EDITION

Okay, here's what everyone's been waiting for. The sequel to NBA JAM has finally come thanks to Acclaim. The approximate date of release should be around March 1995.

Clearly named NBA Jam The Tournament Edition and straight from the arcades, the game plays so much like its Super NES predecessor

## ACCLAIM ANNOUNCES MORE JAM FOR YOUR MONEY

The Sega Genesis welcomes the sequel to the highly-acclaimed sports title, NBA Jam. Like the first game, it features awesome animations of players shooting and dunking. Did someone say dunking? To add to the previous dunks, more high-powered dunks have been created.

But that's only the beginning, as this version features a lot of the greatest basketball players from every team in the league. Your roster to select from has been

increased. You may notice that the trades among the clubs are reflected in these rosters. Now you can see the different players traded to other teams, how they are placed in that team and see the new rookies in your lineup. With the already awesome dunks in the first version, more awesome high-flyin' backboard-breaking dunks have been produced. This is NBA Jam, after all.

Unlike its predecessor, more statistics

More players are here as well, so you can pick from more than two characters from your team... swapping the roster as I recall, deciding to see who you want to be on the court. Most of the trades between teams have taken place, assuring you the updated teams and players in the league.

## TOURNAMENT NBA JAM EDITION

are involved. In this edition, you'll get to see more stats on players like passing ability, power, clutch play and injury. These stats will be based on numbers rather than a bar in the first NBA Jam.

Four players are included. As for codes and other tricks popping out, look in later issues of EGM.

Like the very first game, stats are included to lend realism to the game. The stats are based on their NBA standings and skills. These skills are shown to you in numbers to give you a general idea of how they perform on the court. This newest version features new skills, power of player, passing ability, clutch and injury you have caused. During halves you'll be able to see how many injuries you have caused. Not really an important stat, but it does bring up some trash talk on the side as well as frustration to the other team.

The release of this game will be around March 1995. Of course, this is only an early copy of the game and it is still in development. We will surely bring you more screen shots and info on this exciting new sequel. Buckle up for this one!

Detailed player modeling lets you see it all, whether you're scoring the match-winning try or just getting mauled on the pitch.

One of the coolest aspects of the new game is the music and a new sound FX chip that tosses out

Road Rash 3 has gone global, and you're invited to tour the world and race on seven international road tracks.

You brave the slick, wintry German roads, challenge pedestrians on the overcrowded streets of Japan and dodge wild animals on the African plains.

There are five tracks available per level. Each track has a long description that outlines the distance, and you get a glimpse of the terrain. Race the tracks in

the order that they come up or you can choose the order you want to take on the circuit.

As you progress in the game, you must upgrade your equipment to remain competitive. The Perro 125 is the bike you'll start out with and it won't stand a chance against the high horsepowerd cycles you'll face in the later levels. In the Bike Shop Menu, you can shop for a new bike in one of the three classes or as mentioned earlier, you can upgrade the bike you're currently using.

Rat Bikes are low-end racing machines, and you'll be lucky to qualify for a joy ride if you continue on these sorry cycles.

Sport Bikes are quicker, and as you move into this class,

## KEEP YOUR EYES OPEN!

you may need to adjust your riding technique, braking sooner and learning to keep your eyes peeled for oncoming cars, cows or other obstacles that can cause you to become road pizza.

The Super Bikes are the speeding bullets of Road Rash 3 and all you have to do is learn how to harness their power without crashing and burning.

One sharp turn can spell the difference between winning, wrecking and getting scooped up off the pavement with a shovel. This is a fast-action game from start to finish, and there's a number of new features that will keep gamers happy.

This game will kick gamers into high gear and into a new level of excitement.

In the later stages, the Super Bikes really move. Keep an eye out for lingering cows and fast-moving oncoming traffic.

ROCK-'EM, SOCK-'EM  
HOCKEY RETURNS

# NHL ALL-STAR HOCKEY '95

I went to a hockey game and a fight broke out. This game has a Fighting Mode that can be turned on or off. It's about time somebody took a stand, even if it's toe to toe. Purists of the NHL will find NHL All-Star Hockey a pleasant trip down memory lane. You don't get a fine for going toe-to-toe with another player.

All of the NHL team logos, complete with up-to-date rosters, are included in the game.

A Scouting Report begins each game showing you how your team compares to the opposition. Your team's report is based on coaching, conditioning, skating, passing, shooting and under-pressure categories.

The game play is fast, and it plays much like the real game. The fundamentals of the game are intact and are there for you to master: skating, passing, shooting and scoring is the name of the

game. The puck moves realistically, and the player animations are larger than average. Laying the body on the members of the opposing team is the name of the game. A good defense makes for a good offense.

Don't be afraid to take the man, or you'll get scored on quickly and often in this

one. You can block shots, intercept a pass or knock one of the members of the opposing team for a loop.

An overhead view on faceoffs gives you a fair advantage and a clear view when the referee is about to drop the puck. You can also choose from an exhibition game, a full season, new playoffs or a new play-off/best of seven series.

## BULGE THE TWINE AND BECOME AN NHL ALL-STAR

See how your team stacks up against the opposition in six different categories.

You can also turn penalties or line changes on or off. Another unique feature of the game allows you to have the computer automatically change lines for you.

You can also control the goalie yourself or have a computerized netminder tend goal for you. Each of the players in the game has a rating out of 100, with all abilities taken into account: intelligence, strength, speed, skating, passing, shooting, offense, defense, checking and game smarts being among them. You can go through each team and look at Gretzky's ratings and compare them to some of the lesser lights of the NHL. Grab your controller and head for the ice, but keep your head up or it will get taken off with a bone-jarring body check.

One good turn deserves another. If you enjoy rock-'em, sock-'em hockey, you'll enjoy throwing your weight around in this game.

## GO AROUND THE GLOBE COMPETING AGAINST THE BEST

Put on your tennis gear and get ready to compete against the very best in the ATP Tour where you'll go around the world entering tournaments to be ranked number one in the world.

The game is comprised of an Exhibition Match, Exhibition Tournament and an ATP Senior Tour Event where you compete against the best from the past, and begin or resume an ATP Tour. As you begin the ATP Tour, you play as a no-namer. You first have to create a character by customizing his name, date of birth, country, height and weight. You'll also have to decide which hand your

player is comfortable using and skills on both forehands and backhands. You'll be given 10 ability points to customize and develop your abilities. As you win tournaments, you'll gain more ability points, whether it's for your serve control, forehand power or footwork speed. After all of these options, you'll be taken to a list of tournaments for 1995. You'll go through each of them deciding if you want to compete in it or skip it. It's best to compete in the early ones to gain more ability points and receive money for your winnings, sending your rankings in the top 10.

Invite some friends over to play doubles. In the Doubles Match, you get to use the real pros and play against two others.

In the first tourney you enter, you'll be seeded last in the brackets. Work your way through the bracket in hopes of entering the finals.

Playing the game takes some time, as you must time your hits, both your backhand and forehand strokes. Try practicing on a hard court to get your timing down before entering a tournament. The players in the tourney have more precision than you do in the beginning. The more ability points you gain, the better you will be in the tournaments.

This game features multplay, which allows you to play up to four players at once. In the Exhibition Match, the computer will pick your players from today's real pros. You can set your game speed, change the court surface and play one-, three- or five-set matches.

This game is still in production, but by the looks of it, tennis fans of all ages will enjoy spending time with this one.

Master your strokes, as you will need them to defeat the higher-seeded players.

## HE SHOOTS! HE SCORES!

Good day, and welcome to the latest Sport Accolade entry into the hockey genre. Al Michaels is behind the microphone again this year, and Brett Hull is still one of the best players in the game.

The player animations are bigger and the NHL Player's Association license is a real plus for fans of the NHL. If you love

is incrediole, and it really gets you into the game. But if you get tired of his voice or the sound effects, you can mute them by selecting mute on the Options Screen

When you stop your player quickly, you can see a stream of fresh ice fly off of his skates. Attent on to the finer aspects of the game, including the realistic bounces of the puck, add to the enjoyment of Sport Accolade's latest hockey product.

The voice of Al Michaels enhances the game. You feel like you're on the ice.

The different organ music in each of the arenas combined with the crowd noise adds to the realism of the game. You can lay out members of the opposing team with some big-time hip and body checks that will send them reeling and heading

for an ice bag and a trip to the jacuzzi.

The player animations have been worked on and are bigger than last year. The play control has also been improved

the game of hockey and enjoy fast-action sports games, you won't be disappointed with this game. Al Michaels, a future hall-of-fame announcer and one of the hosts of *Monday Night Football* really adds to the game and makes you feel as if you are actually on the ice participating in the play. ## HOCKEY'S FUNDAMENTALS STRESSED IN BRET HULL 2

You can play a single exhibition game or a full season, choosing from either two-, five-, 10- or 20-minute periods.

The basics of hockey (passing, shooting and skating) are stressed. You can't just sit down with it and in 10 minutes have the score 9 to 8 like you can in some other games. Just like the real game, you have to learn how to pass, skate and shoot, and it takes some time to become good. Brett Hull even pops up between periods to give you advice on how to outwit the other team and what he thinks you can improve on either to catch up or to stay on top. Hockey purists will enjoy this fast-paced hockey game

Hockey's been one of my favorite sports, and I love to play it on these systems. Brett Hull Hockey lacked a bit of game play, as it was hard to control your player's movements and shooting ability. The atmosphere of the stadium comes alive with lifelike cheers and exceptional graphics. It will take a while to get use to the controls; it could have been better.

Excellent sounds and realistic bounces will make hockey purists take to this game. The game starts out slowly, but it grows on you. The mechanics of hockey, skating and passing are stressed. You can lay hard body checks on your opponents. It's an improvement over last year's effort. It's still hard to score, but it is fun to play. Brett Hull fans will love this game.

## TIME TO TAKE A RIDE ON THE WILD SIDE

Time to go up through the gears and saddle up on one of three awesome motocross dirt bikes. The game is full of hairpin turns, and all 12 tracks are very challenging and a lot of fun. You can go it alone or compete against a friend.

The object of the game is to place first, but the other 11 racers you are tossing mud

against will see nothing wrong with elbowing you in the chops or kicking at you to try to knock

you off your bike. For shame, but it's a nasty world out there, so get ready for some rough riding.

You can take off on one of three bikes: a 125-cc motorcycle that doesn't have much speed but has decent power for those tough hills.

The second bike you can choose from

is a 250-cc powered bike with a good combination of speed and power. Your third choice is the Super Bike, and this bike is only for the strongest riders. You can get up some incredible speed with this bike, and you will have power to spare. This bike will allow you to leave the other racers in your dust.

You can race on each of the 12 tracks individually, or you can take your chances in the Season Mode.

In the Season Mode, compete on each track three times for a 36 race total. In a One-player Season Mode, you must place first, second or third to move on to the next track. The winner of the season will be awarded money, and everyone in the top 10 will get a cut of the overall purse. The Password Mode will allow you to start the 36-race season and then

## SEGA SCORES ANOTHER TOUCHDOWN WITH NFL '95

The Game Gear is still showing some light as games from Sega like this one prove that this portable system will be around for a long time

NFL '95 has taken its name from the Genesis version. It may not have the exact 16-Bit

quality, but it does produce some

pretty neat features that boost the aspect of the game. The playbook is comprised of a variety of plays from the offensive and defensive point of views. The plays are laid out pretty well showing your players' assignments and routes.

On the field, eight players are on each side. Even though the teams are reduced in size, they are comprised of real NFL athletes. People who are not used to playing with small characters may have

to get used to the controls while maneuvering your player and running and passing downhill.

NFL '95 is full of

referee animations giving signals of first downs, delay of game, etc.

After practicing and taking down the computer for some games, why not enter the season and see if you can reach the playoffs? During the season you may check your standings and see the rankings throughout the league.

Overall, NFL '95 is packed with everything you want in a football game.

## ICEMAN'S SNEAK PREVIEW: MADDEN '95 BY ELECTRONIC ARTS

Always in a Madden game, choose from a variety of plays from his playbook.

If you've seen the early Madden game for the Game Gear, you should look again because this year's version has vastly improved graphics, and the perspective of the field has changed. Of course, the plays in the playbook have been revised, with newer plays added. This game will feature all of the teams from the NFL. Stats of teams and their players are updated to bring you closer to the real thing. Enter the season or play-offs and go for the Super Bowl. Stay tuned to later issues of EGM for a more in-depth look at this Madden fest.

In Home Improvement the game, Tim becomes the action star that we all know he could be. The graphics are good and so are the sound effects. Tim controls well, although it can be hard to deploy your grappling hook while jumping. The levels are very hard, sometimes too hard. The musical score is well done, with the theme song sounding just like the one from the TV show. Tim's weapons are cool and the more you collect, the more powerful they become. The Bosses, especially the Second Level Mummy, are on the hard side. Just when you think he is dead, his head comes back to life and floats around trying to kill you with his energy-firing eyes.

## Set 1: The Jungle

Set One takes place in a prehistoric jungle. You must find five boxes in each of the first four stages. You'll have to battle flying pterodactyls, dinosaurs, big bugs and more. Just when you think it's all over, you'll have to battle a huge dragon.

## Set 2: Ancient Egypt

Set Two is Ancient Egypt. You have four levels of multiple staircases where you must retrieve six boxes. Battle cobras, scorpions and a fire that follows you around. The Boss is a mummy who shoots energy from his eyes.

## Set 3: The Haunted House

Set Three is a haunted house where you'll face four levels of terror. You will have to battle little spiders, bats, walking suits of armor and ghosts to retrieve your seven boxes. The final Boss is none other than Count Dracula.

## Set 4: Future World

You've made it to the fourth and final level! You must battle spider robots of assorted sizes. Collect eight boxes of tools to complete the last of your stolen tool sets. The Boss is a giant machine that shoots a variety of weapons at you.

**T**he Ignition Factor is a new game by Jaleco that is definitely hot! You play as a rookie firefighter, and it's time to save some lives. At the start of the game, pick your stage and then listen to the briefing. At the briefing you will learn what happened, what your mission is and what kind of conditions to expect. Listen carefully so that when it comes time to pick the equipment that you are going to use, you won't be caught without something you need or stuck with something that is useless. Then it's time to go in and face the fire!

### THE GOOD

This game is a lot of fun to play, and it just gets better as it goes on.

### THE BAD

Sometimes you get penalized, but they don't explain why.

### THE UGLY

## The First Levels

### Bradshaw Steel Mill

The first thing you have to do is find the main computer, so you can reactivate all of the doors.

Try to find and save everyone before the fire gets too bad.

At the beginning of the game, you have to decide between two different stages, either Bradshaw Steel Mill or Pygmalion Productions. Because these are the first levels they are not too difficult but they do teach you all that you will need to know to beat the later levels. After you finish one stage the other one will be waiting for you. So don't worry; you won't miss a thing!

### Pygmalion Production

The rope can get you across big holes in the floor, so swing carefully.

Sometimes people have passed out. Spray them with your fire extinguisher to wake them up.

## The Second Levels

### McGlowe Mine

Gas leaks have made the mine unsafe. Get everyone out fast!

After you finish the first two levels, you will be taken up to the next series of emergency situations. This time there are three of them, and they are more difficult than the first two. There is also a mission that in a mine where poison gas has been released but there is no fire—it is just a rescue mission.

### THE GOOD

The pinball theme makes a great game.

### THE BAD

The sound effects are terrible and the music needs help.

### THE BOLD

The clown face in Party Land makes me just want to barf.

## The Billion Dollar Game Show

On this show you will always come out a winner. How big you win is up to you. There aren't a lot of bumper areas that you can use to rack up some serious points. The game has plenty of ramps that will take you to those high-scoring areas.

Right below the area marked "lock," in the picture below, is one of those areas. If you are lucky enough to get in there you will be rewarded with 500,000 points. Nice place,

huh?! So it's time to make money!

# PINBALL Fantasies

## Party Land

Party Land is the first pinball game on the selection screen. The music is very annoying, and the points are hard to come by. A lot of the time when you first shoot your ball it will come straight down, right into the ball return slot. Unless you hit the ball with the upper flipper, you're going to lose the ball. In the picture below is a secret door that gives big points. The door is located under-

neath the food stand, but I'm not going to tell you how to get there. Go for it you party animal!

Pinball is back for the Super NES, and it's about time. The game is fairly well done. The sound is not up to specs, with the music for Party Land being the most annoying. The flipper configuration is a nice option, as is the ability to select the number of balls. The flipper control is good, with only a slight lag time between button pushes and flipper movement. If you like pinball but can't afford a machine, this is an excellent game.

The Option Screen holds an explanation for each of the options. This is very helpful especially when you just start.

# Stones Bones

Are you ready for a ghoulishly good time? You'll find it on Stones Bones. This has to be the easiest pinball game to score highly on. In all of the other pinball games, I had a hard time breaking 1 million. But in Stones Bones, I broke 200 million. There are three places that you want to reach to earn the big points. The first, in the picture below, is the Tower. It holds many bonuses, from an extra ball to 5 million points. The second area, also in the picture below, is the Screamer. Each time you go over the ramp, you get a scream. When you lose a ball, you get 100,000 points for each scream. The really cool thing about the Screamer is that the points carry over from the last round. The third and final area is the vault. Very big points await you in the vault if you are skilled enough with the flippers to get in there.

# SPEED DEVILS

Welcome to Speed Devils, the pinball game where speed is everything! This is another high-point pinball table. There are a lot of areas where

you can rack up points. You must use the top flipper to maximize your points. Light up the pit sign as much as you can to maximize your points. Then head for the off-road sign and bounce off the bumpers for some serious points.

**L**ow in the valley Eodon lies a small village where the Kurak people live. A while back the chief's daughter, Aie-a, was taken away by Darden the Huga. It is up to you as Avatar to help the tribespeople find the Kurak princess so order will be restored. The journey is long and hard but there will be help along the way. Your job is to grab as many different items and weapons as you can find as they will come in handy as the journey continues. Use empty buckets to gather hot tar along with strips of cloth to make fuses for hand grenades. Find and grind ingredients together in the mortar to create gunpowder. The best thing about this adventure is that you can take as many items as you wish without penalty. So, do you have what it takes to enter the Savage Empire? Play the game to find out. ### THE GOOD

There are so many items to find, such as a fire extinguisher and a wire screen.

### THE BAD

It's hard to tell where you're at in the deep forest. You don't have much time to react to enemies.

### THE UGLY

There are plenty of man-eating creatures lurking around—from cute little lizards to the flesh-tearing T-Rex!

Make sure you grab everything you see. Even if it's the paddle for a rift!

Just before dark a cave is found. What lies inside? It's up to you to find out.

## THE

# SAVAGE EMPIRE

Walking the bank is usually safer, but you find fewer items and occasionally run into a nasty sea dragon or pesky croc.

Search huts for emeralds, food and ingredients.

Savage beasts roam the land with every desire to attack! Among these are numerous giant ants and a huge triceratops with sharp horns.

Open crates to get powders and healing blankets.

These little guys look cute until they start ganging up. They have no qualms about bringing you down, so react fast!

Use your emeralds to buy the latest in tribal armor.

Deep in the forest lies an area full of useful items!

In each village there are many tribespeople milling about. Talk to as many as you can to gain information that could tell you which direction to go and areas to watch out for throughout your journey. Venture into each hut for helpful items, such as emeralds, the coin of the land. Use emeralds to purchase armor, shields and weapons.

Your journey will begin in the Kurak village in the hut of Intanya the shaman. He will give you totems and offerings to use in your spells. Use magic to help heal your wounds and gain spiritual power in such things as vision, knowledge, emotions and strength. The more ingredients you find, the more spells you can cast.

Find the chieftain of the tribe to discuss the whereabouts of his missing daughter. The Myrmidon are enemies of the Kurak who you will be fighting. Mighty beyond belief are their numbers and ferocity. You will have to travel far, so make sure you have all the necessities before taking off. Good luck!

## NORMAL GAME

The Normal Game involves our favorite bomber on an adventure to bring order to the divided world.

Destroy the orbs to get the broken piece.

There are some stages divided by a river.

Set a bomb to go off as soon as the other does.

## BOSS

The big creature that looks like a banana is just a decoy. Concentrate on bombing the annoying, little monkey moving around.

Knock out enemies and walls with the mine cart.

Some kangaroos can kick bombs over walls.

Beware of the volcano that spews lava rocks.

## BOSS

This Boss with the pyramid for a head will launch his fists. He also attacks by stomping the ground to stun Bomberman.

Stay clear of the bombs as they explode.

Many undersea creatures will make life tough.

Electric invertebrates will shock Bomberman.

## BOSS

This giant crab Boss is a real pain! If he's close enough, he will cover your bomb with one of his claws, safe from its explosion.

Get ready Genesis owners as video gamedom's favorite arsonist is now setting his bombs for the Sega system. Mega Bomberman explodes onto the Genesis with an all-new adventure, new stages, awesome power-ups and get this—he can now uncover eggs that hatch kangaroo-type animals! Each individual animal possesses different abilities from the rest. Some can kick bombs over walls, some can jump straight up to avoid an explosion and some can speed across the screen as well. Two modes can be played: Normal Game and Battle Game. The Normal Game is an adventure where Bomberman must go through five areas to save the world. The Battle Game is where you bomb it out with three of your buddies!

### THE GOOD

The four Superman upstarts that you get to play as.

### THE BAD

All of the repeated characters that they use over and over.

### THE UGLY

Doomsday's laugh—it sends chills down my spine.

It's time to become the greatest superhero of all time. In the Death and Return of Superman play as Superman and progress through two levels to get to your final showdown with Doomsday. Throughout the rest of the game play as the Superman upstarts: the Cyborg, the Eradicator, Superboy and the Man of Steel. Unfortunately, this game lacks originality. On each level you meet only the same three bad guys over and over again. Some of the enemies you'll even see on more than one level! Their names and colors might change, but they are still the same enemy. The levels seem repetitious as well, because they are all laid out in the same fashion. The control is only adequate, and the same goes for the sound. If you like side-scrolling, beat-'em-up games like Final Fight, however, you will probably enjoy this title. There are lots of enemies which, even though they look the same, make the game a challenge.

### They keep going and going!

These guys just don't die! At least it seems that way. Throughout the game it appears as if you keep

running into the same bad guys over and over again, which becomes very repetitious. A little advice:

When there are more than two enemies on the screen take out the ones who fly or shoot first.

### Super Icons

Throughout the game you will find these power-ups. The blue is a health regenerator, the red is a special power-up and the shield is the 1-Up.

Throw bad guys into the walls, shattering glass and cracking the stone pillars.

### Level 1-1 Siege of the Underworld: Power Plant

### Level 1-2 Siege of the Underworld: Inside Plant

## Level 2: DomsDay in Metropolis

Level Two is the last level where you will see Superman alive. This is the level where you meet up with Domsday and end his reign of terror. You must maneuver through a construction site and beat up on many of Domsday's henchmen. You first meet him at the end of the Construction Stage. Even if you beat him, he's not finished yet. He'll get up and fly into the city where you must pursue and stop him. Battle your way past tons of street thugs to get to the final confrontation with Domsday. Brace yourself because you won't be coming back from this one.

## Level 3: Attack on Cadmus

In Level Three you are the Cyborg Superman bent on ridding the galaxy of Domsday, who has been taken by his minions to a secret base. You will begin in a flying sequence where you must shoot down the defending robots. Then enter the base perimeter and attempt to defeat the forward guards. Guards consist of ground and air units with big guns. When you penetrate the defenses and enter the base, you will face the same opposition that you faced outside. Defeat the sentinel robot and fly Domsday to the far reaches of the galaxy.

The graphics are disturbingly 8-Bit fare.

**Y**ou are the mighty one, or at least one of his friends. The object is to progress through a number of puzzle solving action packed levels equipped only with a slung gun. This game's graphics leave something to be desired, and the same goes for the sound effects. Then you must warp back and figure out a way to get the items to the warp so you can send them back as well.

You can play as Mighty Max or two of his closest friends.

## You Are the Mighty One!

## The Warp

### BLAZING 32X ACTIONS

## POWERED FIGHTING ARMOR

The Mar can wear protective armor in combat. Be although powerful, it's not enough.

Certain characters can be equipped with a variety of power suits.

This game has it all. Scaling effects are woven into the fights for an excellent effect.

### SCALING EFFECTS AND SO MUCH MORE!

### THE GOOD

The graphics are cool, and the animations are astounding! The graphics were really an achievement!

### THE BAD

Those colors have to go! After a while, it just gets too distracting to look at the whole spectrum at once.

### THE UGLY

PIXILATION! Some of the scaling effects look way overdone, producing a pixilated, distorted character.

# COSMIC FIGHTERS

## THE RENEGADE CREW

Crashing into the military cruiser after realizing that it may be their only hope for survival after destroying the controls of their own craft, the renegades pack a lot of power despite the absence of any power armor.

## DAEMON

Kinda looks like something from a familiar third part film franchise. Watch out for his powerful claws.

## NAJA

For her size, she gets around the screen. Her large tentacles are her strongest asset, so keep a good distance from it in a fight.

## TALMAC

These are welcome as to this guy is. He's got range because of his size, so avoid those long legs of his.

## YUIG

Yuig is pretty big, strong and dumb. His immense power more than makes up for his lack of intelligence.

## THE MILITARY CREW

Forced to defend themselves from the alien and grotesque renegades, the militia dons large power suits to deal with their competitors for the last escape pod. Be careful, all that fancy power equipment can be knocked off!

## CYCLIC

Cylic is the bug with the most. In or out of power, this insect is one fierce competitor in the movie to take on any human or alien.

## NARCITO

The little dude with the speed and power. He can accept defeat very easily, but has the ability to flatten even the largest of alien examples speed and power.

## TYR

This big dude doesn't fear anything smaller than he is, so be sure to avoid his large and devastating attacks.

## ZENARIAN

She may be from the movie, but she has enough finesse to mix and match power to present herself as a formidable foe. Excellent power armor.

SEGA CD

## ALL THE ACTION IS HERE (ALMOST)

All of the blood, the attacks, the combos and the quotes are faithfully translated from the Neo-Geo arcade hit. However, there is no Earthquake. That's right, you Earthquake freaks out there may be disappointed to find that the large fighter has not been translated for the Sega. Also missing are the scaling effects. The entire game is fought in the close perspective (using the larger character sprites). Yet, it's still a very close translation.

All of the moves and presumably the blood, will be included. All of your favorite combos should work properly, although the overall speed of the game is slower than the arcade version.

# SAMURAI SHODOWN

### THE GOOD

I like the quality of the translation. The graphics are large and impressive.

### THE BAD

Too bad the scaling didn't make it to the Sega CD. Earthquake is a big loss, too.

### THE UGLY

Well, this version was a little raw, so it's not fair to rip on the game.

All of the familiar post-fight dialogue is here, and as far as we can tell, the text is not edited (as in the Super NES version). You won't be disappointed when you gawk your foe in Versus Mode, because you will be treated to the very same text you are used to from the arcades. This is definitely a plus when compared to the Super NES version.

**B**ack for more action, Samurai Shodown hits your Sega CD in a big way with this excellent translation of the arcade hit! Battle it out in feudal Japan using your favorite samurai in your own home.

The Boss character from the arcade, Amakusa, joins the fray in place of the large Earthquake character, who didn't make it to the Sega CD (or the Genesis). This is one of the closest translations of the bunch

Unfortunately, the big guy didn't port over for this release. Everyone else is here though, translated perfectly intact—including their moves, blood and talk.

### THE GOOD

The playability. If you don't already have a six-button controller, get one for this game. It really helps!

### THE BAD

The limitations of the Sega CD. Colors? Eh. Sharp graphics? Not really.

### THE UGLY

Beating the crud out of your opponent, only to have him (or her) pull off a fatal move. Argh!

The popular fighting game originally on the Neo-Geo, *Fatal Fury Special*, is now being brought over to the Sega CD! Although it is not complete, it shows the playability and good control that made the Neo version so much fun to play. All of your favorite characters should be in the finished version. Terry, Joe and Andy are back, as are the rest of the characters from *Fatal Fury 2*. Duck King, Tung Fu Ru and the late(?) Geese Howard make their return from the original *Fatal Fury*, rounding off the total to a cool 15 characters! Or maybe 16, if Ryo happens to be around...

## Andy Bogard

One of the Bogard brothers, Andy is always trying to prove himself to his brother Terry. His Dragon Blast is dangerous, and

his Quicksilver Blast can easily catch an opponent off guard.

## Joe Higashi

Joe is back... and he's

bad! This *Fatal Fury* veteran

has plenty of moves to keep his foes guessing. His Hurricane Punch and Tiger Thrust are forces to be reckoned with!

## Terry Bogard

Terry Bogard has plenty of

power moves. With his trademark cap and windbreaker, many underestimate Bogard. That's a fatal mistake!

## Chin Shin Zan

Chin seems to be rather ... well ... wide, but don't let that fool you. His Power Balls, Belly Blasts and Avalanche Crunches are more than a match for many!

## Duck King

Duck returns from the original Fatal Fury. He has picked up a few new moves. His Spin Attack and Flying Knee are forces to be reckoned with!

## Tung Fu Rue

This old man should not be taken lightly. His arsenal of moves includes Power Waves, Multifists and many other tricks he has up his sleeve. This is no feeble old codger!

## Geese Howard

Thought to be dead, Geese returns, badder than ever. His Wind Slice and Gale Slash really tear up the area!

## Billy Kane

Billy has a good assortment of kicks and throws. With his staff, he's doubly dangerous.

## Axel Hawk

Axel is a brawler whose punches are very powerful, and his Tornado Uppercut is a force to be feared.

## Lawrence Blood

You can always count on Lawrence to have his sword by his side. He keeps it sharp for unsuspecting foes.

## Mai Shiranui

This perky competitor is as deadly as always with her fan. Don't get too close! She can slam anyone to the ground.

## Big Bear

Big Bear is a fearsome sight to those who would challenge him. He's got serious power!

## Soon To Be Included...

Jubei Yamada, Kim Kap Hwan and Wolfgang Krauser were not in the Sega CD version yet, but don't worry; they'll be in the completed product. We can only speculate whether or not there will be a hidden character. Remember, if you go 2-0 every match in the Neo version, you fight Ryo Sakazaki.

**A**fter 10,000 years, the evil intergalactic sorceress Rita Repulsa is freed from her far-flung dungeon! From her secret, hidden base on the moon, the evil witch plans to rule the entire universe, starting with Earth! ### THE GOOD

The graphics and animation are incredibly detailed. The added cinemas are really cool, too.

### THE BAD

Other than the tunes and the cinema displays, the game is too identical to the cartridge.

### THE UGLY

The thought of leaping 30 feet out of the water and careening head first into the side of a rocky cliff.

The accelerated swim will provide more maneuverable speed that can propel Ecco out of the water and into the air.

The dash will give a great burst of speed. Beware though, this speed is hard to control after it has been used.

The sonar is the only way to communicate with the other animals. You can also get a small map by using this.

The map offers a limited view of the immediate area. This map will include the locations of all dolphins and schools of fish in the area.

The fish are a good way to replace any lost life. They travel in schools and are always replaced when you travel off the screen.

Among Ecco's other abilities, he can entertain the player by jumping out of the water and doing various tricks. To perform one of these daring maneuvers, you must be able to build up speed underwater

and have an open area above you. Then jet yourself out of the water! Use the dash to go straight up. Use the accelerated swim to jump out of the water and do a flip.

Ecco is back! After defeating the horrid Vortex, he returns to Earth as a hero. The only thing he hadn't planned on was the fact that the Vortex had not been defeated after all, and she has returned to Earth, seeking revenge for the loss of her original base with plans to destroy Earth. As the Vortex crashes toward Earth, hate fills in every open space and permeates every fiber of her being. She will conquer Earth this time, and she will destroy that unsuspecting dolphin. Or so she thinks! As Ecco you must stop her evil plans and once again save Earth from the total and utter annihilation that is inevitable if she succeeds in her plot against all that is known and free. Defeat the evil, hate-filled villain and once again be hailed as a hero. You can, and must, succeed in the end! All Earth and the human race rests in the balance!

# Atlantean Gateway

Once you enter the gateway created by the Atlantean people, you will be switched to a different view by which to travel. In this view you must avoid the attacking fish that will pass through the rings. You can also jump out of the water to see what is above the surface. Some rings will be available only above the surface, so be wary. It takes very precise timing and a high-powered jump to make it through the rings of this level. Once the fish in your way are destroyed, be sure to watch out for the bubbles that are left behind. Avoid them at all costs! These bubbles will cause damage to you and will damage your chances of finishing the level.

## 1. 2. 3. BREATHE!

Breathing on land is not a problem for this dolphin, surprisingly enough. If you accidentally jump onto some rocks, don't worry! All you have to do is scoot yourself back into the water and back to full mobility. This is an amazing animal indeed! He can breathe on land and underwater! Wow!

Ecco is back and this time he is taking on time itself! Does he have what it takes

to beat the odds and come out victorious once again? Can he return to his own time and place?

While swimming through the water you will probably run into some other dolphins. Communicate with these dolphins by using your sonar near them. After you've communicated with them, they will give you a small piece of advice to use as you continue your quest through the ocean.

# History Cube One

Ecco will eventually find this Cube. What secrets are held inside it?

Once contact is made with the Cube, a cinema sequence will commence where Ecco is traveling through the seas and oceans with his friends. He and his buddies are practicing jumping out of the water when a freak accident occurs. Ecco is teleported to a different place and time. Separated from his friends and in an alien territory, he travels on. As he is being chased by an inhabitant of this new territory, he makes friends with a killer whale.

A LOOK AT OTHER FORMATS...

What the Sega CD version lacks in colors, it makes up for with a cool CD soundtrack complete with authentic jungle sounds! Compare for yourself. Pitfall has never sounded so good!

Pepper	Hour Glass	1-Up
		
Gives you super strength.	Freezes enemies.	Adds an extra life.
Heart	Stones	Boomerang
		
Restores some health.	Stones that explode.	A powerful weapon.

### THE GOOD

The Sega CD is starting to shape up with fabulous-looking, fun titles like this!

### THE BAD

Maybe it's me, but it seems like there's too much animation.

### THE UGLY

If you're not watching where you're going, you could run smack into a wall! Ouch!

## THE MAYAN JUNGLE

This Panther Boss isn't all that mean. Just fling some stones at it.

Those pesky traps from the original are back!

The monkeys teach you that you're not the only one who can throw stones!

# MAP OF THE FALLS

Here is a complete map of the Xibalba Falls in Stage Two. Look for the hidden cliffs.

Move this coal car over to use it as a stepping stone!

Look out below! Fortunately, you can control the brakes!

## THE XIBALBA FALLS

Whoa! Take your time jumping from platform to platform!

Be sure to touch every marker you can find!

Pitfall Harry Jr. can do everything his father could and more!

He can now climb vines as well as use a grappling hook!

The Condors from Part Two have returned to cause trouble!

Heart icons are rare, so use them sparingly.

## WHAT ARE YOU WAITING FOR?

Harry Jr. always likes to be on the move in his adventures, but sometimes you have to study a situation before you react. If you wait too long Harry will become impatient.

## THE MAYAN MINES

Use your boomerang to discover a secret passage!

Watch out for the killer bats that will swoop down upon you!

Can you find this bonus game?

# SAMURAI SHODOWN III

**N**ote: For more in-depth coverage on the new fighters and their various moves, check out *EGM*, #6!

Okay, gang, you asked for it and now you certainly got it—here comes Samurai Shodown III! Not “Super,” not “Special” and certainly not “Jet,” here we have an actual sequel that is better than the original because it is different in ways that will keep veteran players of the first still playing—even past the, “I’ve-mastered-all-the-moves-and-found-the-secrets-so-what’s-next” stage. This time there are four new fighters to choose from (with the omission of veteran Shodown fighter Tam Tam), and this game (SNK’s biggest ever—clocking in at a hefty 202-Meg) is loaded with hidden moves, hidden fighters and a final Boss that will probably make your jaw drop and make you mutter “What the...” as you limp away from the machine! The Bonus Rounds have been removed, but the most notable difference is the Fatality Moves that are performed when the Rage Gauge (the little POW meter in the lower corner) is maxed out. If an opponent is hit with one of these moves it will break his or her sword and cause him or her some damage. (However, the sword will be thrown back in after a little bit.) So pick your favorite fighter and get ready to lock swords!

## THE GOOD

The usual fighters (minus Tam Tam), new moves, new fighters and hidden fighters!

## THE BAD

A game this good just makes you want Shodown III to come out!

## THE UGLY

Taking the nastiest of Mizuki’s hits that makes you suddenly break into convulsions and gasping for air!

## Amakusa: Gone But Not Forgotten...

Oh no! Not him again! Yep, Amakusa is back, but is he friend or foe? As the game progresses, Amakusa will make periodic

appearances and is involved with some of the fighters’ endings! He will even save some of the characters from certain doom! Depending on who you play as, his appearances will be different as will the other cinemas.

All the stages have been completely redone—like Charlotte’s stage! Check out the fantastic painting (top picture) on the far wall of all the fighters getting ready to square-off against the last Boss Mizuki!

## Fatality Moves:

The Rage Gauge now has a new function—when the word POW is flashing, a move will appear above it. This is the fighter’s Fatality Move! If done successfully, it will damage your foe and break his or her sword!

## For More On the New Fighters, Check Out EQM #6!

Although three of these four new fighters (Sieger, Cham Cham and Nicotine) aren't really Samurai warriors, they are welcome additions to the Shodown saga! Each has his/her own stage background and set of killer special moves. With regards to Sieger, the three moves marked with a † mean you do these three moves (Tiger Kopf, Falke Nagel and Elephant Greed) one right after the other. Also with Genjuro's Sanrensatsu, the speed of his three slashes depends on how quickly the three motions are performed. (A ★ means you must have your sword to do the move.)

## An Added Extra: A Hidden Fighter—Kuroko the Referee!

The rumors are true—there is a hidden fighter in Shodown II, Kuroko the referee! Don't be surprised if he jumps in and wants to fight with you! But get ready, he is very tough!

Although he is a little guy, he has a stance like that of Tung Fu Rue from Fatal Fury Special! A real tough fighter loaded with moves, like fireballs, and swats from his trusty flag!

## Yes, It Is Absolutely True: Don't Mess With Me, I Know My Character's Doll Move!

Wait—the game glitched! What happened to the other fighter? In Shodown II, each character has a Doll Move! This move can be performed at any time during play, but it renders the fighter doing it temporarily helpless! This is more of a taunting move than anything else, so perform them wisely! Eleven of the Doll moves are listed to the right, and some are very difficult to perform!

Gen-An never needed his weapon to perform any of his special moves. However, that has now changed with his Gripping move. Gripping has the same effect as Scorpion's Spear in Mortal Kombat: Gen-An shoots out his glove, and pulls in his temporarily-dazed victim! He also has two moves similar to Galford and Hanzo's teleports: one is done when he's damaged; the other whenever he wants. The only problem with these two "surprise" moves is they leave Gen-An wide open for characters with "Uppercut" moves like Haohmaru and Genjuro.

One of Poppy's dog moves (the Diving Dog) is now the Replica Dog and will foil any foe who likes to jump around a lot or teleport (especially fighters with Triangle Jumps like Nakoruru, Cham Cham, Earthquake and Hanzo). Unlike Hanzo, Galford's Head Replica Attack

comes from above. The most potent of Galford's moves, however, is his Head Strike, which is easily executed if you perform the Ninja Teleportation to get close to your enemies, then give them a nasty surprise with a Powerful Head Strike! Galford is also the only fighter in the entire game who can do all his special moves (including his Fatality Move) without his weapon!

The eagle handler has all her moves from the first game with the

addition of one—Kamui Ryusei! This will send a projectile right back at an opponent. However, she must perform this when the projectile is very close. She has also been given an air throw that can be done when jumping at an opponent, pulling DOWN and pressing the B button!

incredibly and effective ninja. Hanzo's Flying Spikeball has been modified and can only be done when jumping up in the air. One of his better modifications is his ability to perform a dashing Strike Dash that will carry an opponent in an arc across the screen if performed correctly. Also, his Rear Replica Attack now has Hanzo attack from below and not above. The key is to watch for the telltale log—if it appears during a teleport, block low and get ready to hit him with a Powerful Slash! His Dragon Fire is no longer a charge move.

Earthquake is loaded with teleports this time around! Additionally, his Fat Chain Saw gives the appearance of a teleport move at first. (He vanishes into a puff of smoke, then comes rolling at you with his blades spinning!) He also breathes fire for a flaming knockdown. As for his Fatality Move, this one is best done when very close to an opponent. When performed at a distance, Earthquake's swatting at you with a blue hand is a dead giveaway, and he is open for any kind of projectile. (Earthquake is stuck in this status until the move wears off.) Still a menacing opponent, his Powerful Slash will score three deadly hits if not blocked.

Veteran Shodown fighter Wan-Fu returns with a slight modification: He now has a large pillar of stone instead of his Scimitar of Slice. His two special moves are still performed the same way, with the addition of a Confucius Spin and the Benpatsu Attack. The latter is a self-damaging move that takes off Wan-Fu's Life Meter a little, but makes out his Rage Gauge so he can perform his Fatality Move! His Fatality move itself is difficult to block, as it may come in front, behind or in some cases, directly overhead! On the drawback side, he can perform no special moves if he is disarmed, but can do massive damage with his bare hands. His stage itself has been toned down a bit in terms of the number of bombs that are dropped by the Edo Express Delivery Man during a match, and Wan-Fu is one of the few fighters who can grab Genjuro out of his Sanrensu multi-slash combo move.

The one thing this fighter never had to give her an edge was a projectile move. With her Tri-Slash, Charlotte joins the

ranks of the game's more formidable fighters. The distance of this triangular fireball depends on the force she puts behind it. (A Powerful Tri-Slash will go across the entire screen.) Her Power Gradation now pushes her back a little so she isn't so easy a target when she lands on the ground. Her stage has an incredible painting in the background, but the overhead chandeliers have been removed. Her 3-Figure Slash has greater range this time, especially when performed while crouching on the ground!

Although armed with only two special moves in the first game, Haohmaru was still one of the stronger fighters. This time he has one Special Move that can be performed without his weapon (the annoying Sake Attack that can score up to two hits if done at close range). Like Ukko, he can also bluff a special move (Cyclone Slash), and his Resshin Zan works best for going over an enemy projectile and giving them a nasty swipe in the process. As if that weren't enough, his Crescent Moon Slash can cut through most enemy projectiles!

### ★ Snowfall Slash

Given two new moves, Ukyo emerges as a more powerful fighter—even though one of these new moves is a fake Snowfall Slash. His only drawbacks are his poor jumping range and overall slow movements. At close range, use a Snowfall Kick to make your opponent jump backward, then immediately perform an Afterimage Attack so they get slashed before they hit the ground. His Swallow Swipe also has a modification in that if done close to an opponent, Ukyo will bounce away if executed successfully—unlike before, where Ukyo would land right next to his opponent.

## Haohmaru

His Crescent Moon Slash will dissolve most enemy projectiles.

## Earthquake

This time the ninja characters can do a spinning piledriver on him!

## Genjuro

Oukazan projectile dissipates depending on the force used.

## Other Things To Look For: Cham Cham

**TIE LOSES:**  
Like the other animal fighters, if a special move is done using Paku Paku, it will hit even if she's hit. A great way to ensure damage to her enemies.

Her two boomerang attacks will dissolve most enemy projectiles, and still hit!

## Mizuki

## The Final Battle: All Of Your Samurai Skills Will Be Put To The Test! Some Mizuki Moves Are Similar To Amakusa's ... While Some Are Not!

### Multi-Slap:

Mizuki's Multi-Slap is easier to block than Amakusa's and doesn't do as much damage—whereas Amakusa's would drain lots of life fast!

### Teleport:

Mizuki's Teleport makes her vanish and reappear anywhere on the screen, whereas Amakusa's was a fast horizontal teleport on the ground.

### Full-Contact Slash:

Mizuki's most damaging move is the slash with her weapon! Like Amakusa, the damage suffered from this varies (probably depending on what kind of shape the Boss character is in). Watch out for Mizuki's tactic of teleporting behind you and using this attack. When she teleports, it is as if to jump than try to surprise her when she reappears!

## Golden Opportunities: Read Mizuki's Moves & Know When To Strike (And When To Back Off!) The Ultimate: "Oh, That's Sooooo Cheap!"

Mizuki can be dizzyed. This is the ultimate opportunity to nail her with a Powerful Slash or perform a Fatality Move—if you are hopefully pumped-up to do one, that is!

The most unpredictable of Mizuki's moves is the "Floating Black Hole" she throws at you. You will get sucked in and be dropped hard on the ground! If you are on the ground, jump it or block low. However, if you like to jump a lot, you may have to change tactics, for Mizuki likes to launch it so land on it.

### She Jumped! She Jumped!

If Mizuki jumps, nail her with a projectile when she lands, or use an uppercut move if your fighter has one! This is one of the rare instances where she is vulnerable to attack!

### The Mother Of All Fatality Moves:

The large black ball with the yellow insignia is Mizuki's Fatality Move! This can simply be blocked, but if you jump it, beware—it will come back like a boomerang and can take you from behind! Get hit by it and you become a human ping-pong ball and get painfully bounced around the screen!

### Amakusa Jumps Up and Comes Down: Human Fireball!

Amakusa turned his body into a projectile, but Mizuki has no such move—she uses her animal sidekick for deadly attacks instead!

### Throw:

Amakusa used a body throw; Mizuki has something nastier: Why dirty her hands when she can simply use gravity for a crash landing?!

### POOF: "Don't Call Me Baby..."

One of Amakusa's stranger attacks was his vanishing act being hit. This made it virtually impossible to set him up for another hit!

### THE GOOD

This is a great translation of a great game!

### THE BAD

Get yourself a six-button controller before you even think about playing this game.

### THE UGLY

The remains of your 3DO controller after you smash it to bits. Really ... a six-button controller is a must!

**M**any 3DO owners were hoping that they would be able to play Street Fighter on their systems, and now they can! The latest version, Super Street Fighter II Turbo makes its way to the 3DO, and it's a very good translation. The new moves, throw countering, Super Moves and Akuma code are all in this version. For those of you unfamiliar with the Street Fighter games, you control one of 17 fighters in one-on-one combat against other fighters. Play alone, facing 12 opponents (including four Boss characters), or play against one of your friends. However, there are no bonus rounds like in previous versions of the game. Another difference is the Super Moves. These are cool moves that can be done only when your power meter (at the bottom of the screen) is charged. Super Moves do massive damage, and are great for finishing combos. Watch for the burst of light when you finish off your foe with a Super Move!

# STREET FIGHTER II TURBO

The dreaded Dragon Punches of Ryu and Ken are now *not* invincible, which is unfortunate for these two. Yet, Ryu has a Ground Pound for crouching enemies, and an air uppercut that can connect for two hits. Shoryuken!

Ken has a multitude of new kicks to round out his arsenal. These new axe kicks and hook kicks often hit twice, causing massive damage. His Super Move is a triple Dragon Punch.

## Chun Li

As you can see, Chun Li has all of her previous special attacks, as well as a great new one. The Tornado Kick (above) is a multi-hit kick, juggling the opponent in the air. Her Super Move is two thrust kicks and the Lightning Kick.

## Zangief

Zangief keeps all of his devastating special moves, and adds a fireball-proof Glowing Hand attack.

## Dhalsim

Fortunately for Dhalsim users, his Teleport is easier to do. (It also looks cooler.) His Yoga Flame and Yoga

Fire are still here, and he adds another flame attack: the Yoga Blast (left), which is a great way to foil jumping foes.

Dhalsim's Super Move is an extended

Yoga Flame that really packs a big wallop.

## Honda

One look at these pictures should tell you that Honda is back and badder than ever! As well as keeping his Headbutt, Sumo Smash and Hundred Hand Slap, he's added a Sumo Crush (above). His Super Move is a double Headbutt.

## Blanka

Blanka has many new moves to complement his old ones, making him one of the most dangerous characters in the game. His new slides and lunges are sure to keep his opponents off balance. His Super is a multi-hit roll.

## Guile

This armed forces veteran has the least new moves, but his old ones are still deadly. His Flash Kick is still a bane to jumping foes, and his Sonic Boom makes for deadly combos. Guile has a new thrust kick and overhand right, plus his Super Move consists of a double Flash Kick.

## Cammy

Cammy adds a new special attack to her repertoire, one that is similar to Vega's Claw Dive. Control Cammy through the air as she leaps at her opponent. Then, you can have her do a sweep kick (above), or get in close for a spinning body slam (below). Her Super Move is a Cannon Drill plus a Front Kick.

## Fel Long

Fel Long returns with blazing speed and a temper to match. His new special attack, Rekku Kyaku (pictured above), is a flying kick designed for fireball evasion. All projectile throwers need to beware of this new threat! Fel Long's Super Move is the Rakka Ken punches (below) done twice.

## Dee Jay

Dee Jay's has a new kick that places him as a contender for the best fighter in the game! As you can see below, the Calypso Kick is a multi-hit kick, possibly doing three hits to jumping opponents. His Super Move is a Double Dread Kick.

## T. Hawk

The only new move that T. Hawk has is his devastating Super Move.

It's a double Storm Hammer (top of page), which does massive damage to his opponent.

## Balrog

Balrog has some deadly new punches, including a Dash Ground Punch (above), for crouching opponents. His Super Move is a flurry of punches.

## Vega

Vega is probably the most improved character for this version of the Street Fighter II series. His new backflip (below) not only avoids fireballs, but does damage to opponents as well! His Super Move is awesome: a Claw Dive coupled with a triple Air Drop!

## Sagat

The biggest improvement for Sagat is his Tiger Uppercut. It can now hit an opponent four or five times (below)! His Super move is a Tiger Knee plus a Tiger Uppercut.

## Bison

The master of disaster is back! His Psycho Fist controls differently, but other than that, he hasn't changed much. His Super is a double Scissor Kick.

## Akuma

You need to win all of your matches (no rematches) in order to fight this bad boy. His Stun Fireball, Hurricane Kick and Dragon Punch all do multiple hits! He has no Super Move ... like he really needs one!

The aliens are back again in another attempt to take over the planet. The first time was bad enough and much was lost, but Commander Stewart along with Admiral Crane and his crew are now ready to defend against the alien invasion. Your p-ot name is Wilcard. Your msson is to destroy the aliens in order to reach their command post and destroy it.

Since I enjoyed the first Shockwave so much, it wasn't hard to like this one as well. The effects are realistic, and the sound is superb. If you can get used to the touchy direct on panel, then you stand a better chance. On the planet Mars, use your missiles wisely, for you may need them at desperate times. Also, try to find all the fuel weapon stations to fill up on lost items. The voice control will help guide you. The funny thing about this game is that Commander Stewart doesn't allow you to recover after being hit a couple times. You basically go back into battle as a human vegetable!

After much destruction and loss, the battle with the aliens on planet Earth came to a close. Seven years later the orbital defense system regrouped and developed a more powerful defense. To their surprise, the aliens returned quickly—but this time they landed on the planet Mars. Join the command ship Omaha in their fight against the alien invasion.

# SHOCKWAVE

## OPERATION JUMP-GATE

## MEDICAL TEAMS

This game is even equipped with a full medical group. Just try not to get shot a third time or your body will be catapulted into orbit in a space capsule.

The introduction to Shockwave will captivate you like nothing else. Explosive action is plentiful!

## A LOOK INSIDE YOUR SHIP

In the Options Screen you can select **HELP** to figure out the control panel.

## LET THE GAMES BEGIN!

Small aircraft that resemble X-wing fighters fly by and fire when you least expect it. Watch your scanner for these guys and be careful of the mobile objects that draw your ship in close. You need about four missiles to blow this puppy up!

Smaller generators can be found throughout the planet as can alien fuel pods. Both can be fired on for extra points in the game. Lasers are useful for this job.

The feeling you'll get when flying is incredible. With the banging sounds of explosions and lasers/missiles sailing around you makes it feel as if you are right in the action. Look for fuel stations, dodge obstacles in your path and tilt to go back for more.

### EGM X-TRA DARE TO COMPARE

A LOOK AT OTHER FORMATS...

With basically the same format but different scenery, Shockwave 2 offers much more excitement with plenty of enemies and a more competitive level of skill.

## MARS SCAN OF ALIENS

Their reproduction seems to be uncontrollable, as they keep coming back.

### THE GOOD

The effects are awesome in Shockwave. Get ready for some explosive firepower beyond belief!

### THE BAD

It's pretty hard to maneuver around the ship. The movement is a little touchy in the area of control.

### THE UGLY

Listening to the voice-over complain about your mistakes.

# SHANGHAI

## TRIPLE-THREAT

### ORIGINAL AND ARCADE MODES

These are classic games of Shanghai—just remove pairs of tiles. The Arcade Mode is timed.

### THE GOOD

Ever since the Lynx version came out, I've been a fan of this most-excellent puzzle game.

### THE BAD

The music in this one is only average. A diversity of tracks would have improved this one.

### THE UGLY

Clearing away all but two tiles, and they're on top of one another. It's a no-win situation. Aaaargh!

### THE FALLING TILE MODES

As you clear away tiles, the ones above them drop down to fill their place. This adds lots of strategy.

### THE SLIDING TILES...

You can pair up tiles as usual, or slide entire rows around to form matches. These are a bit tough.

**S**hanghai has always been a decent mind-boggler. Now the 3DO version takes the classic game and splices it up. There's an Arcade Mode that you can try, in which you travel across China, it's also timed, forcing you to make quick decisions. There are two new Shanghai-based games. One is like Tetris, and the other has you clearing rows or blocks along with matching them up. All three offer players a lot of challenge and fun.

There are also three types of tile patterns to choose from, so you don't spend your eyes staring at confusing patterns. All in all, a highly-recommended puzzler.

**B**ehold the Nth dimension! (What the heck is the proper way to say that?)

Oh well, Zool is an interesting ninja creature who roams around trying to rescue the world from Krool's Mental Block creature. This would definitely have to be called a very cute adventure for lack of better words. Run around on very weird levels (and do mean weird).

Just look at the very strange pics over on these pages. You have the option of playing as either Zool or Zooz, Zool's lovely and daring sidekick. Zool the amazing intergalactic wonderdog, will assist you, and believe me you'll need it. This game should wow you graphically and keep you amused for a while.

## MEET ZOOL & ZOOZ!

These are the main characters in the game. Choose to play as either one. There are slight differences, but that's just it—they are very slight and unnoticeable. Zool does have a whip for hitting enemies at close range.

## VERY COOL JUMPING TECHNIQUE!

### THE GOOD

The characters in this game are really cute and they have some pretty funny animations.

### THE BAD

This game is completely frustrating and never seems to get any easier, even with some practice.

### THE UGLY

The layers of dust this game will probably create could make anybody's allergies flare.

A beautifully-rendered Zool character comes out on the title screen and has a unique little animation.

The Option Screen allows you to configure your joypad, and turn inertia off so you don't slide when you stop.

Jumping off the wall can be very useful because it can get you a little higher. There are plenty of places in the game where you need to use this technique, or you won't reach the ledge.

# BULBERRY HILL

There are tons of pads to bounce off in this level. Look for them all because some will place you in secret sections.

Remember to hit the halfway marks so you can continue there if you die. There are certain platforms that can only be seen if they're shot. My point is that you should shoot everywhere.

This level takes you through some very weird sights. Reaching the end is not impossible, but it's very hard. Collect all the icons.

Most are points, but some are power-ups. When you find invincibility, hurry to the end of the level.

These machines shoot a beam of light that you can stand on. Run, for if these are around chances are they are the only way of reaching the next part of the level.

# TOOTING COMMON

You will find yourself doing quite a lot of climbing in this level. Climbing combined with jumping is very tricky.

This is one of the funnier levels to play, but it is still not easy. Lots of really nifty stuff to look at, too. Run

through and break all the pots you see—sometimes they hold points and/or power-ups. Break them by jumping in the air and hitting your fire button to spin.

# SLAKING PASS

There are tons of cool scenery in this level. Snakes and dice rule and here they are depicted everywhere.

care if he runs you into walls. In other words, jump over any and all obstacles. Gain points as he takes you to some hard-to-find places.

You will find a snake in this level who has a mind of his own. Jump on his back and ride him but he doesn't

Enemies come out of nowhere in this level. You will take a ton of hits—always be on the lookout

for the heart power-ups. Watch out for the white balls that follow you around.

**I** return to the Gulf. This is your new assignment. Your mission: to rescue all of the MIA's, including a secret agent who carries some useful information. Then destroy the enemy's vital area. You'll be working with a Blackhawk attack chopper that carries an arsenal of missiles and rotary guns. Use your radar to find the enemy and search out the locations of your men as well as useful fuel tanks and missile crates. At the Object Screen you can switch your weapon buttons in order make the chopper more controllable. Of course, you'll also be running into surprises along the way. The enemy has employed tanks, bazookas and mobile rocket launchers in your vicinity in an attempt to stop your mission from being completed. So give your best shot and find your men!

### THE GOOD

Feeling the firepower as you blow up an entire command center and then go on for more.

### THE BAD

It would be nice if you could get your armor replaced—especially after getting hit left and right.

### THE UGLY

Watching your enemies spin on their heels just before dying, after being shot.

**ASSIGNMENT:**  
Along with your co-pilot, "X-MAN" fight off enemies and rescue your men from Kilbaba in the Gulf.

**YOUR MISSION:**  
There are four tasks you must take care of before moving on. Destroy these to weaken their system control.

In the desert you will find

several obstacles that will get in your way. Use the missiles for the bigger objects. The mobile

cannons will do greater damage to your chopper so don't get too close. Drop in and pick up your men by flying over them. Do the same with the missile cargo and extra fuel tanks.

by your friends and hangers, blowing them up to locate hidden cargo. Dodge bazookas, rockets and enemy tanks.

You'll be warned about your armor level, so keep clear of fire when low. If you don't, your chopper will take a nose dive into the sand and the mission will be aborted.

The power plant will take a few more missiles than others. At the airbase, destroy everything in sight.

With radar at your side, enemies and destinations can be easily found. You'll really need it when fuel is low and a fill-up is a desperately needed item.

The radar systems aren't hard to find, but cannons await you. The control centers are heavily protected.

**P**inball Fantasies is your run-of-the-mill pinball game. It has all of the same features as any other pinball game: trying to spell some catchy phrase by hitting the bumpers, shooting the balls into the hard-to-reach holes for big points, losing your balls in frustration as they fall down the alleyways, etc.

One of the nice features is that you can choose which level you wish to play in. However, your selection is quite limited. The control is very simple: pull back to shoot the ball, hit A for the right paddle and left on the directional for the left paddle. A good game for beginners, since it's very easy. Seasoned players won't find it too challenging, though.

In case you're wondering, yes, that is the view of the game. The rest of the field scrolls by as the ball reaches farther up the board. It's a good traveling game.

# Bonk's Revenge

There are three different (dare I say) beings you can become when you eat meat. I know how he feels—when I eat red meat I can get just as vicious. He turns into a half bat-half caveman thing and is able to jump twice as

high, a prisoner in some jail-like clothes who can get past all of the locked doors in the game or a weird creature that will bite anyone's head! Be careful, wrong moves will cause you to be fined Smiley Faces.

GAMEBOY

The big butt-head is back, and he isn't taking any crap. Bonk makes a gallant return to everybody's favorite Game Boy. You loved his first adventure so much that he couldn't say no to another adventure. This time, Bonk's planet has split in half and it's up to you to help him discover who is responsible and get everything back to normal. You have three different forms you will assume when you eat meat. There is a batboy who can jump high, a jail prisoner who opens locked doors and a crazy dude who can kill just about anything with his enormous teeth.

## Three different characters!

You will fight an opponent for an extra life. Lose two out of three matches to become a slow mummy.

The Bosses in this game are plentiful and of varied difficulty. The first

Watch out for this plant. If you get too close to him, he'll eat you! YUMMY!

Boss, pictured above, is extremely easy to beat. When he lowers his head and runs at you, jump up and bonk him on the head. Do this about eight times and he will no longer be a threat. The next Boss is pictured below. You fight him underwater, so simply swim beneath him and press your jump button. Do this quickly for repeated hits.

### THE GOOD

There are three cool, different forms you can change into when you eat meat.

### THE BAD

Unfortunately, this game is extremely easy. Good game otherwise.

### THE UGLY

I just can't stand watching that poor little Bonk get eaten by those big pterodactyls.

# LEGEND OF ILLUSION

## starring MICKEY MOUSE™

**S**omething strange is happening around the kingdom. Crops are withering and dying, and the people are becoming very worried. King Pete has been told that he must find the Water of Life to solve the problem. He is cowardly and selfish though, so he sends Mickey the laundry boy instead. Playing as Mickey, you decide to seek out another king to ask for help. Travel from the Kingdom of Goofy to Duckingham Palace using your brains and bubbles to reach your goal, only to discover that both of these kings are missing. What can a lowly laundry boy do? It is up to you to guide Mickey through the land and find the Water of Life. If you fail, the kingdom will be doomed. Only you can save it now.

Mickey's quest begins at Castle Goofenstein. Guide Mickey through to King Goofy for help. Overcome the obstacles standing in your way.

Goofy is missing! Travel through the forest to Duckingham Palace. Maybe King Donald can help. Watch out for snakes and bees that pack quite a sting.

Once you have made it through the forest, see if you can locate King Donald. Uh oh! Mickey has stumbled upon a strange shadow monster. He disappears and then reappears in a different spot, so be ready to move. Once you defeat him, find King Goofy. He will ask you to help find King Donald.

## VR, a Trip into Cyberspace

**T**he FOX Network is blasting into cyberspace with its new virtual reality adventure series, *VR* (its title will likely be changed to avoid confusion with NBC's hot new medical drama, *ER*). A mid-season replacement tentatively set to debut in early 1995, *VR* stars Lori Singer (*Footloose*, the TV series *Fame*) as Sydney Bloom, a shy telephone company employee whose ambitious computer tinkering gives her entry into not merely a modernized dreamland, but the darkest reaches of her own mind.

While the idea of manufactured and mainstream-driven "realities" and their impact upon real life has, over the past decade, fueled feature films from *Brainstorm* to *Brainscan*, it has yet to be exploited fully by the networks.

However, the prime-time climate has become ripe for risk-taking—thanks largely to the success of *The X-Files*. “VR will try to capture that same, creepy feeling,” says co-executive producer Thania St. John, whose TV writing credits include *Life Goes On*

and *Lois & Clark: The New Adventures of Superman*. “But instead of dealing with aliens, we’re going *inside* to the psychological.”

The catalyst and conduit for the action is Sydney Bloom, who jerry-rigs her home computer and inadvertently stumbles upon astounding virtual reality technology. “Sydney’s a Generation X kind of person, not quite your baby-boomer heroine,” says St. John. “She doesn’t have many friends, and she can communicate better through technology than she can face-to-face.” Amusing at first, her VR discovery takes a dark turn as the newly emboldened Sydney pulls a would-be boyfriend (Adam Baldwin) into a virtual date—and gradually learns that he’s a murderer.

## It just ain't right...

This poor chap took the retro-look too far back. Sure, disco is back, bell bottoms are in and John Travolta is cool again, but that's only 20 years in the past. This guy thought going 120 years would be even cooler. Sorry sir, but unless horse-drawn buggies and girdle-wearing dames come back in style, only the sideburns work.

# Not Just a Scratchy Voice

If you think you know the Simpsons so well that you can recognize each and every individual voice of the characters, think again. A few people supply the voices for the entire town of Springfield. Harry Shearer is one of those people.

In the first *Simpsons* script, Shearer recalls, "There were four or five voices I was asked to do. But with everybody, you discover more that they can do as time goes on. I mean, Hank [Asaria] has a blossomed, and everybody has revealed more and more stuff that they can do." Especially Shearer, who, even with his facility for voices, has developed an incredible range of characters, including Mr. Burns and his sniveling sidekick Smithers, the repulsively perky Ned Flanders, Principal Skinner, news anchor Kent Brockman, Otto the school bus driver, Simpsons family physician Dr. Hibbert, the Reverend Lovejoy, Scratchy the Cat, Radioactive Man, Dr. Marvin Monroe and of course, God, Hitler and the Devil. One would imagine that a lot of preparation went into making each voice specific and unique ("Mr. Burns: a mean, rich, old guy... hmmm..."). According to Shearer, he actually thought "as little as possible. It's like what jazz players say: 'You try to keep your mind out of it as much as possible.' Thinking doesn't help. Read the script and get a feeling for what the character's about, and fly with it."

"The only thing I had in mind," he adds, "was I didn't want them to sound like famous people (with a couple of exceptions) and I didn't want them to sound like each other."

Who would ever guess Mr. Burns, Otto and Scratchy were the same guy?

## This month in **HERO**

In **HERO ILLUSTRATED** #18, Frank Miller goes one-on-one with Hart Fisher in one of the most fascinating (and twisted) interviews you'll ever read. You'll also learn what's in the future for both Lee and his Wildstorm Studios. Fans are also treated to an in-depth look at Jill Thompson, of *Sandman* and *Wonder Woman* fame.

## This month in **CARDS**

This month in **CARDS ILLUSTRATED** #13, card artist supreme Joe Jusko talks about the biggest project of his career: Painting all the cards for the FPG Edgar Rice Burroughs set. There's also a *Star Trek: Generations* celebration as **CARDS ILLUSTRATED** takes a look at cards from SkyBox and X-Men II cards from Fleer.

# Star Trek: Voyager Ready, Set for '95 Liftoff

**D**irector Winick Kolbe compares the pervasive conflict between the rebel and Federation crews in *Star Trek: Voyager* to the premise of one of his favorite movies, the Tony Curtis-Sidney Poitier classic *The Defiant Ones*. In the Academy Award-winning 1958 film, two dissimilar and distrustful convicts escape from prison while they are shackled together, forcing them to cooperate with one another.

"It's an old plot," Kolbe concedes. "But it worked in *The Defiant Ones* and it'll work for us, as long as we don't get cava-lier about it."

In "The Caretaker," the two-hour premiere episode directed by Kolbe and scheduled to air this month, the Federation starship *Voyager* chases a rebel Maquis ship into a galactic phenomenon that transports them to an unknown region of space so distant that it would take them 70 years at maximum warp to return to known territory. The Maquis ship is destroyed during this

adventure, though its crew is rescued by the *Voyager*. Facing an unenviable future in oblivion, the crews form an uneasy alliance in their search for a way home.

"On the *Voyager*, we have two groups that at any moment could have serious personality conflicts," Kolbe says. "The Maquis could suddenly say, 'Wait a minute, that's not the way we're going to do it,' and there's the conflict. I like that there are great possibilities for conflict on the ship itself, which is some-

thing that was missing in *ST: TNG*. It just wasn't there, which could be a problem dramatically. There will always be conflict between human beings; we need those conflicts to grow and survive.

Gene Roddenberry said we'd come

to a point in *Star Trek's* future where there would no longer be conflict between people. But how likely is that scenario?"

Which is not to say, he emphasizes, that this series disposes of the late Roddenberry's overall philosophy.

"Rick Berman and

Michael Piller may create new series," he says, "but they never forget who started this whole thing. Ultimately, as long as it's *Star Trek*, it will be Gene Roddenberry's. It's all a matter of where you start from. The fact that the *Voyager* has a female captain is important; it's something I think Gene would have pushed for."

The first choice for the captain was Geneveve Bufo, but she quit the series three days after stepping onto the set. Replacing her was Kate Mulgrew, best known as Mrs. Columbo in the short-lived 1979 TV series of the same name. "When she came on the set, I was very impressed with her," Kolbe says.

"She had a definite presence, and she was informed about what she had to do... I suddenly felt that we were taking off. We were just taxiing up the runway until that point."

Comparing the janeway character to previous *Trek* captains, he points out that both Sisko and Picard are inherently remote, a trait that is highlighted by their positions. Janeway, he feels, will be entirely different.

"There are moments in the pilot where you get a sense of the difference,"

Kolbe says. "There is more concern for and attention to feelings. Yet it's not something that would ever affect her conduct as captain. If she has to send someone into a life-threatening situation on an unknown planet, for example, she will do that. But, if something terrible happens to that crew member, she can agonize openly about it. That's something a woman might talk about; but a male captain probably never would bring it up. He would be staring into space and it would be implied, but he never would talk about it. I think the story approach from a character point of view has a much broader band to work on than if it was a male captain. We've had a lot of women leaders in *Star Trek*, but they've all suffered from the hidden-penis syndrome."

### **HERE'S HOW IT WORKS:**

Call us with a list of your games in alphabetical order. We'll give you a price for each game or a package price for all. Keep in mind that you will be paid more for your games if you have the instruction book and the box for each. You'll get an authorization number over the phone which guarantees our quote for seven days. Pack up the games and send them to us right away by registered mail or U.P.S. with the authorization number on the label. We'll send you a check on the same day we receive your games. That's it!

Our address is: CAMBRIDGE/AMHERST  
2558 Delaware Avenue, Buffalo, New York 14216

### **STANDARD DISCLAIMER STUFF:**

We have the right to refuse any purchase. The games sent to us must be in good working condition and free of physical damage or we will return them to you at your expense.

## "LOONEY TUNES B-BALL" IS A SLAM-DUNK WINNER!

by Howard Coleslaw

In one of the greatest games this reporter has ever had the privilege to cover, **Looney Tunes B-Ball** scored the biggest victory ever.

When this wacky, fast jammin' game of roundball begins, it's clear that anything goes! First, choose from your favorite Looney Tunes characters and go two-on-two against the computer or your friends! You set the Wacky Meter to the level of craziness you want — from 1, for nonsense streetball, all the way to 5, where the only rule is there are no rules!

Change the ball into a cream pie and show your opponent the new meaning of "in your face"! Go invisible or teleport past your man and take it to the back for two! And the clock isn't the only thing ticking when the ball becomes a bomb for otato! the locker room after

the game, the Looney Tunes team was understandably exhausted, as the action was fast and furious at both ends of the court. Overall, the

team was pleased with its effort, though Taz's moves did

come into question. "Taz can't dribble, but he sure does drool," said team captain Bugs Bunny.

Taz was unavailable for comment, but released the following statement through his agent: "Roarg hawraaaa grooah froww hrrrg!"

# @ ! \* \* # # ^ @ ! " Most observers tended to agree. **Looney Tunes B-Ball** is your season ticket to fun.

"Shoot, doc," said Bugs. "We're having a ball!" The arena will rock as you play through earthquakes, eclipses and more! So go ahead and drive to the hole. But watch out, you just might fall in one!

TAKE THE COURT FOR THE WACKIEST GAME OF HOOPS EVER!

# RETROMAGS

Our goal is to preserve classic video game magazines so that they are not lost permanently.

People interested in helping out in any capacity,  
please visit us at [www.refomags.com](http://www.refomags.com).

We only scan magazines with a cover date prior to December 1999.  
No profit is made from these scans, nor do we offer anything  
available from the publishers themselves.

If you come across anyone selling releases from  
this site, please do not support them and do let us know.

Thank you!
